

## SHIFTING MEANING FOR A MEANINGLESS EVERYTHING INTO THE 5000-YEAR-OLD WAR PARADIGM

### THE PHYSICS OF MATHEMATICS & PHYSICS OF MARKETING AT BILDUNG

#### A NEW TWIST BREAKTHROUGH: THE NEW MATHEMATICS FOR ELEMENTARY PHYSICS

Gerhard Ris former lawyer and magistrate with thirty years of experience in courts of law

#### Inverse final statements

- Science Starts with Descartes & Discarding Descartes
- The proper scientific procedure for starting with inverse final statements is as long as needed and as short as possible.
- Flying an aircraft in an emergency is also scientific in science proper.
- Producing proper science requires a multi-majority consensus in eight departments of the collective instrument brain, which can be achieved by following its now-available Train Your Intuitive Brain instruction manual the One Law of Human Nature.
- Teaching Empowerment White Magic Illusionism alas also teaches Black Magic illusionism
- Being Empowered by White or Black Magic Illusionism has immediate rewards
- Deciding to do the proposed Oracle Senate Test by any oligarch such as the Dutch Research Council NWO will instantly shift the paradigm, producing peace and prosperity for all and especially benefiting NATO.
- Homo Sapiens hasn't even lived for one galactic year and is nearing extinction playing with nukes.
- The One Law of Human Nature proves that most mathematicians and physicists are, as a genotype, deep idiots at more than average complex geometry. Yet they have oligarch power in science via improper peer review. They use computers to fraudulently claim to be the best at complex geometry because they are indeed best at computing.
- The current paradigm procedure requires naming, shaming, and ridiculing NWO for failing the improved Elementary Scientist Exam as science proper.
- This can best be done by other than Dutch scientists who aren't dependent on funding from NWO because the effect is global.
- NWO thus isn't certified as a reliable source for funding Elementary Science and Education like Dada Easter Bunny.
- Current science incorrectly doesn't accept humour and relativism as a per definition essential part of the marketing, advertisement, and sales of science. Current science demands autistic deadly serious tediously dull conscientiousness a deadly sin in artistic R&D.
- Current science and NWO don't have a definition of science or pseudo-science other than oligarchs of science peer review deem to be scientific. This falsifies current science on elementary issues.
- NWO is most guilty of the mainstream woke madness in most universities which is antifeminism, racist slaveholding egotrip of gender-neutral female logic better seen as sales management/ HRM hypnotic relation manipulation. A Bayesian inversion of the synapse in the instrument brain. Needing to keep antifeminism, racism, and slavery going because otherwise losing their meaning in life.
- NWO is also most guilty of the anti-scientific polarisation against science and scientists in society as a reaction to the actions of wokeism.
- NWO primarily caused the serious intended cuts in science and education in the Netherlands.
- NWO is a representative of the greatest bosses of god delusion of the god that doesn't listen.

