3.1. Statistically Significant Signature Features of Qn, Lk1, and Lk2

Here we compile running lists of signature features that, taken individually and moreso as clusters, demonstrate statistically significant differences between Qn, Lk1 and Lk2. These features are detailed in the extensive Indexed Data Dictionary and noted throughout the Comparative Restoration.

The null hypothesis is the early-orthodox claim that Lk1/Ev —though an evisceration and modest editing of Lk2—has the same author as Lk2. This view is assumed and/or defended in recent scholarship on Marcion by Rowe, Wolter, Hays, Schmid, Moll, Roth, and others. The alternative is the Schwegler hypothesis—defended by Tyson, BeDuhn, and Lieu and fully embraced by Hoffmann, Vinzent, Klinghardt, and myself—that Lk1/Ev has a different author than Lk2 and that Lk1/Ev as the earlier text was significantly expanded and re-written by the author/editor of Lk2.¹

Even apart from statistical analyses proving the Schwegler hypothesis, a cursory overview of the evidence should be convincing to unbiased scholars, who essentially must choose either: 1) to believe that Ev represents the most skillful or miraculous abridgement of canonical Luke, surgically removing several hundred clusters containing dozens of distinctive, diverse, deeply integrated yet widely ranging features with extraordinary consistency all the while retaining parts of Luke that reflect unusually high frequencies of other features, or 2) to accept that Ev is an earlier, simpler edition of Luke. We again ask readers to use Occam's razor to cut through the unscientific, early-orthodox myth that the Gospels were singular compositions created by individual authors, rather than fluid oral-textual performances supplemented and reworked in multiple layers across multiple generations. Abridgements of Shakespeare cannot help but sound like Shakespeare. If Luke sounds like Gospel Shakespeare to you, listen to it and then to Ev again, all the way through. Then decide if Ev sounds more like abridged Shakespeare or pre-Shakespeare.

Using redaction-, text-, and historical-criticism, many previous scholars concluded that Ev is the earlier of two major editions of Luke. While my scientific methods, hypotheses, conclusions, and reconstructions of Ev and Qn are distinctive, they dovetail with almost 250 years of critical scholarship going back to D.J.S. Semler. If we follow scientific methods, evidence, and proofs instead of prejudicial ideological bias, the Ev = Lk1 position must now become consensus.

¹ Gramaglia's position is a moderating one: blending the early-orthodox position that both Ev and canonical Luke have fundamentally the same author with the Schwegler position that Ev is the earlier text and the basis for the later redaction of canonical Luke. The stylometric disparities detailed in this section present a direct challenge both to the early-orthodox position and Gramaglia's argument for common authorship separated only by the passage of time. The voices of the respective redactors of Lk1 and Lk2 are sufficiently distinct that they probably represent different persons. The identification of the full breadth of stylometric variances also provides a corrective to the reconstructions of Klinghardt and Nicolotti, which are often too generous in restoring originally Lk2 signals back to Lk1. While Klinghardt is correct that establishing the actual historical-editorial direction (Lk1 to Lk2) is a necessary first step in an accurate reconstruction of Lk1, Roth's rigorous skepticism provides a necessary counterpoint to clarify the distinct voice of LkR2 absent from Lk1. Roth, Klinghardt and Nicolotti all have numerous Lk2 contaminations in Lk1, and while these arise from different methodological presuppositions, all such contaminations are noise that must be removed from Lk1 in order to attain greater vocal signal clarity and vocal stratum fidelity.

Lk2 Features Disproportionately Absent from Qn and/or Lk1

Given that we are still building, compiling, refining, decontaminating, and indexing our Qn and Lk1 datasets, there are still some minor fluctuations in the data. For now the main counts (Tot, QnA, Lk1A, Lk2A) indicate the number of verses in which the feature is found, which usually, but not always, corresponds to the total number of occurrences. When a stratum abbreviation is followed by an E, it indicates the expected number; when followed by an A, it indicates the actual number; when followed by Bi, it indicates the binomial distribution probability. 4550 words are from Qn-sourced passages, 1350 from Mk1-sourced passages, and 100 are from Lk1 original creations. Lk2 has about 13482 remaining words. Thus, Qn% is $QnA / 4550 * 100$, Lk1% is $Lk1A / 1450 * 100$, Lk2% is $Lk2A / 13482 * 100$, and Tot% is $Tot / 19482$.

