

KIDS-SQUAD

Chiara Spiniello

**N. Napolitano, F. Getman, M. Spavone, M.A. Raj, G.D'Ago, M.Capaccioli
A. Agnello, A. Sergeyev, C. Tortora, E. Petrillo, E. Bannikova
and the KiDS Collaboration**

**VST in the era of the large sky surveys
Naples 5-8 June 2018**

OUTLINE

★ **The Kilo Degree Survey (KIDS)
and the Strong Gravitational Lensing challenge**

★ **GOTTA CATCH'EM ALL**

- **Multiple images
of lensed QSOs**
- **Gravitational Arcs
(Crescenzo's talk)**

★ **SPECTROSCOPIC FOLLOW-UP
of the best QSOs candidates**

OUTLINE

★ The Kilo Degree Survey (KIDS)
and the Strong Gravitational Lensing challenge

★ GOTTA CATCH'EM ALL

Multiple images
of lensed QSOs

★ SPECTROSCOPIC FOLLOW-UP
of the best QSOs candidates

STRONG GRAVITATIONAL LENSING

★ **Lensing as MAGNIFYING GLASS: study of the distant Universe**

★ **TIME DELAY: Cosmography (H_0)**
(Adriano's talk)

HOLICOW
 H_0 Lenses in COSMOGRAIL's Wellspring.

