Session #6	11.09.2024, 10:00-11:00 CEST
The viability of the Openness Researcher Profile - insights from the UEFISCDI pilot	***Ioana Spanache and Alina Irimia***
	UEFISCDI

1. Updates from the community:

- UEFISCDI Conference 2024: **Rethinking Research Assessment**
  Physical event, 14th of November 2024, 9:00-18:30 EET
  https://www.brainmap.ro/registration-os-rra-2024

2. Presentation + Collaborative notes from discussion:

- Research profile: "openess" will be added as an option across all other tabs, illustrating different categories of contributions to research and researchers' roles (e.g. Research, Education, Leadership & Management, Communication & Engagement and other) and can be showed also as a dedicated tab, illustrating in one place a researcher' s contributions to Open Science:
- Openness Profile concept can be seen here:https://www.notion.so/Openness-Profile-Researcher-profile-BrainMap-v2-652c004614b54c7996bfdbacbb9b1dc9
- Mentoring - the draft template covers Student and Staff mentoring.
- Is there coordination with other pilots on the matrix of things/items that are added to the profile > UEFISCDI pilot is focused on funding, other pilots focus on RPOs but there are discussions among GraspOS and sister projects. A guiding document is the national strategy.
- What helped when adding elements > aligning with EU Horizon requirements, for example DMP.
- Research profile will not be used for research evaluation purposes, it is for monitoring and as a public profile for visibility, to be able to showcase a variety of contributions.
- Having an account in Brainmap is mandatory to apply for public grants, but they are not evaluated based on that.
