

LEBENDIGER ATLAS

Natur Deutschland

Thore Engel, Jörg Holetschek, Martin Friedrichs-Manthey, Robert Köpke, Birgitta König Ries, Anton Güntsch & Aletta Bonn

Pictures (3, 4, 5, 8, 10): Jörg Freyhof

5 Central Atlas visions:

1. Networking and supporting projects for nature and the environment in Germany
2. Consolidating, harmonizing and visualizing data on nature and the environment
3. Providing information and the best possible data management for nature and the environment
4. Inspiring people for nature and enabling engagement
5. Creating knowledge together - shaping the future!

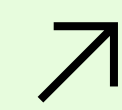

The "Lebendiger Atlas" bundles species observations in Germany to make them available for specialist applications and the general public. Currently, species occurrences of selected data sets are displayed that are publicly available via the portal of the Global Biodiversity Information Facility (GBIF).

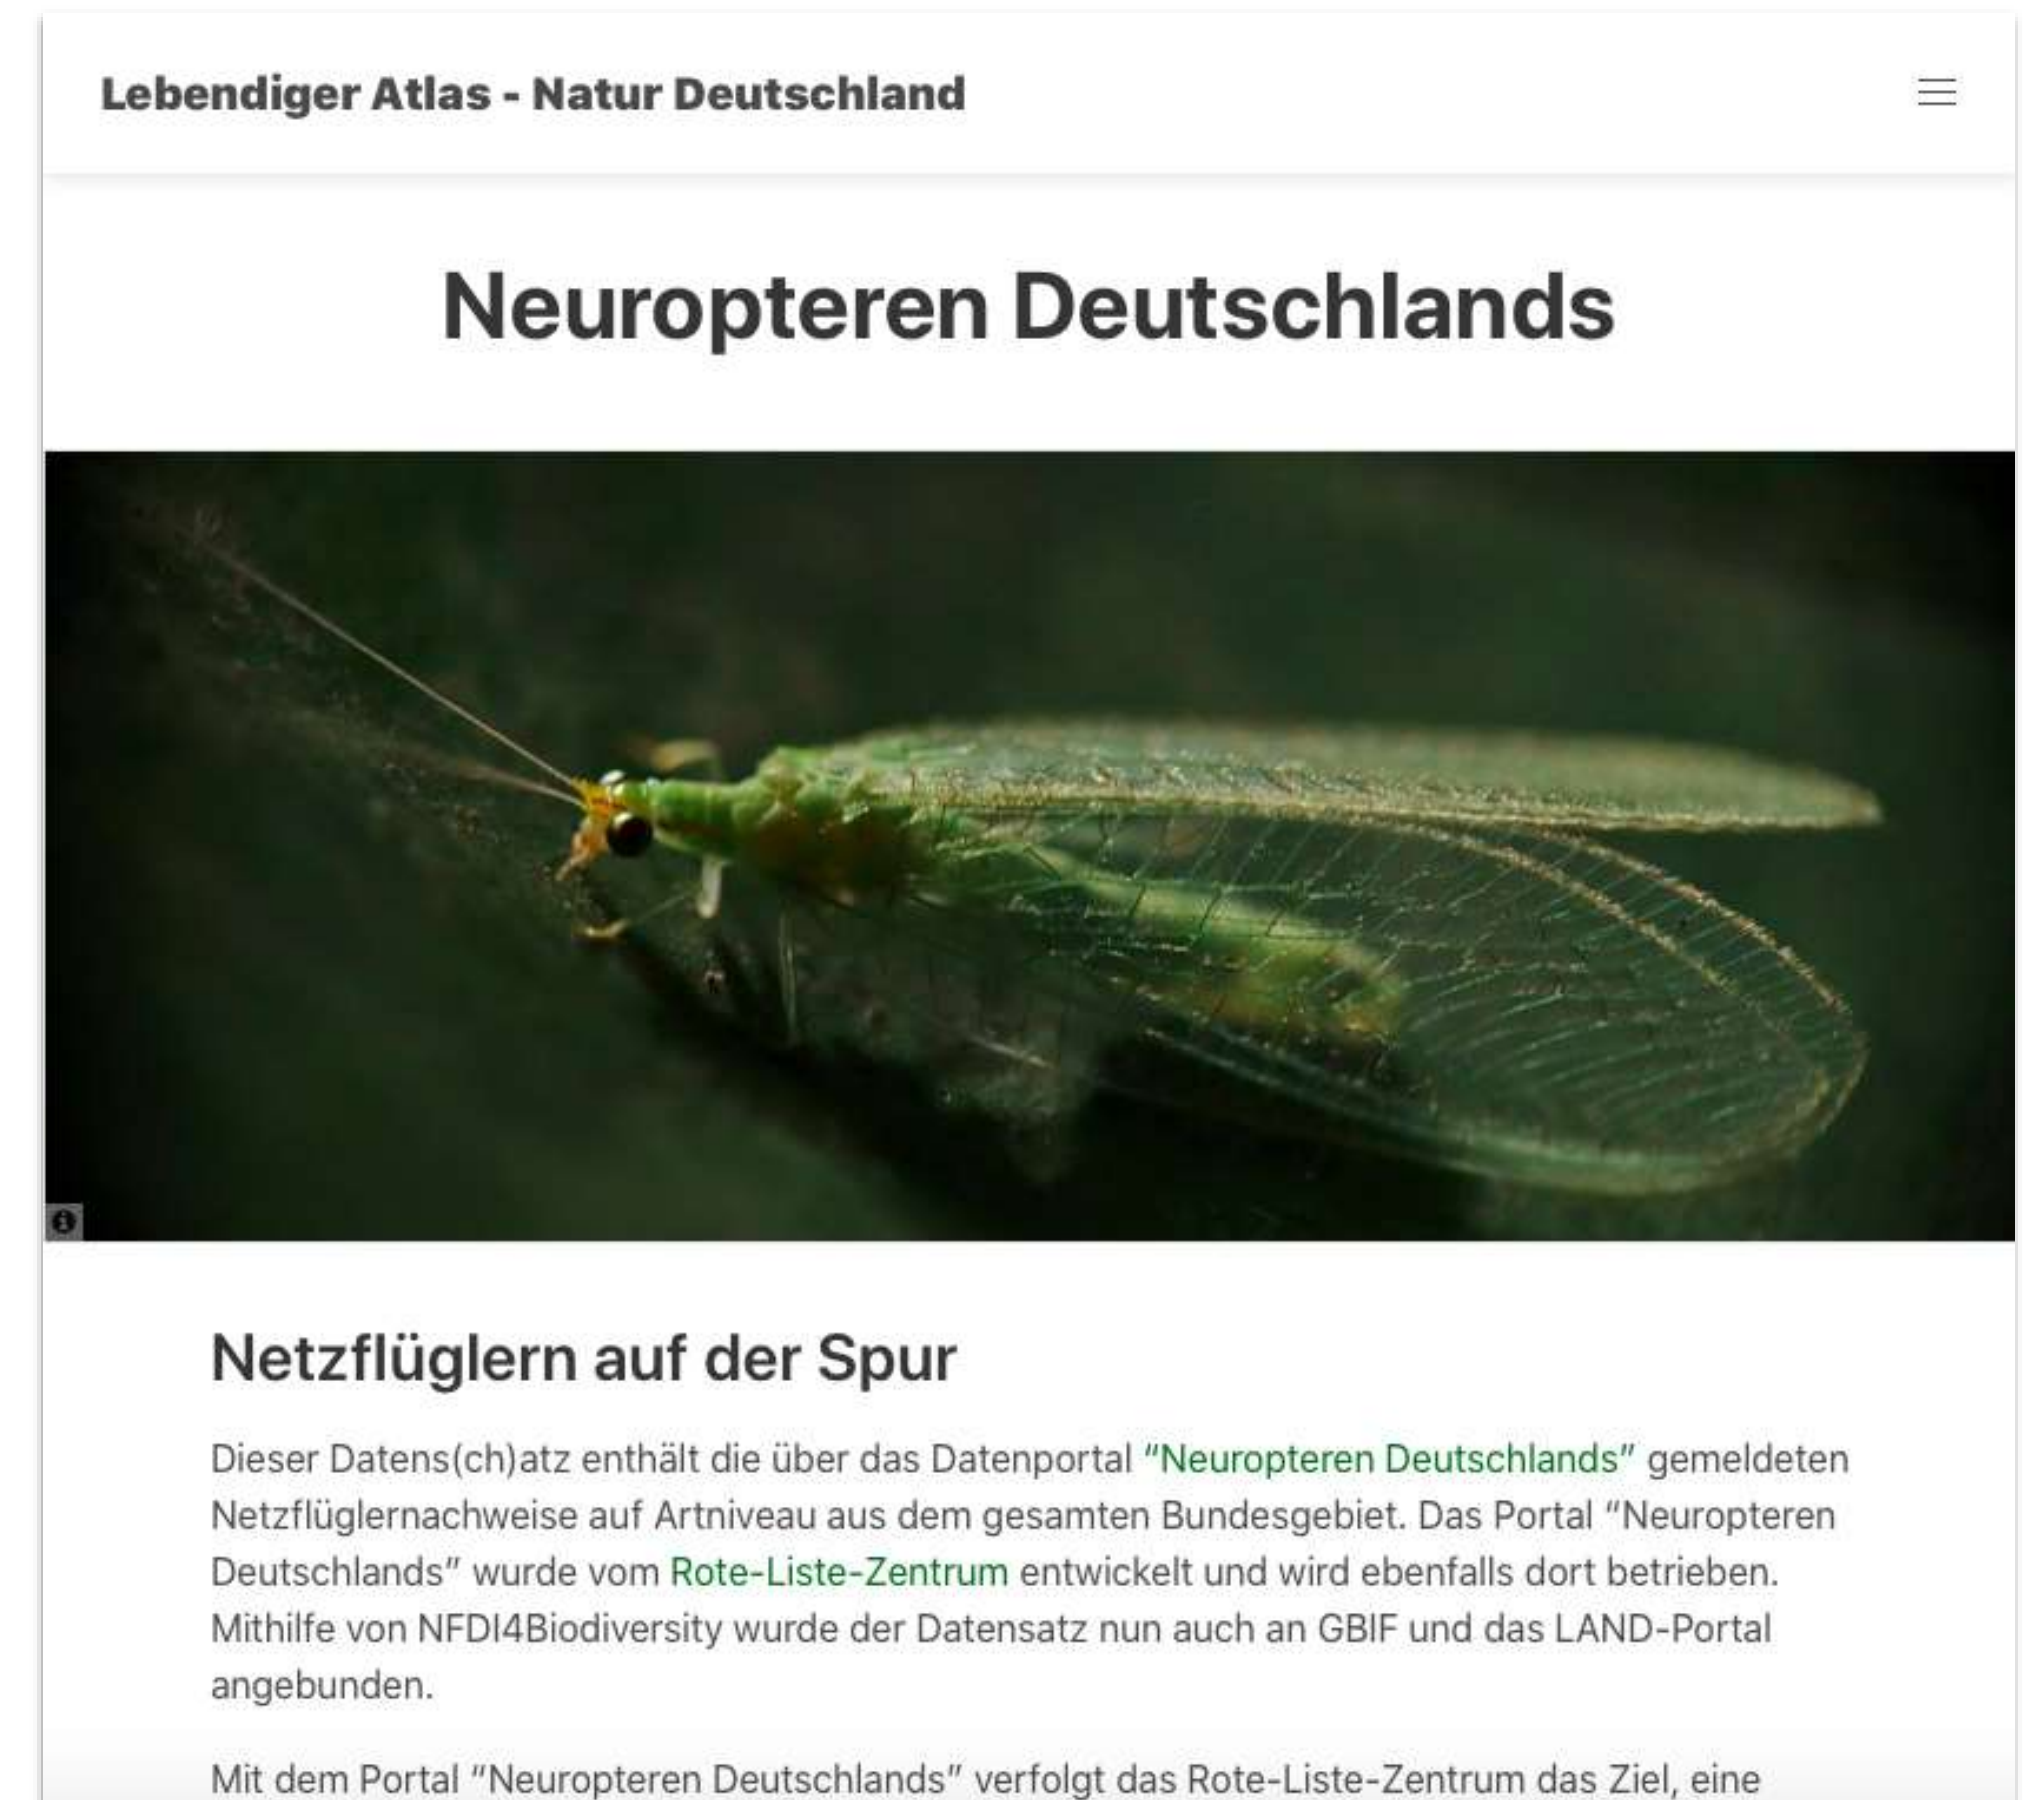

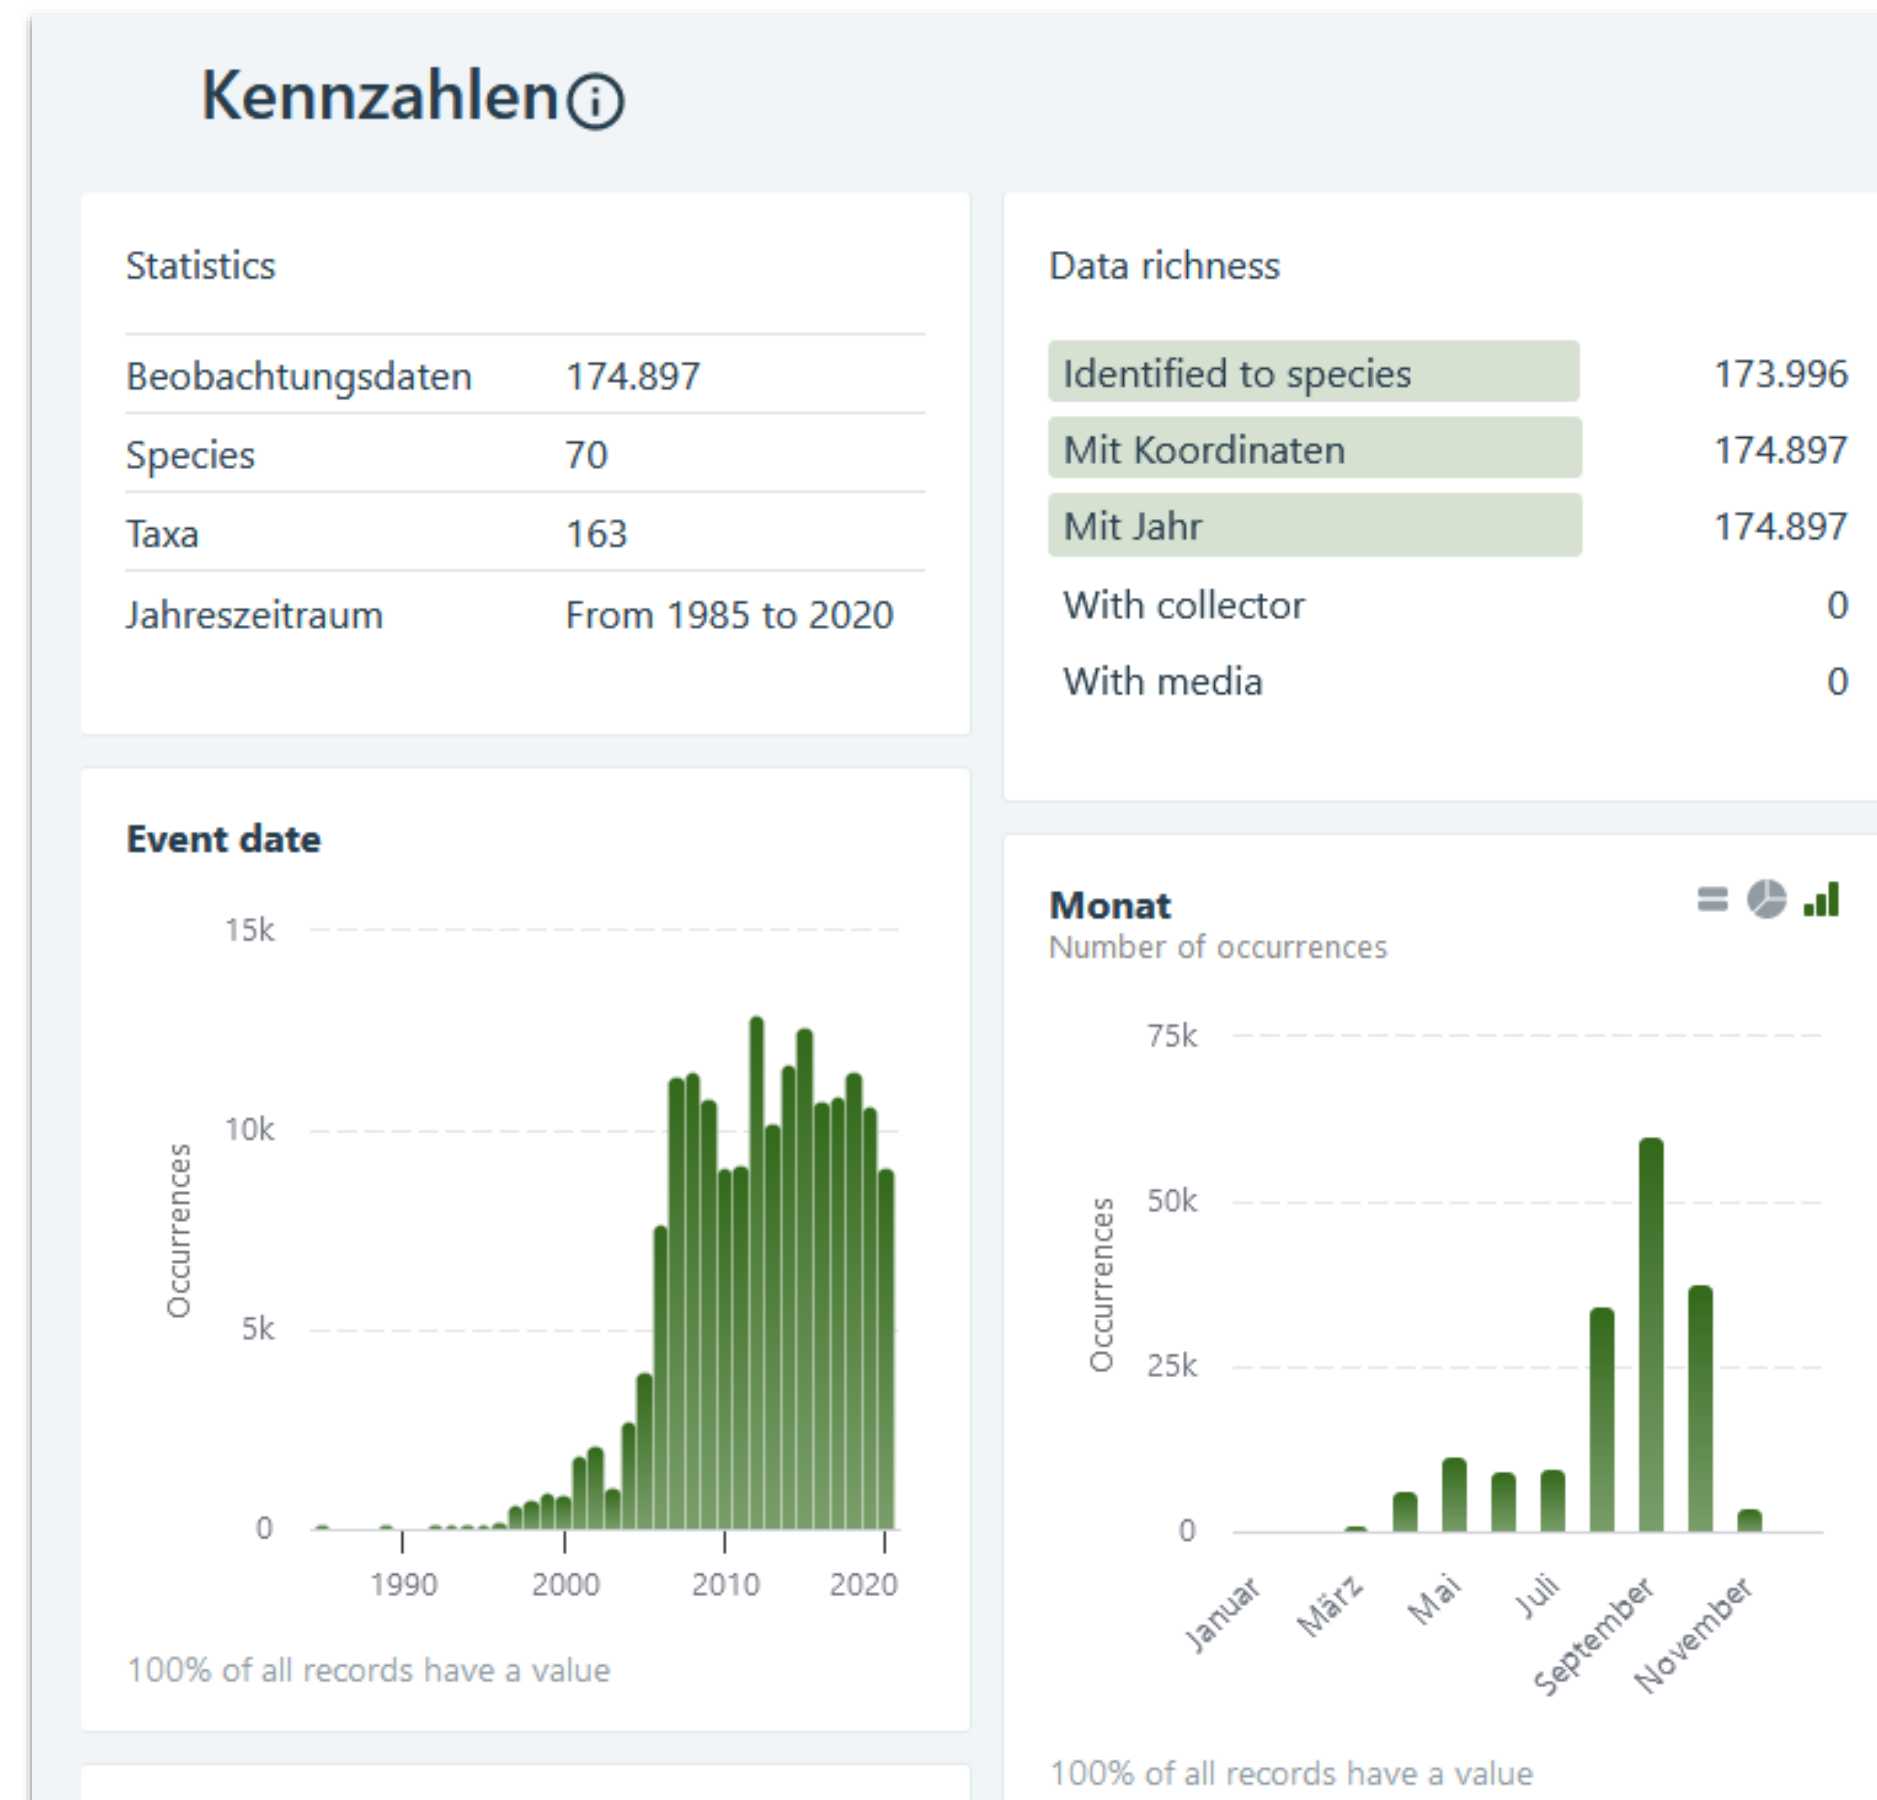

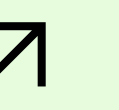

More than 33 million occurrence records for Germany

