

Downloading ISMIP6 23rd Century Forcing Datasets

Data can be downloaded from the Globus [GHub-ISMIP6-Forcing-2300](#) endpoint.

For more information on how to obtain data from Ghub using Globus, visit the [Accessing Data](#) web page. You will need to have a Globus account.

If access is denied you should contact [Ghub](#) or [ISMIP6](#) teams. Please indicate your institutional email address and the Globus endpoint name to which you want access in your communication. The institutional email address should be the address used for authenticating via Globus (and ideally for their Ghub site registration as well).