- NWO represents a criminally insane personality cult that for 5000 years has successfully built ever better “unsinkable” Titanics and sunk them in the same peat-burn-like genocidal iceberg scenario.
- When you do the same the same happens.
- The Oracle Senate Test is akin to the first flight of a prototype exclusively built out of successfully tested parts.
- The New Secretary General of NATO nearly decided to do the then still too taboo even for PM Mr. Teflon's radical plan for new governance Oracle Senate Test by an emergency law in the Omtzigt affaire.
- More than 99.9% of Old School tried and tested Sun Tzu's Art of War to never corner one's opponent and always build them a Golden Bridge way out.
- Save Our Mighty Billionaires and all other oligarchs like NWO!
- The cosmos/ everything is proven on the beginning of absolute proof in the reductio ad absurdum that our instrument brain thinks in an everything not only nothing and observes One Law of Nature that is absolute without contradictions including loopholes by far proven best practice circumstantial evidence proof with only data pro and absolutely no data con in all of several fields DOI published in proper peer review with access to all the raw data. Completely theorem based on what all the science was in, ages ago only requiring a few new easy twists to solve. The validation rises every time no valid opposition is met on the inherently circular argument claim that workability (werkelijkheid in Dutch) is an infinite topology of truths and infinite realities that only seemingly ever contradict in one of infinite parallel and in-line Nirvana movie scenario compositions achieving very practical workability (werkbaarheid in Dutch)
- Everything of the deterministic meaningless cosmos has infinite separate elements of classical mechanical Euclidian 3D geometry mass atomos movable connections that interact akin to snowballs in one 3D Euclidian empty space ether. The observed absence of evidence only leaves room for illegal unreasonable doubt on the correct definition of science which is further improved in this article. The 3rd law of everything as an undividable part of the ten dualistic laws of one law of nature dictates the scientific goal by one law of human nature the decent survival of homo sapiens that life has meaning and free will. The cosmos is both quantified and continuous at the same time in infinite time. Time is a thought and a thought is interactive moving timeless mass. Mass is internally absolutely motionless and thus can not be described by the notion of time. Mass is lifeless. Mass produces matter in a proto-DNA waving life non-waving proto-death cycle. Internal waves are proto-DNA consciousness memory bank of intelligent action is intelligent reaction infinite past moving toward an infinite future.
- Homo sapiens are proven to be robots that must inherently religiously believe not to be robots to hedge the bets on the goal of decent survival. The easiest to detect is the 1/64 specific sort of genotype of anyone which is also the greatest predictor of human behavior. In decreasing predictive order on behavior, the model proves phenotype (deeply religious), religious type, hypnotic (slightly religious)type, and unique type that all must be taken into account. This can only be done by the well-trained brain in an intuitive brain as part of a team with Bildung.
- The model proves that bashing opens a new market in litigation. This should be done via advertisement and sales techniques. This can only be achieved by any oligarch like NWO. NWO is in the know and is thus the easiest prey. Observe the thumbnails as the posters that

science proper demands at the end of this article. These are a startup of the classes that as remedial teaching should be given in universities because they weren't given in high school.

#### RECAP EXCERPT DOI PUBLICATIONS

Add this trial and erratum to my last publication first off a recap of the One Law of Human Nature that derives from the One Law of Nature as published. <https://doi.org/10.5281/zenodo.12156077>

Thus, I practice what I preach as a 1/125 DNA talented developer in R&D and an average performer in marketing. Doing my job as an experienced litigator by failed humour attempt as the advocate of the devil bashing the proven current science cult via what I named the Mars algorithm opens via the Venus algorithm a new market in a proven sick science anti-market of the anti-religion religion in denial not grasping the physics of religion as neurologically internalized hypnotics on the two Saturnus algorithms as a suicidal survival trait of the species homo sapiens. Saturnus is internalized, administered in-the-set-theory-box, and proven \* *interpreted* \* Mars & Venus tested out-of-the-set-theory box results. It is very much okay when it stays fit with the ever-changing mounting entropy of the cosmos. Yet authority is an egotrip that seriously spun out of control nigh 5000 years ago. Mathematics is a tool to prevent inconsistencies which are per definition conflicts leading to sinister suicidal wars leading to premature extinction. Only now solvable via coupling the existing eight departments of any cooperation to the existing eight proto black hole gluons and eight personality types and male-female four speeds of the instrument brain giving the instruction manual to mostly do-it-yourself train the individual brain and organize the collective instrument brain in the Cinque Politica improvement of the Trias Politica that every individual has the power to help to achieve peace and prosperity in their lifetime safely. Akin to Newton in his case falsely claimed to have been inspired by a falling apple I was truthfully inspired first Big Five assessment psychology the eight fields of a chessboard using it as props for a YouTube video years ago as I saw it then. Ultimately this led to the block model as the fourth law of everything as a 3D Euclidean geometry theorem deduced from only one axiomatic assumption of one consistent cosmos. A 'conditio sine qua non' for any proper scientific claim. Common sense high school level common knowledge in several fields of science via successfully tested reverse engineering taking artistic liberties in educated guesses of the prepared mind. Following the correct R&D algorithm in filling in the unknown by first shutting up and painting the whole picture with testable implications, then testing and with the results in the don't shut up but talk to your instrument brain and those of your team with Bildung and only then shut up and calculate and then repeat this proper scientific process ad infinitum. An infinite Nirvanas cycle both parallel and in line akin to infinite movies that can be split into ever shorter films by correctly framing in the correct set theory boxes. This requires the inherently out-of-the-box artistically creative seemingly magic talent of the easy-to-recognize when using clear resounding ironically humoured voices of 20% ADHD loss of emotional control types composing the testable Bayesian scenarios in a timely fashion. Only this artistic idiocy in in-the-box issues requires gender-neutral male idiocy potentially highly gifted only in production and gender-neutral female idiocy only potentially highly gifted in sales in the four complexity levels to stay fit with the cosmos or go extinct. A dirty little secret earning model of desire in current psychology is being seen as a dirty whistleblower when exposing such. The inherent oligarchs of science use incorrect peer review as a personality cult to remain the greatest boss of god power to deem what is worth being funded as science and what is pseudo-science. As Science in Transition proved the war of the oligarchs in science is akin to the positions in the trenches in World War One. This model proves that the correlation is the causation of

