

This deliverable (3.1), corresponding to Work Package 3, was written by the partner Underwater Gardens, during month 16.

The nature of its content is sensitive, therefore, all confidential information will not be published to protect the course of OCEAN CITIZEN.

Nevertheless, for informative reasons, the structure of the deliverable is structured in three parts:

1. First report on Marine Legal Assessment: Development of a protocol for coastal and marine restoration and conservation that is replicable and specific to different eco-zones, which will be implemented in the established five locations, with a study of Marine International Law.
2. Report on land facilities: In collaboration with la Universidad de las Palmas de Gran Canaria, Universita del Salento, Israel Oceanographic & Liminological Research and V-Corals.
 - a. Definition of the characteristics of the facilities.
 - b. Definition of the characteristics of future facilities that will guarantee the continuity of the regeneration goals established.
3. Reef design strategies.