Features Disproportionately Present in Qn and/or Lk1

We anticipate this list will grow as we continue to compile datasets and run queries against them. To detail our findings from v1.37, the negative particle μή has strong variance: about 1.0 in Harnack (#47) and Roth (#41) vs. 0.47 in CENP (#19) and 0.35 across Acts (#64). At the same time, according to our restoration, Ev has 0 examples of the 15 emphatic double negative + subjunctive construction / 'οὐ@b μή@x \w+@vs found in Lk2, making the variance wider and more statistically significant. As it happens, Roth, typically following Harnack, anachronistically applied this construction to Ev in several places (7.23, 12.59, 21.32, and 22.67). Whether those Lk2 contaminations to Lk1 are corrected or not, it is abundantly clear that Ev has a disproportionate amount of negatives and simple negative + indicative verb constructions as compared to the rest of Lk2, and that this does not reflect any supposed editorial tendencies of Marcion, but only pertains to whether the portions from which we are extracting word counts are present or not in Ev. It is a systematic, stylometric variance, a clear pattern reflecting different authors.

3.2. Indexed Data Dictionary: Vocal Strata Profiles

The following Indexed Data Dictionary tables provide a working platform to identify, unmask, disambiguate, and partition signature features of each vocal stratum.

There are seven major sections in the Indexed Data Dictionary:

IDD 1.1. Lemmata-Specific Features

IDD 1.2. General, Complex, and Compound Morphological and Syntactical Features

IDD 1.3. Discourse Analysis and Rhetorical Techniques

IDD 1.4. Thematic, Dramatic, and Literary Features

IDD 1.5. HB/LXX Intertexts

IDD 1.6. Ev Edition Texts Compared

IDD 1.7. Ev Edition Features Compared

To facilitate meaningful analysis and avoid duplicative data, element locations are indicated only for the earliest stratum within a given textual formation. For example, in IDD 1.1, the noun "enemy" / *ἐχθρός* occurs in Qn 6.27, but its presence in Lk1 6.27 and Lk2 6.27 is not indicated, because Lk1 is an expansion of Qn, while Lk2 is an expansion of Lk1. However, that term is indicated for Mt1 5.44, even though it is dependent on Qn 6.27, because Mt1 is the earliest stratum within the Matthean textual formation. The counts reflect the number of locations (i.e., verses) where the feature occurs, not the number of times a feature occurs. For example, a given lemma is sometimes used more than once in a given verse, but our analysis during the manual prototyping phase focuses on location and distribution, rather than density. The LXX counts in IDD 1.1 are based on BibleWorks lemma queries and sometimes include multiple Greek versions of HB/OT books (e.g., for Judges or Daniel) and works considered apocryphal in some Christian traditions (e.g., 1–4 Maccabees, Sirach, etc.). The NT column contains counts of all verse locations of a lemma in all NT texts excepting Gospel and Acts strata.

The Parts of Speech (POS) abbreviations follow the BibleWorks Greek Morphology (BGM) schema, which is openly licensed. It allows for validation of search results in BibleWorks or custom regex code by entering a search string against one lemma or multiple lemmata. Each element of the schema occupies a set location within a given sequence; we have numbered these respective positions below for the sake of clarity. Each option is represented by a single alphanumeric abbreviation dependent on its precursors and position within the sequence. In the BibleWorks program, question mark symbols (?) stand for "any code" and an asterisk (*) stands for "all following codes". In regex, `\w{1}` and `\w+` functions the same. For example, `ἀποκρίνομαι@vp??nf` in BibleWorks and `ἀποκρίνομαι@vp\w{2}nf` in regex queries all instances of the lemma "answer" / *ἀποκρίνομαι* that are participles in the nominative case and feminine gender, regardless of tense, voice, or number.

