

EO for Africa Symposium 2024

23-26 September 2024, ESA-ESRIN, Frascati, Italy

Facilitating African-European R&D Partnership in Earth Observation Through Collaborative Research: EO AFRICA R&D Research Calls

Dr. Serkan Girgin, Prof. Dr. Zoltan Vekerdy, Dr. Mahdi Farnaghi, Dr. Diana Chavarro Rincon

s.girgin@utwente.nl

Faculty of Geo-information Science and Earth Observation
University of Twente, The Netherlands

**UNIVERSITY
OF TWENTE.**

EO AFRICA R&D Facility aims **sustainable adoption** of Earth Observation related technologies in Africa through an African-European **R&D partnership**

- EO AFRICA R&D Facility is the **flagship** of the **African Union – ESA** long-term strategy initiative of African Framework for Research Innovation, Communities and Applications in Earth Observation (**EO AFRICA**).
- The Facility supports **capacity development for research** by organizing tailor-made domain-specific open-access massive open online course, webinars, online training courses, and face-to-face courses.
- The Facility supports **capacity development through research** by enabling research projects co-developed by African and European research tandems.
- The Facility operates a cloud-based geospatial **computing infrastructure** to support capacity development and research activities.

<https://www.eoafrica-rd.org>

During 2022-2024*, the Facility launched **two*** research project calls to support African-European collaboration in developing innovative EO solutions

- The focus is the development of **open-source EO algorithms and applications** adapted to **African solutions to African challenges** by making full use of the **digital transformation** in Africa and the observation capabilities of the **ESA and 3rd party missions** through a modern **cloud-based** approach.
- The basic conditions of the calls to fund 15 research each round are:
 - Two Co-PIs representing a **collaborative partnership** of one African and one European research entity.
 - Co-PIs holding **PhD** or being **PhD candidates**.
 - Use of **interactive notebooks** or similar tools to develop algorithms and workflows.
 - **Open-access** research outputs (e.g. code, data, publications).
 - At least one **peer-reviewed publication**.
 - Project duration of **12 months**.
 - Balanced budget of max. **25,000 €**, excluding ICT resources.
 - Use of the **Innovation Lab** with co-located data infrastructure, which is provided for free.

The research project calls aimed at addressing emerging research topics in **food security** and **water scarcity** in Africa

- The first call in 2021 focused on **mapping and monitoring the environment**, whereas the second call in 2022 focused on **modelling and monitoring of environmental processes**.

Coastal survey for food resources

Crop development and **yield forecast**

Defining **groundwater level** in large basins

EO support of **precision farming**

Forecasting **runoff and river discharge**

Forecasting **regional evapotranspiration**

Forecasting **hydrological stresses**

Forest and rangeland processes

Identifying and mapping **crop stress/drought/failure**

Identifying and mapping **crop types**

Identifying and mapping **cropping areas**

Irrigation demand estimation

Mapping **deforestation**

Mapping **rainfall distribution**

Mapping **water bodies and floods**

Ocean survey for food resources

Ocean/coastal processes related to food resources

Quantifying **soil moisture**

Rangeland mapping

(Other topics)

Bilingual research project calls were published to collect the proposals from African – European research tandems

- Preparation of the call, including the research proposal and collaboration agreement templates.
- Pre-announcement of the call.
- Publication of the call.
- Promotion of the call through various communication channels and scientific networks.
- Assistance to the researchers during the application period to answer their questions.
- Collection of the submitted research proposals.

The image shows a document titled "Call for Research Proposals 2021" from the ESA EO AFRICA R&D Facility, in collaboration with the African Union Commission (AUC). The document is bilingual, with English and French versions. It outlines the objectives of the facility, which is to support African-European collaborative efforts in managing water scarcity and safeguarding food security in Africa. The call is for one-year projects and includes a list of research topics such as mapping water bodies, soil moisture, and crop types. The application form on the right side of the document includes fields for Project Title, Project Acronym, Applicants (with a note that one African and one European researcher should lead the project), and personal information of the African Co-PI, including Full Name, Job Title, Affiliated African Institution, E-mail Address, Phone Number, Address of Residence, Country of Residence, Nationality, Academic Degree, and Birth Date.

