Agenda

- What are OpenAlex and VIVO?
- What do we want to do with VIVO?
 - CRIS with open research information
 - how does this help the community
- What do we need from the community, what can you expect?

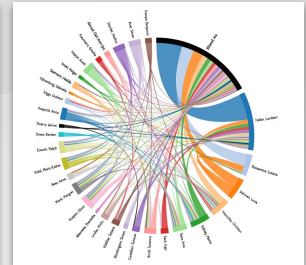

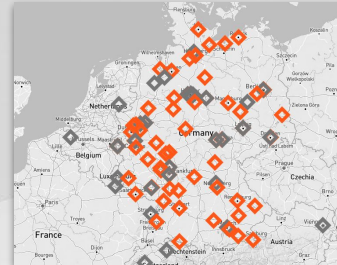

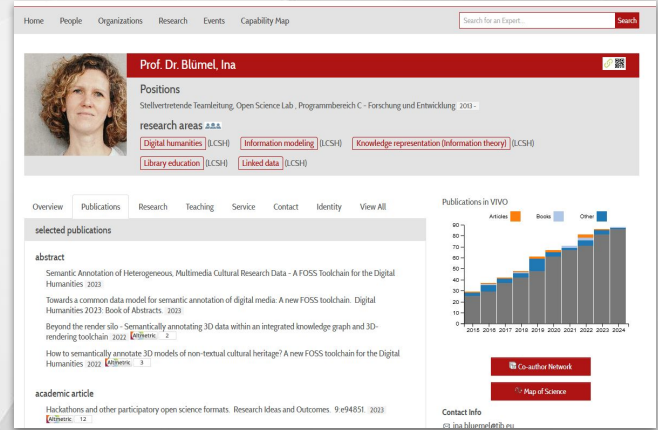

OpenAlex

- open map of global research ecosystem
- metadata “new oil” → “new water”
- collaborating to deliver for our user communities in the transition to open research information

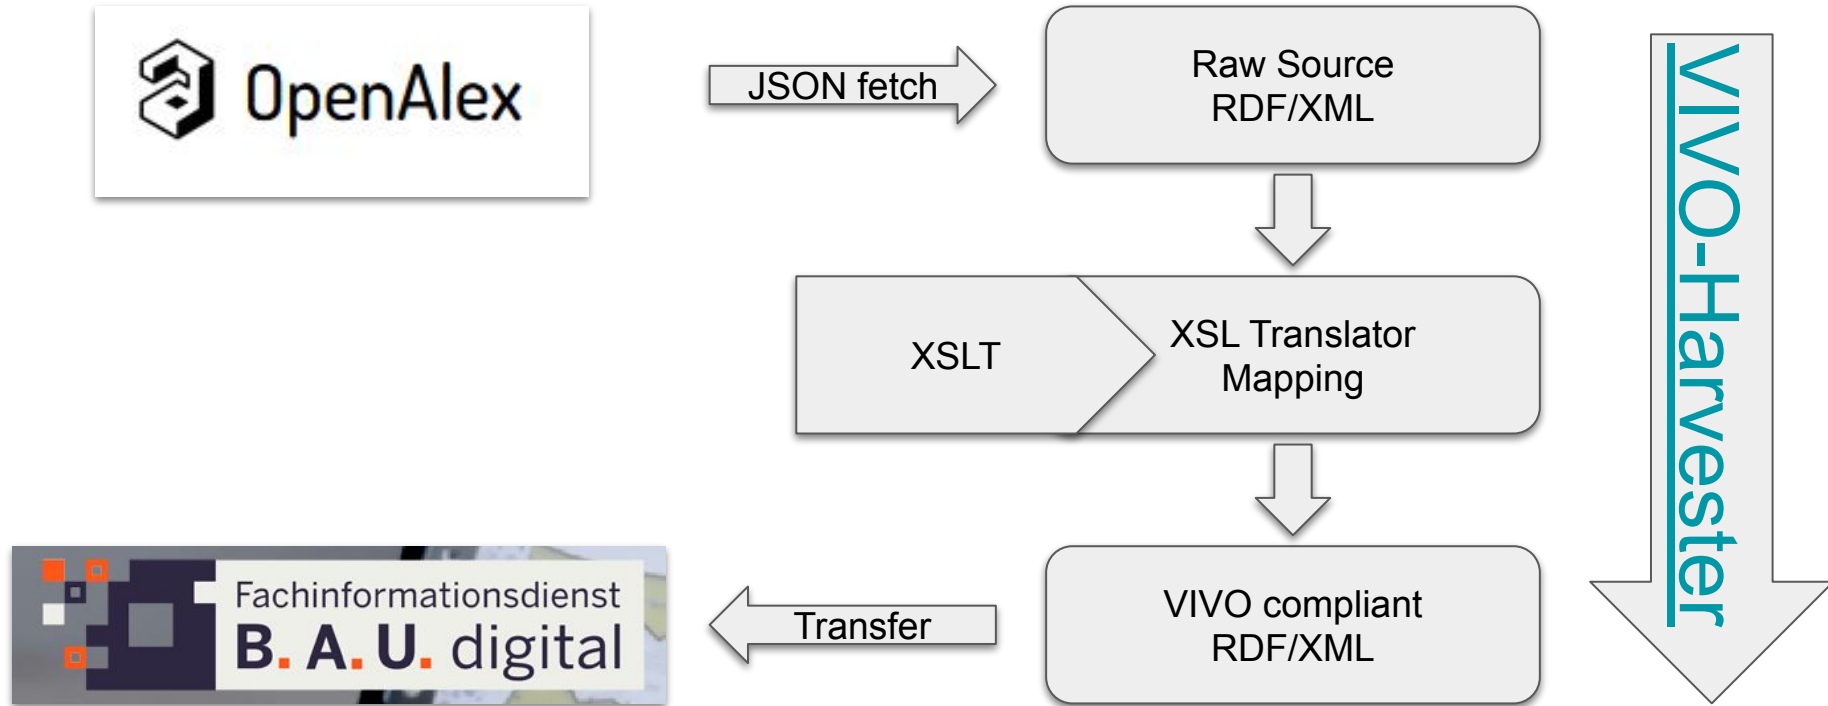

VIVO - a knowledge graph of research information

- Open Source research information system
- linked data / knowledge graph powered
- rich ontology
- established, active community
- features include
 - profiles for persons, organisations, publications etc.
 - customizable data model
 - visualizations & reports
 - proof of concept for import of open research information from i.a. ConfIDent, Pubmed, and OpenAlex

Open Source for Open Research Information!

Forschungsatlas - metadata from OpenAlex to VIVO

Benefits of OD in OS-CRIS

- data sovereignty / data reuse
- cost savings
- increased efficiency / time saving by mutual benefits from contributing to the open research information commons
- avoid vendor lock-in
- broader impact for research outcomes / better opportunities for knowledge transfer and disseminations
- more inclusive data sources