1. a (adjective)

2. n (normal) s (possessive) d (demonstrative) q (interrogative) i (indefinite) c (cardinal) o (ordinal) m (numeral) r (relative)

3. n (nominative) g (genitive) d (dative) a (accusative) v (vocative)

4. m (masculine) f (feminine) n (neuter)

5. s (singular) p (plural) d (dual)

6. c (comparative) s (superlative) n (no degree)

1. b (adverb)

1. c (conjunction)

2. c (coordinating) s (subordinating)

1. d (definite article)

2 (case). n (nominative) g (genitive) d (dative) a (accusative) v (vocative)

3 (gender). m (masculine) f (feminine) n (neuter)

4. (number). s (singular) p (plural) d (dual)

1. i (interjection)

1. n (noun)

2. (case). n (nominative) g (genitive) d (dative) a (accusative) v (vocative)

3. (gender). m (masculine) f (feminine) n (neuter)

4. (number). s (singular) p (plural) d (dual)

5. (type). p (proper) c (common)

1. p (prepositions)

2 (case). g (genitive) d (dative) a (accusative)

1. r (pronoun)

2. (type). p (personal) r (relative) d (demonstrative) q (interrogative) i (indefinite) t (intensive) x (reflexive) e (reciprocal) f (indefinite relative) g (correlative)

3. (case). n (nominative) g (genitive) d (dative) a (accusative) v (vocative)

4. (gender). m (masculine) f (feminine) n (neuter)

5. (number). s (singular) p (plural) d (dual)

1. v (verb)

2. (mood). i (indicative) s (subjunctive) o (optative) d (imperative) n (infinitive) (see below for participles)

3. (tense). p (present) i (imperfect) f (future) a (aorist) x (perfect) y (pluperfect) z (future perfect)

4. (voice). a (active) m (middle) p (passive) e (middle passive)

5. (person). 1 (1st) 2 (2nd) 3 (3rd)

6. (number). s (singular) p (plural) d (dual)

2. p (participle)

3. (tense). p (present) i (imperfect) f (future) a (aorist) x (perfect) y (pluperfect) z (future perfect)

4. (voice). a (active) m (middle) p (passive) e (middle passive)

5. (case). n (nominative) g (genitive) d (dative) a (accusative) v (vocative)

6. (gender). m (masculine) f (feminine) n (neuter)

7. (number). s (singular) p (plural) d (dual)

1. x (particle)

The recent surge of scholarly interest in Marcions *Gospel* has led to the production of several new reconstructions, namely those of BeDuhn in 2013/2023 (B), Roth in 2015 (R), Klinghardt in 2015/2020/2021 (K), and Nicolotti in 2019 (N), which stand alongside the classic reconstructions by Hahn in 1832 (H), Zahn in 1892 (Z), and Harnack in 1921/1924 (V), as well as that of Tsutsui in 1992 (Ts).² The Italian translation of Gramaglia in 2017 (G) is based on Klinghardts edition; while footnoting critical disagreements, it does not provide a self-standing, independent edition amenable to statistical analysis.³ Thus in this section we compare the major, mutually independent editions, including our own (M), to provide a panoramic view of the breadth of scholarship and a means of evaluating respective methodological assumptions and lenses. Our first set of tables simply lists editorial decisions about what verses are included or not included (whether UN = unattested or NP = not present).

² Hahn, "Evangelium Marcionis" (1832); Zahn, *Geschichte des neutestamentlichen Kanons* 2.2 (1892); Harnack, *Marcion: Das Evangelium vom Fremden Gott* (1924²); Tsutsui, "Das Evangeliums Marcions" (1992); BeDuhn, *First New Testament* (2013); Roth, *Text of Marcion's Gospel* (2015); Klinghardt, *Das älteste Evangelium* (2015/2020), trans. *The Oldest Gospel* (2021); Gianotto and Nicolotti, *Il Vangelo di Marcione* (2019). Since Tsutsui's edition is in Latin, we provide Greek word count estimates using a translation ratio of 1.082 based on the Vulgate having 18003 words compared to 19482 Greek words in the BibleWorks GNT4 Greek text canonical Luke. While my original exploratory data analysis used a course-grained word count conversion ratio of 0.77 Greek words for every English word in BeDuhn, the realization of our collaborative Greek reconstruction now allows for precise Greek word counts. Given that cross-language quantitative conversions are inherently imprecise, the findings below for Tsutsui should be taken with a grain of salt.

³ Gramaglia, *Marcione e il Vangelo (di Luca)* (2017).