EO AFRICA African Union **esa**

ESA EO AFRICA R&D Facility, in collaboration with the African Union Commission (AUC) announce:
Call for Research Proposals 2021
Related to the themes: EO for managing water scarcity and safeguarding food security in Africa

Introduction
EO AFRICA stands for African Framework for EO research community and promoting creative EO African EO capabilities. The Facility offers a (Innovation Lab), supports African-European capacity development activities (Space Academies) research communities based on a comprehensive

EO AFRICA R&D Facility is the flagship of ESA EO research community and promoting creative EO African EO capabilities. The Facility offers a (Innovation Lab), supports African-European capacity development activities (Space Academies) research communities based on a comprehensive

Objective
In collaboration with the AUC, the ESA EO AFF to support African-European collaborative effort and applications adapted to African solutions based data access and computing infrastructure

Call for Research Proposals
The ESA EO AFRICA R&D Facility, in collaboration for one-year projects, as follows:

Research Topics
Water scarcity and food security are the main Facility's Research Calls. The first year, cover environment. Proposals in the following topic:

- Mapping water bodies and floods
- Mapping rainfall distribution
- Defining groundwater level in large basins
- Quantifying soil moisture
- Identifying and mapping crop types
- Identifying and mapping cropping areas
- Identifying and mapping crop stress/drought
- Rangeland mapping
- Mapping deforestation
- Ocean survey for food resources
- Coastal survey for food resources

In response to the call by ESA EO AFRICA R&D Facility in collaboration with the African Union Commission (AUC):
Research Proposal 2021
Related to the themes: EO for managing water scarcity and safeguarding food security in Africa
Please read this information before filling in the form.
ESA EO AFRICA R&D Facility aims to support research to be conducted in partnership between African and European scientists to address African research challenges related to food security and water scarcity by making full use of cloud computing infrastructure and EO data services. Please refer to the Call for Proposals for detailed information on the research topics, application and evaluation criteria, funding, and other benefits of the call.
Please adhere to the following when filling in the form:
• This form should be completed in English. Use the French version of the form if you prefer French.
• Use Call for Proposals 11 pt. font and do not change the page size and margins (A4 page, 2 cm in all directions).
• Remove all text in italics before converting the filled-in form to PDF and submitting it.
The form should be filled in, signed, submitted by the applicants by e-mail to proposals@esafrica-af.org together with all required documents not later than 31 December 2021, 12:00 CET. For any questions regarding submission contact by e-mail to proposals@esafrica-af.org no later than 2 (two) working days before the submission deadline.

Project Title

Project Acronym

Applicants
One African and one European researcher should lead the project as co-principal investigators (Co-PI), both with a PhD degree or in the process of obtaining it as a PhD candidate relevant to the call topics. Each Co-PI shall be authorized and supported by an institution from his/her continent of origin.

African Co-PI

Full Name	Job Title
Affiliated African Institution	
E-mail Address	Phone Number (including international call code)
Address of Residence	
Country of Residence	Nationality
Academic Degree	Birth Date (DD/MM/YYYY)

Collected proposals were **reviewed and ranked** by an expert **evaluation committee** for the final selection by AUC and ESA

- **Eligibility check** of the submitted research proposals.
- Establishment of the **Evaluation Committee** to review the submitted proposals.
- **Review** of the eligible research proposals by the Committee.
- **Shortlisting** of the eligible research proposals based on the results of the evaluation.
- **Pre-selection** of the research proposals for funding by the Committee, considering geographic balance.
- **Final selection** of the research proposals for funding by AUC and ESA.

An **exhaustive evaluation** process was conducted considering 33 criteria grouped under 6 categories

- Each proposal was evaluated by **2 reviewers for 33 criteria in 6 categories.**
- Final ranking was determined by using **weighted sum of the category scores (0-100)** and considering **suggestions of the reviewers** (not recommended, recommended, highly recommended).
 - Research Team: 15%
 - Proposed Work: 30%
 - Impact and Innovation: 25%
 - Use of EO Data: 10%
 - Computing Infrastructure: 15%
 - Budget: 5%
- If reviewer scores were **significantly different:**
 - **Consensus score** of two reviewers.
 - Evaluation by a **3rd reviewer.**

