

The 2016 updated list of QPS status recommended biological agents in support of EFSA risk assessments

The list of QPS status recommended biological agents (EFSA BIOHAZ Panel, 2016) is being maintained in accordance with the self-task mandate of the BIOHAZ Panel (2017-2019). Possible additions to this list are included around every 6 months, with the first Panel Statement adopted in June 2017 and the last Panel Statement planned for adoption in December 2019. These additions are published as updates to the Scientific Opinion (EFSA BIOHAZ Panel, 2016) available at <https://doi.org/10.2903/j.efsa.2017.4664> and, as of January 2018, also as supporting information linked to every Panel Statement available on the Knowledge Junction at <https://doi.org/10.5281/zenodo.1146566>.

A specific representative of a QPS proposed taxonomic unit, does not need to undergo a further safety assessment other than to satisfy the specified qualifications, if applicable. On the other hand, representatives of taxonomic units that fail to satisfy a qualification would be considered unfit for the QPS list and would remain subject to a full safety assessment, in the frame of a notification by the responsible EFSA Scientific Panel.

- (a): Generic qualification for all QPS bacterial taxonomic units: the strains should not harbour any acquired antimicrobial resistance genes to clinically relevant antimicrobials.
- (b): *Brevibacterium lactofermentum* is a synonym of *Corynebacterium glutamicum*.
- (c): The previously described species '*Lactobacillus zeae*' has been included in the species *Lactobacillus casei*.
- (d): *Saccharomyces cerevisiae*, subtype *boulardii* is contraindicated for persons with fragile health, as well as for patients with a central venous catheter in place.
- (e): Yeast synonyms commonly used in the feed/food industry:
 - Debaryomyces hansenii*- anamorph *Candida famata*;
 - Hanseniaspora uvarum*- anamorph *Kloeckera apiculata*;
 - Kluyveromyces lactis*- anamorph *Candida spherica*;
 - Kluyveromyces marxianus*- anamorph *Candida kefir*;
 - Komagataella pastoris*- synonym *Pichia pastoris*;

- (m): Microorganisms recommended in the Panel Statement published in July 2018 (EFSA BIOHAZ Panel, 2018b).
