

- tube morphogenesis
- skeletal system development
- heart development
- NABA CORE MATRISOME
- renal system development
- mesenchyme development
- response to hormone
- cell-cell adhesion
- muscle structure development
- Extracellular matrix organization
- extracellular matrix organization
- sensory organ development
- positive regulation of transmembrane receptor proteir
- circulatory system process
- gland development
- TGF-beta signaling pathway
- appendage morphogenesis
- regulation of epithelial cell proliferation
- embryonic heart tube development
- epithelial cell differentiation