Evaluation Criteria			Score
Eligibility	Eligible African Co-PI	Yes	X
	Eligible African Research Institution	Yes	
	Authorized support of the African Institution	Yes	
	Eligible European Co-PI	Yes	
	Eligible European Research Institution	Yes	
	Authorized support of European Institution	Yes	
Acceptance of the terms	Yes		
Project Team	Scientific background of the African Co-PI	Strong	100
	Scientific background of the European Co-PI	Strong	
	Number of African team members	2	
	Number of European team members	1	
Background of the team members	Strong		
Proposed Work	Abstract reflecting the proposal	Yes	90
	Study area	National	
	Problem statement and scientific background	Strong	
	Scientific and methodological approach	Strong	
	Validation of the method and results	Strong	
	Feasible timeline	Yes	
Balanced workload for the African partner	Strong		
Innovation and Impact	Innovation brought by the proposed approach	Sufficient	80
	Potential impact in fostering use of EO in Africa	Strong	
	Relevance to the topics of the call	Yes	
	Relevance to the specific needs in Africa	Strong	
	Expected beneficiaries	Strong	
	Support letter from the expected beneficiaries	No	
	Number of planned publications	2	
	Reference to Open Science principles	Strong	
Reference to outreach activities	Weak		
Data	Use of ESA and 3rd Party Mission EO data	Strong	80
	Use of non-ESA EO data		
Computing	Use of in-situ and ancillary data	Weak	80
	Innovation Lab compatible computing workflow	Yes	
	Use of desktop software	Yes	
	Use of programming languages and packages	Sufficient	
	Use of interactive workflows	None	
	Data storage required	1-5 TB	
	GPU required	No	
Other special computing needs	Yes		
Budget	Budget outline	Strong	100
	Proper allocation of budget	Strong	
Overall score			87

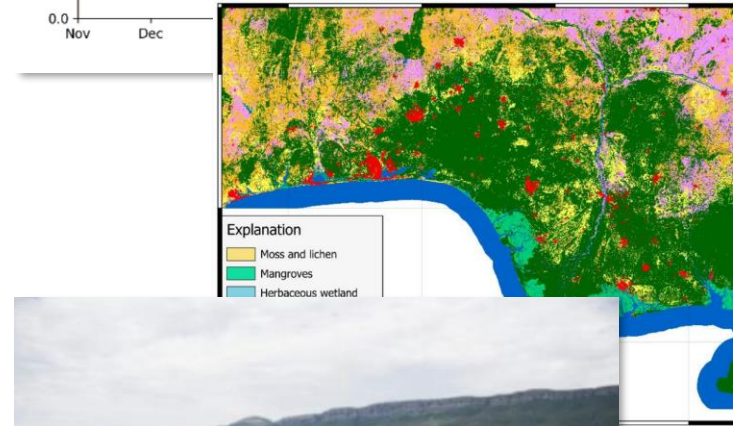

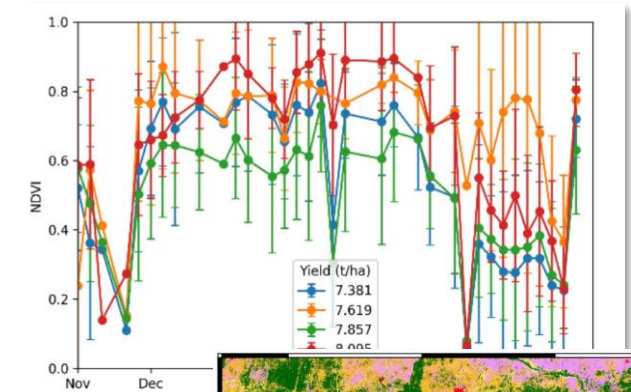

Each starting research project helped to grow the **R&D community** focusing of collaboration in EO science and research

- **Coordination meeting** with the applicants of the awarded research proposals.
- Clarification of **project timelines** and necessary **ICT resources** of the awarded proposals.
- Signature of **trilateral collaboration agreements** for the awarded research proposals.
- **Public announcement** of the awarded research proposals.
- **Kick-off meeting** with the research project teams.
- Setup of **virtual research environments** for the research project teams.

Technical and scientific support were provided during the lifetime of the research projects by the Facility

- **Operation of the virtual research environments** during the lifetime of the research projects.
- **Technical support** on the virtual research environments during the lifetime of the research projects.
- Establishment of a **scientific discussion forum** for the research projects.
- Facilitation of the research project teams' **integration** into the EO AFRICA community.
- Publicity of the research projects through **social media and blog posts**.
- Evaluation of the **mid-term progress reports** of the research projects.
- Evaluation of the **final reports** of the research projects.

