

- Neuroactive ligand-receptor interaction
- Glutathione conjugation
- tRNA modification
- purine ribonucleoside triphosphate biosynthetic process
- response to cold
- neuromuscular junction development
- mitochondrion organization
- regulation of protein polymerization
- mRNA processing
- regulation of postsynaptic membrane neurotransmitter release
- membrane organization
- peptide hormone secretion
- neuron fate commitment
- cilium assembly
- Biosynthesis of cofactors
- vesicle organization
- Drug metabolism - other enzymes