3.3. Data Visualizations

For our first jump into visualizations, we start with a simple stylometric overview of author writing habits via graphs of Top Ten Lemmata for each of our compiled datasets. We should note that REv is our dataset based on Roth's critical edition of the *Gospel* of Marcion. The datasets are based on the respective editions of Harnack (#4338), Roth (#4169), CENP (#4024), CINP (#3879), Acts (#18451), and John (#15635). The top line for each table contains frequencies for each 100 words, while the second line contains raw word counts. Compared to Lk1/Ev, CENP and CINP have a significantly higher frequency of the lemmata "and" / *καί* and "in" / *ἐν* but a significantly lower frequency of the lemma "you" / *σύ*. CINP and Acts share a significantly higher frequency of the lemma "now" / *δέ*.

3.4. Signal Tabulations and Reports

See [our online spreadsheet](#) for the latest version. Feel free to copy it to start making your own signal tallies. We are presently reformatting this spreadsheet and are planning to publish an in-book update in a future version. Having completed signal transmission tagging for most of Lk1/Ev, we have a good sense of the overall patterns of signal transmissions. The "Summary Highlights of the Newly Reconstructed Third Gospel" section gives a brief interpretation of this tabulated data.

Tabulation of Signal Proximity Tags

Tabulation of Markan-Lukan Proximity Patterns

Lk1 Tags	Count 1	Lk2 Tags	Count 2	Difference
[Lk1:Mk1<Lk2]	29/78 (35.9%)	[Lk2:Mk1<Lk1]	37/78 (46.2%)	-8/78 (-10.3%)
[Lk1:Mk1>Lk2]	26/78 (33.3%)	[Lk2:Mk1>Lk1]	4/78 (3.8%)	23/78 (29.5%)
[Lk1:Mk1≈Lk2]	7/78 (9.0%)	[Lk2:Mk1≈Lk1]	1/78 (1.3%)	6 (7.7%)
[Lk1:Mk1=Lk2]	15/78 (19.2%)	[Lk2:Mk1=Lk1]	36/78 (44.9%)	-21 (-26.9%)

Nota bene: This section has not been significantly updated since the first few versions of this LODLIB were released back in July 2020, and it only covers Mk1, Lk1, and Mt1. A significant update should be forthcoming after the parallel sets and reconstruction are nearly complete.

For a robust evaluation of signal strength and echoing, we have to look simultaneously at 1) *the receptions of Mk1* and 2) *the sources of Mt1*, evaluating relative signal strength in both directions from both end-points: from Mk1 to both Lk1 and Mt1; and to Mt1 from both Mk1 and Lk1.

Our analysis ranks signals as either Strong, Weak, or Null. A rank of Strong indicates a dense and distinct cluster of words was clearly transmitted and received. Strong signals do not have to match completely or perfectly in content or word order. Each node has the freedom and capacity to adapt, re-sequence, unpack, compress, or ignore signals. It should also be clarified that for two receptions of the same signal to be ranked as Strong does not necessarily indicate equal strength, just that neither is absent or weak. Mk1 2:16, for example, is much more strongly received in Mt1 9.11 than in Lk1 5.30, but the latter still evidences a clear signal (a perfect sequence of five distinct words).

We also note the important distinction between first order (simple transmission and reception) and second order (direct and indirect transmission, or signal sending, retransmission, and receiving). On the one hand, a well-received and re-transmitted signal in the first wave can make it more difficult to gauge the actual source of the signal in the second wave, yet the signal itself is intact, whatever its source. For example, Mk1 1.44 was received clearly by Lk1 5.14 and by Matthew 8.4, yet because Mt1 apparently picked up a new distinctive element from Lk1 5.14 ("the gift"), it is difficult to tell whether Mt1 got the bulk of the Mk1 signal directly or secondarily as transmitted through Lk1. On the other hand, a weakly received signal in the first wave can make it nearly impossible to detect any propagation in the second wave. For example, the calling of the disciples in Mk1 1.16-18 is weakly received in Lk1 5.10, and this fuzziness made it difficult for that signal to resonate in Mt1 4.19, 21. A good question to ask oneself when gauging signal propagation is, "If the text of the original source went missing (in the above case, Mark), and all we could do was compare Ev to Matthew, would we still find a distinctive cluster of words clearly signaled between the two?" The answer to that question is signal propagation.