In total **30 research projects** were funded and successfully completed in 3 years with collaborative **open research code, open research data, and scientific publications**

1st Call

Overall scores: max. 94 – min. 29

Min. average score shortlisted: 75

All "highly recommended"

12 African and 9 European countries

2nd Call

Overall scores: max. 98 – min. 47

Min. average score shortlisted: 56

All "highly recommended"

12 African and 9 European countries

Why to submit a proposal for the EO AFRICA R&D Facility?
Listen to awarded researchers, they will give you good reasons!

EO AFRICA

... or you can simply as them during the coffee breaks!

More than **100 project proposals** were received from African and European co-investigators affiliated with public and private research institutions

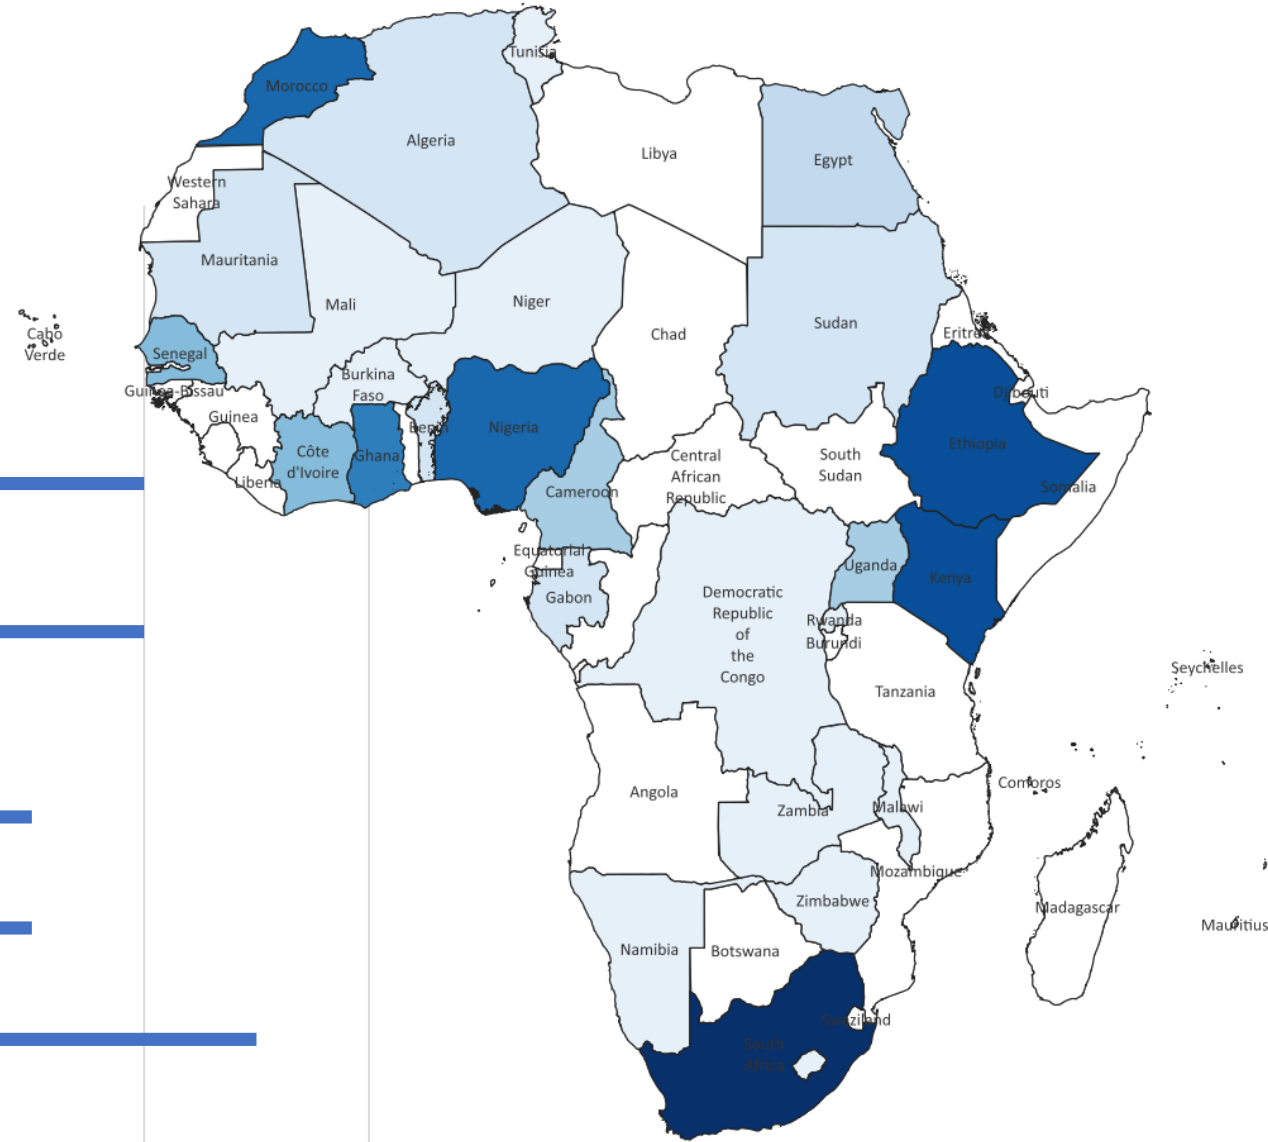

- **80 unique African institutions** in **28 African** countries, in collaboration with **17 European** countries submitted proposals covering a wide range of topics such as crop monitoring, yield forecasting, climate change, flood mapping, livestock mapping, soil monitoring, lake monitoring, biodiversity, etc.

Distribution of the African countries

Distribution of the profiles of the co-applicants

