

ID	Class name	Description	RGB Code
1	Water bodies and channels	Natural and artificial inland water bodies. Lakes, lagoons, waterholes and wide/accumulation sectors of rivers and streams. Includes agricultural and mining reservoirs/ponds.	0, 92, 230
2	Beachs, dunes and sandbanks	Coastal and riverine beaches and dunes; inland in abandoned and/or transported dunes, sandbanks in clogged rivers and other sandy sectors at altitude.	255, 235, 190
3	Mediterranean sclerophyll Native Forest	Mediterranean sclerophyll forest sectors with mature native trees and dense thickets (woody plants greater than two meters in height), or with a coverage of over 80% with respect to the Landsat grid.	56, 168, 0
4	Temperate Native Forest	Temperate forested sectors with mature native trees (woody plants greater than three meters in height), or with a coverage over 90% with respect to Landsat grid.	38, 115, 0
5	Broad leaf plantation	Forest plantations of exotic broad leaf species (mainly <i>Eucalyptus sp.</i> )	255, 0, 197
6	Fruit trees	Fruit tree plantations (fruit growing). Class generated from training points obtained from the fruit tree cadastre (vineyards, avocado, citrus, grapefruit, etc).	200, 0, 0
7	Glacier and snow	Snow-covered surfaces and eternal ice.	255, 255, 255
8	Riparian vegetation and wetlands	Flooded surfaces (permanent and seasonal) covered with vegetation, adjacent to watercourses, bodies of water and water outcrops.	0, 255, 197
9	Shrub and bush vegetation	Sectors covered with woody plants less than 3 meters high. Canopy projection covering from 5% to 80% with respect to Landsat grid.	255, 120, 0
10	Pinophyte planting	Forest plantations of exotic acriculate and imbricate/scaly/spiral-leaved species (mainly <i>Pinus radiata</i> ).	115, 40, 0
11	Grasslands, pastures and annual crops	Annual natural (un-managed) grasslands and pastures and annual irrigated and rained (non-fruit) agricultural crops. Herbaceous cover with high seasonal variation in early spring vs. late summer.	255, 255, 0
12	Meadows and evergreen grasslands	Managed and unmanaged evergreen grasslands and pastures. More common in southern Chile, associated with animal grazing areas. Herbaceous cover with low seasonal variation in early spring vs. late summer.	50, 230, 0
13	Bare soil and non-vegetated areas	Decapitated soils, excavations, landfills, roads and mine stockpiles, rocky outcrops, faults, landslides and rock slides and sectors above the altitudinal limit of vegetation.	199, 215, 158
14	Peatlands	Soils covered by peatlands	104, 104, 104
15	Impermeable surfaces	Surfaces covered with impervious human infrastructure: Buildings, paved roads, housing and industrial sectors.	0, 0, 0
16	Harvested plantation	Estimated harvesting areas of tree plantations	186, 85, 211