Our focus is thus to gauge the overall extent to which Lk1/Ev receives Mk1 tradition and to what extent it relays its own unique traditions (often slight or modest additions or transformations of Mk1 traditions) to Mt1. To put it differently, we aim to gauge the general extent to which Mt1 is not only a retelling of Mk1, but also a retelling of Lk1/Ev as itself an earlier retelling of Mk1.

Preliminary Inventory of Mk1—Lk1—Mt1 Signal Strength and Echo

[major update forthcoming after reconstructions complete; SINPO ratings might be applied to tags]

Total signal transmissions by Mk1 in this evaluation: 38

Summary of Mk1—Lk1—Mt1 Signal Strength and Propagation

	Mk1 Signal Transmission		Mt1 Signal Reception	
	Lk1	Mt1	Mk1	Lk1
Strong	23 (60%)	24 (63%)	26 (68%)	17 (45%)
Weak	14 (39%)	6 (16%)	6 (16%)	8 (21%)
Null	1 (3%)	8 (21%)	6 (16%)	13 (34%)

Initial Tally of Mk1—Lk1—Mt1 Signal Strength and Propagation

Stronger signal reception of Mk1: Lk1 15 (39%) vs. Mt1 22 (58%) vs. Null 1 (3%)

Stronger signal reception by Mt1: Mk1 27 (71%) vs. Lk1 4 (11%) vs. Equal 1 (3%) vs. Null 6 (16%)

A flat comparison of the Mk1 signal evidence in Mt1 and that obtainable from Lk1 as it exists is the *least generous way* of interpreting the data, all because of the phenomenon that we call Early-orthodox Signal Degradation (hereafter ESD). There was, in fact, significant signal degradation of Lk1 between its composition (80s CE) and its attestation (late 2nd century and after) both from the active early-orthodox suppression of the text and the Marcionite movement, as well from unclear or partial attestation of the text by its opponents/witnesses.

Initial Conclusions about Mk1—Lk1—Mt1 Signal Strength and Propagation

Conclusion 1.1. Regarding Mk1 signal transmission, Lk1 is almost as apt as Mt1 (60% vs. 63%) to pick up strong signals, i.e., Lk1/Ev and Mt1 both copy Mk1 quite closely. Given ESD, it is also reasonable that the Lk1 percentage of strong signals was actually much higher than Mt1. The lack of strong signals in Lk1 comes from evidentiary gaps, not from a deliberate redactional program, as in Mt1.

Conclusion 1.2. Regarding Mk1 signal transmission, Lk1 is considerably more apt than Mt1 to receive a weak signal (39% vs. 16%); i.e., either Mt1 is more precise and careful when copying Mk1 than Lk1 is, or—more likely in view of ESD—they are closer to equal in this respect.

Conclusion 1.3. Regarding Mk1 signal transmission, Mt1 is much more apt than Lk1 to get a null signal (21% vs. 3%); i.e., Mt1 does not often silence Mk1, but Lk1 almost never silences Mk1. This fits perfectly with the two ESD-related conclusions above. Whenever we have robust, reliable attestation of Lk1, it almost always stays extremely close to its source.

Conclusion 1.4. Regarding Mk1 signal transmission, even though Lk1 typically gets a strong signal, most of the time Mt1 gets a *stronger* signal than Lk1 gets (58% vs. 39%); i.e., Mt1 is a better listener or copier than Lk1, at least when he is paying attention. However, ESD suggests that a completely attested Lk1 would do much better here: perhaps going back and forth 50%-50% with Mt1, or, more likely besting Mt1 (e.g., 60%-40%).

Conclusion 1.5. Regarding Mt1 signal reception, Mk1 is considerably more apt than Lk1 to have a strong signal match (68% vs. 45%). Given signal propagation and echoing, it is not always clear if Mt1 gets the Mk1 signal firsthand (direct from Mk1) or secondhand (from Mk1 through Lk1), but it is clear that Mt1 is typically tuned into Mk1 more than into Lk1; i.e., Mt1 is copying directly from Mk1, not just copying Lk1 where Lk1 is itself copying Mk1.