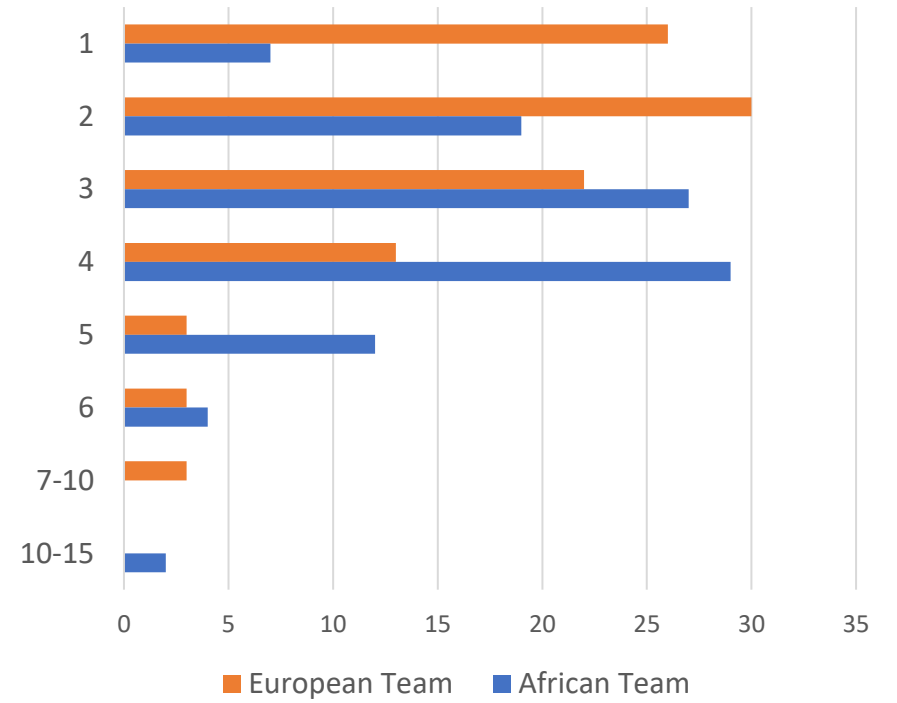

Distribution of the ages of the co-applicants

Gender balance of the co-applicants

Distribution of the sizes of the research teams

As a community we **learned lessons** while running the projects calls and the research projects

- The calls enabled new connections to be formed between African and European research groups, which didn't work together previously.
- The call enabled African researchers to learn how to use cloud-computing infrastructure for geo-information science and EO purposes.
- Estimating computing resources needed to perform proposed research activities is challenging.
- Although provided funding was limited, it was sufficient to perform a wide range of activities. However, transfer of the funds to African partners were challenging.
- A significant number of African project team members participated capacity development activities. But more is required.
- Publishing open-source research code and open-access data seem to be at their infancy.
- Small funding can initiate strong collaboration between African and European research groups. This doesn't need to be limited to research activities but can also cover training and capacity development.

We will be happy to have your **questions, feedback, and comments!**