Detailed insights into each data set (selection)

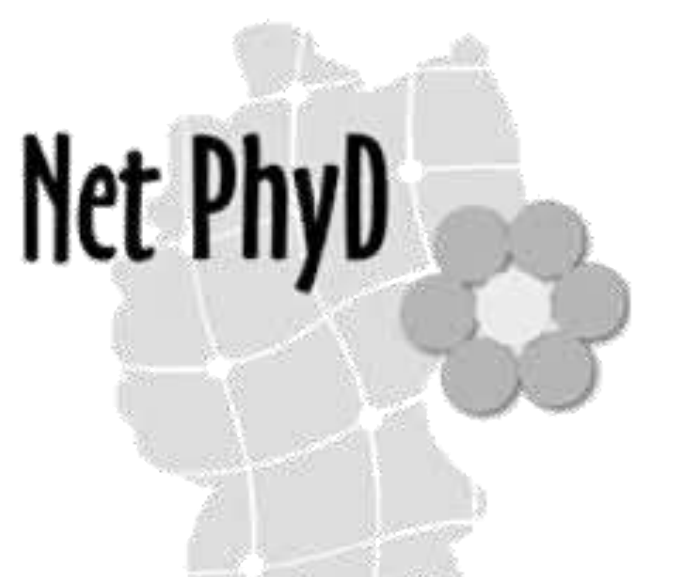

Data stories provided by data providers Datens(ch)ätze

Join the Atlas and create visibility for your data!