Conclusion 1.6. Regarding Mt1 signal reception, Mk1 and Lk1 are almost equally apt to have transmitted a weak signal (16% vs. 21%), but that certainly is the exception. When Mt1 uses sources, they are signaled clearly; i.e., Mt1 does not do shoddy copy work. The effect of ESD is a complete toss-up here. We simply cannot speculate on how the signals degraded or destroyed in Lk1 might or might not have been received in Mt1.

Conclusion 1.7. Regarding Mt1 signal reception, Lk1 is more than twice as likely to yield a null reception as Mk1 is (34% vs. 16%). Mt1 apparently feels more free to ignore the Mk1 signals relayed through Lk1 than the signals coming directly from Mk1; i.e., for Mk1 traditions, Mt1 does not feel a compelling need to copy the parallel traditions in Lk1.

Conclusion 1.8. Regarding Mt1 signal reception, Mk1 is far more often the stronger signal source than Lk1 is (71% vs. 11%). Mt1 is much more likely to get a better signal from Mk1 than from Lk1, even in resonant signals; i.e., Mt1 knows that it is far preferable to get Mk1 traditions directly from Mk1, not through Lk1 as intermediary. ESD could account for some shift here, but even a fully intact Lk1 would not alter the basic imbalance here. Mt1 has a strong tendency to use Mk1 directly, not as mediated through Lk1.

Conclusion 1.9. Regarding Mt1 signal reception, 11% of the time from Lk1 is still significant! Roughly one out of every nine signals shows Mt1 receiving a clearer, more distinctive signal from Lk1; i.e., occasionally Lk1 did some great redactional work to Mk1, and Mt1 wants to borrow that. This 11% is even more astonishing when considering ESD. There would only be upside for Lk1 if its own text were better attested.

Conclusion 1.10. Whether with or without this statistical analysis, a cursory glance or close inspection at the inventory shows that, in terms of order, Lk1 is working straight through Mk1, copying the narrative in almost perfect sequence. Mt1, however, rotates the sequence significantly. The signal analysis confirms that this is deliberate on the part of both receivers.

After that super-technical analysis that our engineers loved, let's spin up a modern acoustical parable for the general reader. Lk1 is like a radio listener tuned into a single station. He loves singing whatever songs were queued (marked? Qd?). But sometimes Lk1 does not get the words exactly right. He never stops and rewinds and replays bits to practice to ensure he got most of the words right. To spin it differently, Lk1 is listening to Mk1 on vinyl for a good while. The sound and fidelity is clear, but he is listening to an album that is still somewhat new to him, so he can't sing every word and doesn't quite know what all his favorites parts are.

Mt1, however, is like a radio listener who likes to change stations, but when he sings along, he knows the words really well. He definitely stops to rewind and replay bits to practice and make sure he got them right. To put it differently, Mt1 is not listening to vinyl. He has a well-curated favorites playlist, an ancient iPod, as it were, that lets him play his favorite songs in the order he prefers. Sometimes his playlist has a few songs that run parallel to the album's order, but typically the order is more shuffled.

So what? So what that Mt1 and Lk1 were two different people with two different ways of listening to this ancient Gospel music, as it were? Well, we know clearly now that they were both listening to the same music: Mk1—that's now obvious and very important. What was not clear until now is that Mt1 knows that Lk1 has been singing the Mk1 gospel music, and *sometimes*, Mt1 sings a bit of a Mk1 gospel song in the same unique style Lk1 did.

ESD can add another layer to our metaphor. We have shown that Lk1 is listening to Mk1 on vinyl, but the sad part is that *we, as modern scholars*, are listening to a significantly degraded recording of Lk1 who had been listening to Mk1 on vinyl. It looks like some of the degradation is the passage of time or neglect, but some of it also appears to be a deliberate effort to destroy the recording that was Lk1. Reconstruction of most of the underlying recording is possible, but it is going to take some scientific specialists in preservation and reconstruction techniques and perhaps also some advanced machine-analysis to achieve a satisfactory reconstruction.

Let's trace another parable, this one about Lk1 and Mt1 as students who take lecture notes differently in class, even though, in this age of Zoom classes, it might not seem as relevant. While Lk1 and Mt1 are both listening to the same Mk1 lecture, Mt1 is the hyper-diligent student who takes great notes, almost always directly from the professor, but *sometimes* (being hyper-diligent) Mt1 copies notes from Lk1 when he thinks Lk1 really summarizes or restates the concept well. Over-achievers are so annoying sometimes.