Suyu et al., 2016

★ **Physics of quasars (QSOs): accretion disk size and thermal profile**

★ **Mass (Dark+Luminous) Distribution of the LENS**

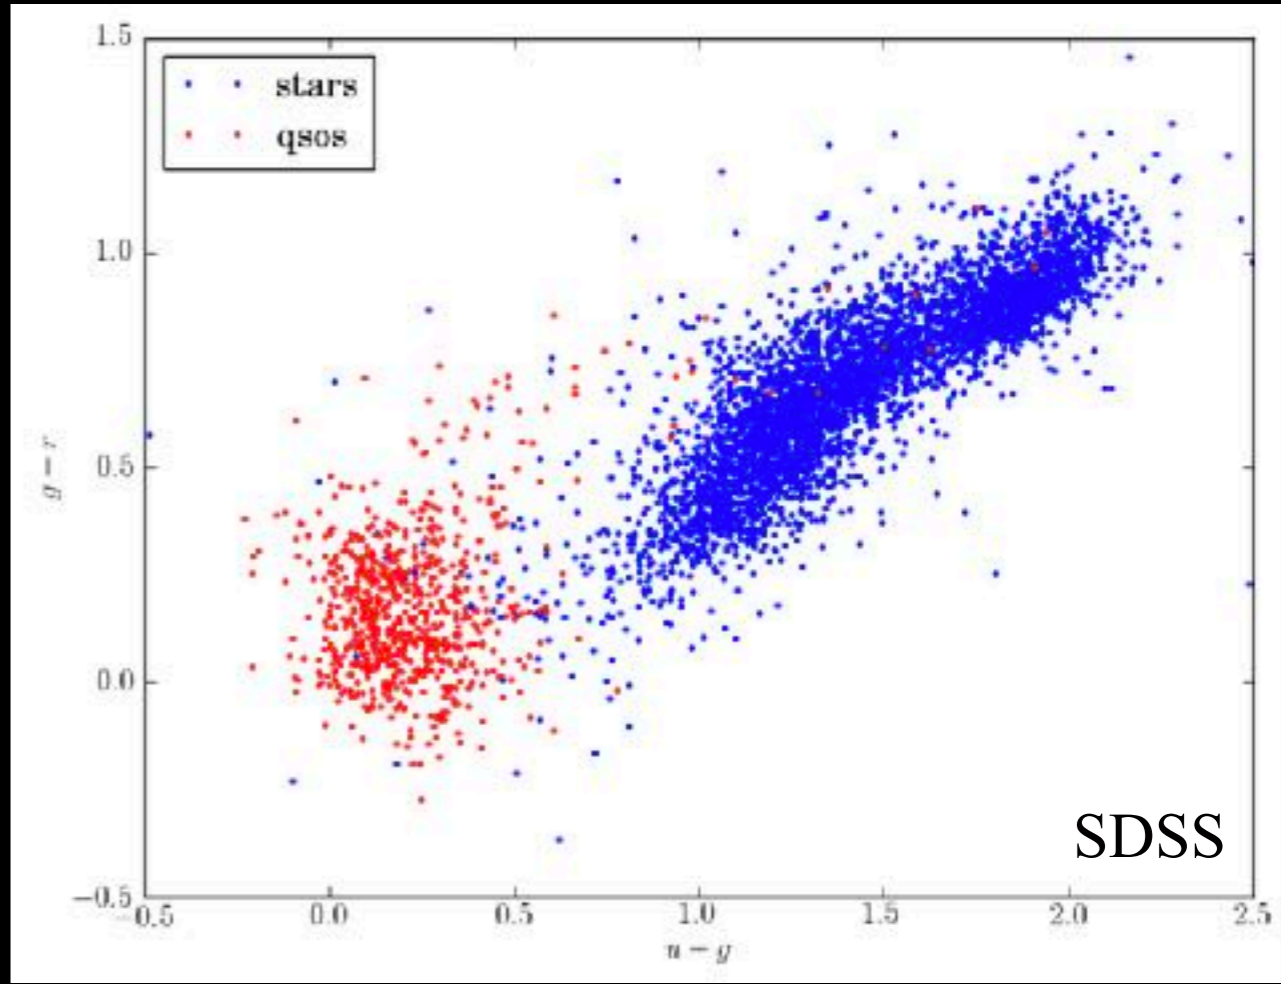

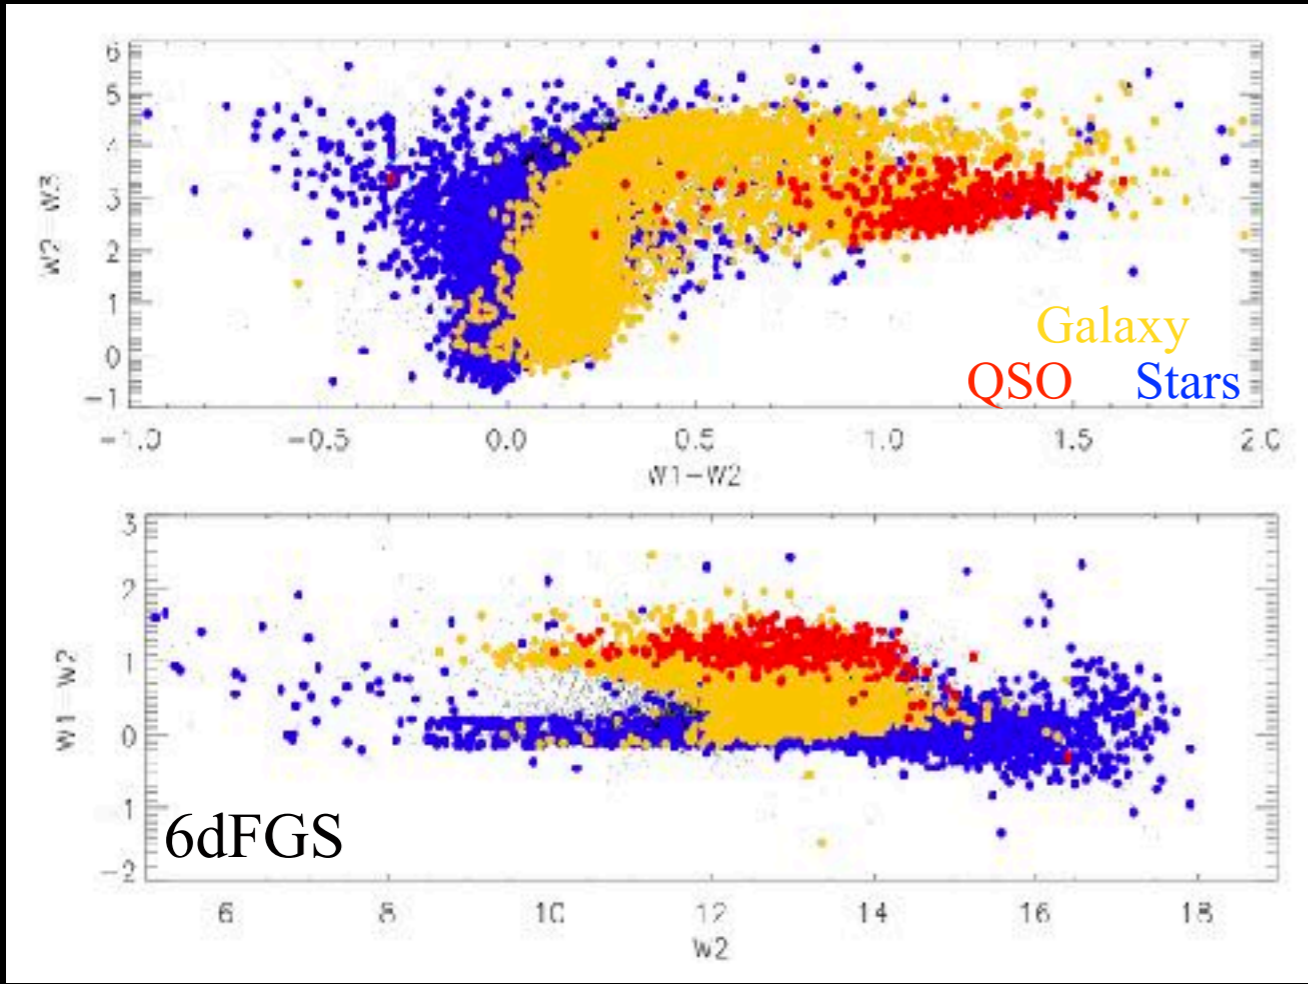

FINDING MULTIPLE QSO IMAGES

Color pre-selection

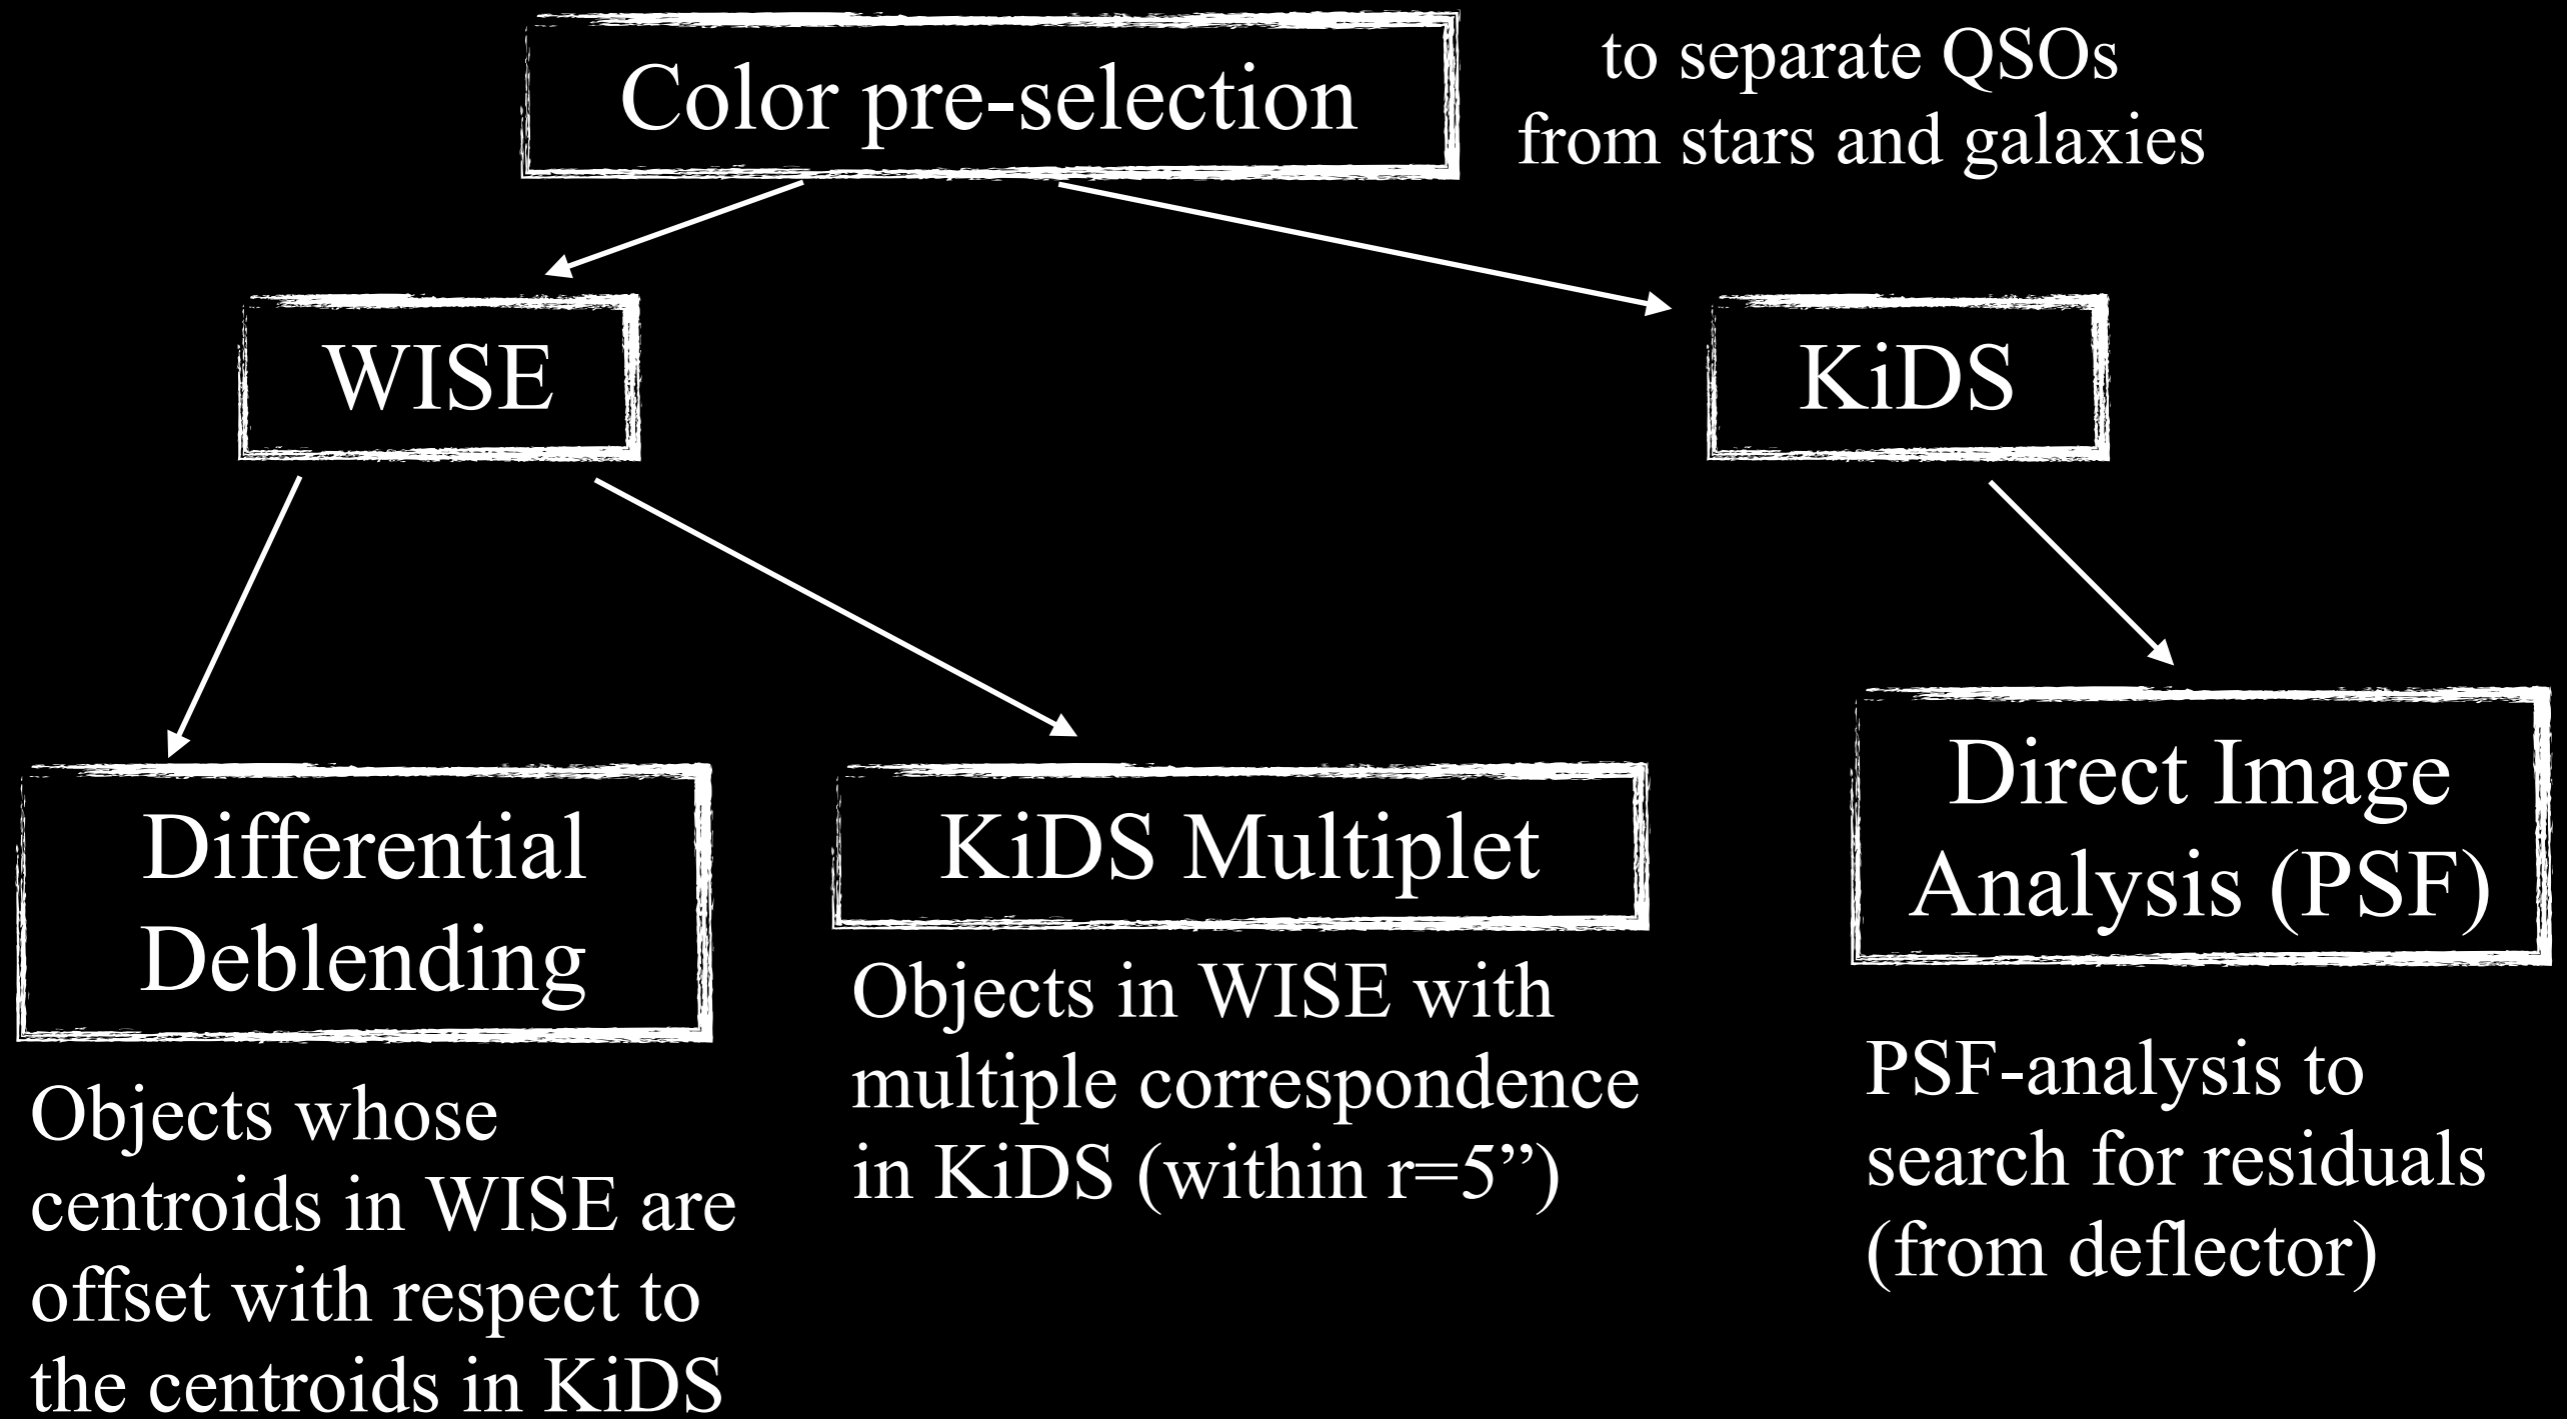

to separate QSOs from stars and galaxies

THE BEST CANDIDATES