the continuation of the 5000-Year War of the Oligarchs of criminally insane Sinister Science. Because of the practical impossibility of declaring Earth as an asylum for the criminally insane following a route that also trains some criminals to be even better criminals is unavoidable because NWO by email reaction in legal litigation refuses to do their job on the social contract with humanity.

#### BETER BILDUNG

Akin to solving a mass murder case Mother Nature's fingerprint is on the mass murder weapon mass. Not everyone or even every scientist is aware that matter is stuff that per definition has gravity and also that it has mass. Interactively moving mass is indeed in this model always to a degree both potential and kinetic energy. Matter in current science should be seen as a magical mass being pushed by angels. Current science fraudulently claims that mathematics and the observations admittedly weirdly enough show the existence of massless particles an absurd error in reasoning akin to reasoning that bank fraud is a profitable best practice.

The reference to the book by David A. Schum which I reviewed in the Elementary List shows how to properly reason probabilistically to engineers using murder cases as examples. This is/ should be seen as simply common sense old-school common knowledge which isn't current mainstream science. It however gains traction even when a billionaire thanks to I guess Bayesian statistical reasoning wasn't aware that all decent reasoning is Bayesian probabilistic reasoning. This billionaire and his shipbuilder most probably weren't thinking and acting consistent with common knowledge among naval engineers unless wanting to build a claimed unsinkable Titanic. I don't want to go down this rabbit hole other than to point out the marked difference between Bayesian all-encompassing probabilistic reasoning and its subset of Bayesian statistics.

#### THE WORDINESS OF SLOW EXACT SCIENCE vs. FAST EXACT SCIENCE

Forget the soft versus exact science distinction. All proper science is per definition an exact and reproducible procedure. The resulting acceptable error rate in applied science is irrelevant in elementary science. Per definition, elementary science has no error rate showing only data pro and no con in all fields in proper scientific peer review.

When done correctly following the One Law of Nature and the derived One Law of Human Nature the truth will slowly always out in due time and when done incorrectly in undue time.

In law, as Crime Scene Investigation (CSI) is done correctly you need to distinguish in a mass murder case:

Quick and dirty because as an illustration. (See the Elementary List for a far more elaborate explanation.) :

No idea: i.e. no data deemed relevant to be taken into evidence to prove any probandum on any crime.

Proven idea for further investigation warranting time and money to do so of a crime being committed.

Proven suspect of a serious enough crime to warrant certain infringements of their normal rights such as being taken into custody for questioning.

Proven serious suspect warranting longer detention.

Proven guilty as culprit suspect still not definitively due to appeal. Etc.

Ultimately a definitive proven guilty culprit who always has based on nova (new evidence with certain restrictions) can get a review.

In a science that per logical definition should always be exact the delusion of it being more exact than CSI or even faster is easily shown. The so-called exact versus soft sciences can both render fast and slow results.