And to add ESD again, the notes of Lk1 have not been well preserved and have suffered decay over time, and it looks like some intentional erasures have been made. While we have enough of the scraps of Lk1 to reconstruct *most* of the original notes, we are going to have to examine the notes of Mt1 as well as other students who also copied Lk1, i.e., Jn1, Jn2, and Lk2. Looks like most if not all of these students were taking notes straight from Mk1 as the professor, and *also* that they had all taken notes from the earlier class session taught by Professor Qn. Reconstructing Lk1 and Qn at the same time! Now this is getting really interesting!

But back to our radio DJ job. Let's take it from the top now.

Wide-Scale Signal Inventory of Mk1-Lk1-Matt-Lk2: Table 1

<i>SQE</i> . Shorthand	Mk1	Lk1	Mt1	Lk2
Date	75-80	80s	90s	117-138
A001. Prologue	X	Not present (see 3.1)	X	X
A002. Birth of John foretold	-----	Not present	-----	X
A003. Annunciation	-----	Not present	-----	X
A004. Visitation	-----	Not present	-----	X
A005. Birth of John	-----	Not present	-----	X
A007. Nativity	-----	Not present	X	X
A008. Adoration of infant Jesus	-----	Not present	X	X
A013b. John introduced	X	Not present	X	X
A014. John preaches repentance	-----	Not present	X	X
A015. John's protreptic	-----	Not present	-----	X
A016. John's messianic message	X	Not present	X	X
A019. Genealogy	-----	Not present	X (A006)	X
A018. Baptism	X	Not present	X	X
A020. Desert flight	X	Not present	X	X
A030. Journey into Galilee	X	Unattested	X	X
A032. Ministry in Galilee	X	Unattested	X	X
A033. Escaping Nazareth	-----	X	-----	X
A034. Disciples called (Mk1 vers.)	X	Not present (see A041)	X	X
A035. Capernaum lesson	X	X	X	X
A036. Synagogue demoniac	X	X	-----	X
A037. Peter's in-law healed	X	Unattested	X	X
A038. Sick healed	X	X	X	X
A039. Leaving Capernaum	X	X	-----	X
A040. Preaching tour	X	Unattested	X	X
A041. Miraculous catch (Lk2 vers)	-----	X	-----	X
A042. Leper(s) cleansed	X	X	X	X
A043. Healing of paralytic	X	X	X	X
A044. Tax collector called	X	X	X	X
A045. Question about fasting	X	X	X	X
A046. Grain-plucking	X	X	X	X
A047. Withered hand	X	X	X	X
A049. Twelve chosen	X	X	X	X
A050/048/077. Sermon setting	X	X	X	X

The synoptic song selection chart we provided at the beginning is here repurposed. We take the list back to the beginning of Luke, take out the verse numbers, add a column for Lk2, follow the Lukan order while including all Mk1 passages, and add all synoptic parallels corresponding to Mark and Lk2 up to the point we have covered so far in our analysis (up to Lk1 6.20).

It is striking that, for someone who listens to Mk1 so devotedly, consistently, and sequentially, Lk1 skips right over the first several minutes of the Mk1 album: the introduction of John the Baptist, preaching by John, baptism of Jesus, and the desert flight [or temptation] of Jesus. Still, there is obviously a pattern here, one that we thoroughly established above. Lk1 sticks with the Mk1 content and order in 12 passages. Only 2 passages are entirely unattested. The one place where a Mk1 passage seems to have been relocated in Lk1 is the call of the disciples (A034), which is present and retold later in the narrative apparently as a simpler and shorter version of the miraculous catch of fish in Luke 5.1-11. This relocation is far better explained as an effort by LkR1 to have Jesus call the disciples after his teaching and healing ministry had started, inviting the disciples to join in, rather than Lk1 reproducing Luke 5.1-11 in a piecemeal fashion.