9 candidates detected by more than one method:

ID	RA (J2000)	DEC (J2000)	Methods	Grade	Notes
KIDS0848+0115	08:48:56	+01:15:39	Multipl., BaROQuES, DIA	2.5	One of the images has a QSO SDSS spectrum ($z= 0.645$)
KIDS2307-3039	23:07:18	-30:39:15	Multipl., BaROQuES, DIA	2.5	
KIDS0841+0101	08:41:35	+01:01:56	Multipl., BaROQuES	2.5	Possible gravitational arc
KIDS1217-0256	12:17:09	-02:56:21	Multipl., BaROQuES	2.5	
KIDS2316-3320	23:16:27	-33:20:02	Multipl., BaROQuES	2.5	Possible NIQ
KIDS0324-3042	03:24:27	-30:42:50	Multipl., DIA	2.5	
KIDS0924-0128	09:24:37	-01:28:44	Multipl., DIA	3.0	One of the images has a QSO SDSS spectrum ($z= 2.446$)
KIDS1441+0237	14:41:45	+02:37:43	Multipl., DIA	3.0	One of the images has a QSO SDSS spectrum ($z= 1.61$)
KIDS1042+0023	10:42:37	+00:23:02	Multipl., DIA	3.5	Spectroscopic data confirmed the lensing nature (Fig. 4)

62 high-grade candidates found by only one method in KiDS DR3

THE BEST CANDIDATES

9 candidates detected by more than one method:

ID	RA (J2000)	DEC (J2000)	Methods	Grade	Notes
KIDS0848+0115	08:48:56	+01:15:39	Multipl., BaROQuES, DIA	2.5	One of the images has a QSO SDSS spectrum ($z= 0.645$)

CONCLUSIONS

- ★ **Strong Gravitational Lenses are very powerful astrophysical and cosmological tools... but they are rare...**
- ★ **KiDS image quality is perfect to search for this kind of rare objects...**

- ★ **KiDS-SQuaD: The KiDS Strongly lensed Quasar Detection project**
 - Searching for lensed quasars in KiDS with state-of-the art of morphological and photometric methods (Spiniello et al. 2018).
 - First spectroscopically confirmed lensed quasar in KiDS
