FAIR-IMPACT overall objective

WHAT:

FAIR-IMPACT supports the implementation of FAIR-enabling practices, tools and services,

- across scientific communities
 - across research outputs
 - at a European, national, and institutional level
-
- ★ *Identification of FAIR-enabling components (domain-specific => across domains)*
 - ★ *Coordination and support mechanisms for adoption, implementation and raising awareness*

FAIR-IMPACT project design

FAIR-IMPACT PROJECT DESIGN - WORK PACKAGES

Practical implementation of the FAIR principles starting with integrated use cases on four scientific domains

Social Sciences and Humanities
The F-UJI tool will be adapted to fit SSH relevant community standards for FAIR

Photon & Neutron science
A range of components for cross-domain research data description will be tested

Life science
Data provenance will be better documented by extending RO-Crate to practices on PID usage

Agri-food
Metadata providers will implement a common API for federating access to semantic artefacts

Where are we now:

- Final year of the project => ending in May 2025
- So far: 11 Deliverables, 40 Milestones + other materials (use cases, event materials, opinions, responses to EOSC TF papers, etc.)
+updated website view
- 2nd policy brief: <https://doi.org/10.5281/zenodo.13348297>
- Collaborations with other EU funded projects in EOSC and FAIR landscape
- More focus on sustainability
- Active in relevant events and activities

Engagement and support provided so far

- 32 teams joined the 1st round of financial support actions (Sept-Nov 2023)
- 30 teams currently in three in-kind support programmes (Jan-Oct 2024). Second running of programmes starts this month.
- 59 teams joined the 2nd round of financial support actions (May-Oct 2024)
- 944 registered participants for our FAIR Implementation Workshops series which are free and open to anyone

121 teams of 285 participants supported through financial and in-kind support

Final open call for financial support is **OPEN** until **December 4th**

Exposing repository information to foster connections and trust: evaluating and implementing guidelines [Poster]

Dillo, Ingrid; Ulrich, Robert; Huber, Robert; and 10 others

FAIR-IMPACT is developing guidelines and a prototype to expose relevant information as metadata to facilitate discovery, provide context, support interoperability, and create a sense of trust in service providers and the services they offer. Transparent and linked information between objects, the repositories that hold or interact with them, and...

FAIR-IMPACT EOSC Policy Brief for FAIR-IMPACT_V2.0

Kalaizti, Vasso; Dillo, Ingrid; Ashley, Kevin; and 12 others

FAIR-IMPACT has the ambitious goal of realising an EOSC of FAIR data and services by supporting the implementation of FAIR-enabling practices, tools and services across scientific communities and at national, European and institutional level. The project places its focus on persistent identifiers (WP3), metadata and ontologies (WP4) metrics, gui...