And for someone whom scholars have typically assumed was copying from Lk2, Lk1 is missing a full half hour of the Lukan album, not just the Mk1 tracks found in Luke, but even the unique Lukan tracks: the foretelling of John's birth, annunciation, visitation, birth of John, Nativity, adoration, John's sermon to tax collectors, and even the special Lukan remix of the desert flight. Unattested Lukan tracks include the journey to Galilee, ministry in Galilee, healing of Peter's mother-in-law, and first preaching tour in Galilee. Admittedly, we want to be cautious not to base a claim primarily on the unattested passages, given that they simply might not have caught the attention of Marcion's detractors. But again, there is obviously a pattern of neglect.

Marcion's detractors chalked all this missing material—both from Mark and Luke—to Marcion being a bad, bad anti-Jewish heretic. Marcion, you see, didn't like John the Baptist, even though John shows up in Lk1 7.24, 26-28 and is lauded by Jesus in excessive terms. And Marcion really didn't like Peter, even though Peter's famous confession shows up in Lk1 9.18-21.

Occam's razor would lead us to a far simpler and cleaner interpretation of this evidence: Lk1 simply did not use Lk2. More than that, the otherwise very strange, extended neglect of Mk1 introductory materials in Lk1 comes about because Ev /Lk1 is equally faithful to its second source: Qn. Let's turn there next.

Now we proceed to a signal strength and propagation report for Qn vis-à-vis Mt1 and Lk2. To make our rankings, we exclude words from Mt1 and Lk2 when those words could have been composed first by Mt1 and then transmitted to Lk2. Q 6.23 // Mt1 5.12 is a good example of this.

Qn (65–69) Lk1 (80s)

6.23. κατὰ [ταῦτα οἱ τὰ αὐτὰ] ἐποιοῦν τοῖς προφήταις οἱ πατέρες αὐτῶν.

Mt1 (90s)

5.12. χαίρετε καὶ ἀγαλλιᾶσθε, ὅτι ὁ μισθὸς ὑμῶν πολὺς ἐν τοῖς οὐρανοῖς· οὕτως γὰρ ἐδίωξαν τοὺς προφήτας τοὺς πρὸ ὑμῶν.

Lk2 (117–138)

6.23. χάρητε ἐν ἐκείνῃ τῇ ἡμέρᾳ καὶ σκιρτήσατε, ἰδοὺ γὰρ ὁ μισθὸς ὑμῶν πολὺς ἐν τῷ οὐρανῷ· κατὰ τὰ αὐτὰ γὰρ ἐποιοῦν τοῖς προφήταις οἱ πατέρες αὐτῶν.

In our judgment, this should still count as Ev 6.23 being ranked "Strong", both because it has a definite cluster or string of words, and because that word cluster is reproduced quite clearly in Lk2, even though Lk2 has additional materials not found in Lk1 but found in Mt1.

We also do not downgrade the rating for a verse of Ev for a cluster of words missing from its text but present in Lk2 when those words are reasonably adjudged to be redactions to Lk2. A good example of this is Q 6.27.

Qn (65–69) Lk1 (80s)

6.27. Ἀλλὰ ὑμῖν λέγω τοῖς ἀκούουσιν· ἀγαπάτε τοὺς ἐχθροὺς ὑμῶν,

Mt1 (90s)

Lk2 (117–138)

6.27. Ἀλλὰ ὑμῖν λέγω τοῖς ἀκούουσιν· ἀγαπάτε τοὺς ἐχθροὺς ὑμῶν, καλῶς ποιεῖτε τοῖς μισοῦσιν ὑμᾶς,

Again, in our judgment, this should still count as Lk2 6.27 being ranked "Strong", since Lk2 has a substantive amount of Lk1 words and the last phrase in Lk2 6.27, "do good to those who hate you", is reasonably understood to be a LkR2 redaction. Besides evaluating the signal strength for each reception, we also seek to evaluate which reception is the closer to the original source of the signal.

Qn	Mt1 Signal	Lk2 Signal	Closest
6.20b	Strong	Strong	Lk2
6.21a	Strong	Strong	Mt1
6.21b	Strong	Strong	Lk2
6.22	Strong	Strong	Lk2
6.23	Weak	Strong	Lk2
6.27	Null	Strong	Lk2
6.28	Null	Strong	Lk2
6.29	Strong	Strong	Lk2
6.30a	Strong	Strong	Lk2
6.31	Strong	Strong	Mt1
6.34	Null	Strong	Lk2
6.35	Null	Strong	Lk2
6.36	Strong	Strong	Lk2