I will place the claim here and in a later article \* to further \* prove that Lucy Letby is exact-scientifically already proven innocent based on what she wrote feeling guilty sec. I'm not stating anything pro or con to the fact that her actions or decisions might have caused any deaths. (Even though I can.) I only state that such notes are solid evidence of no intentional crime but quite the opposite. You can compare this as inverse evidence akin to the fingerprint on a crime scene given certain circumstances are proof of a very probable culprit. I start explaining proper reasoning is the same in criminal cases as in quantum physics on YouTube concerning the Deventer Murder case, which should be akin to a bloody well kicking in an open door.

NB1. Because at the time of writing this, the Lucy Letby murder case is very much in the news and the only relevance here is the claim to make a point clear this tangent doesn't require a footnote. That certain idiots demand them to go down such rabbit holes immediately isn't a reason not to use this line of reasoning other than to bash idiots who demand to always go down any rabbit hole all the time and every time in the honest \* yet idiotic \* belief that it isn't scientific otherwise. The only thing such idiots need to learn \* ultimately via bashing \* understand is that the idiot is an idiot and what sort of an idiot and to recognize the other sorts of potentially highly gifted idiots. Highly gifted potential teammates on those topics in which you are an inherent unlearnable idiot. Mind, everyone is or was potentially highly gifted in certain essential areas. As a teaser as a genotype in the metaphor for communicating with other sorts of idiots quantum mechanically I was born a Volt meter. This is the greatest predictor of my performance on electricity issues. Also, my phenotype, religious type, current hypnotic type, and unique attention focus are on this sort of litigation case. I measure a high Voltage on innocence on this specific evidence within a nanosecond. The sales department of Humanity measures a high amperage of guilt that is irrelevant in litigation and expert litigation. Stressing the biological genotype via metaphor I'm a wolf catching prey in the dark wolf forest and the case is not on the communication rock where the mountain goats reign. When you haven't correctly learned to (in wordiness) exact scientifically distinguish Volt from Amp meters or mountain goats from wolves and cliffs from forests you are heading for disaster. That I'm an idiot expert litigator is offset by the fact that I'm highly experienced in this field (forest). Strong Amp and at the same time average Volt meters require a rigorously detailed analysis before accepting the data as strong evidence of innocence. In casu this was done by some and only then accepted as evidence by others. That's too late when they've learned to accept the Voltage measurement from the strong Voltmeter (weak amp meter) which I can prove to have done before taking notice of the more detailed scrutiny of that evidence. My Voltmeter proof is objectively reproducible and can independently be checked by other easy-to-learn to detect by all other Voltmeters. When you haven't as a matter of course learned to distinguish flawlessly between Volt and Amp meter personality genotypes you will get burnout.

NB2 That in criminal law cases a minimum error of 1/2000 is possible doesn't falsify the claim of an exact science because the latter only concerns the exact scientific registration proving to have followed the One Law of Human Nature and thus One Law of Nature. That scientists indeed reach proven accuracy levels of 1/1000,000 or more is irrelevant.

Proper proceeding and proper reasoning is proper proceeding and proper reasoning basta!

The new law of human nature mostly the fourth law of everything that derives from the block model provides the instruction manual for the individual and collective brain. Akin to a Volt meter that can take 100 Volt stating that the Voltage on a piece of evidence is more than 99 Volt on innocence excludes any relevance of opinion of any \* easy to now prove \* Volt meter that gets burnout above 50 Volt yet nigh everyone is hypnotically and ultimately religiously deluded into the belief that accurately measuring the Amperage is just as good or better on any Voltage issue.

As I showed in the EL, proof must be formally and materially consistent with a multi-brain majority consensus. Male female, young-old, Generalist-Specialist, Alfa, Beta, Gamma, Delta, LPE, MPE, HPE, and SPE or Scientific Professional Education consensus regularly tested by incidental secret ballot check of a true multi-majority consensus.

In an analog way, elementary physics like all of science proper should have ever-mounting probative value:

Proven Idea

Proven Concept

Proven Theory

Proven Local Law (lol, pun intended, such as the misnomer theories of Einstein. BTW. What does science mean with a "theory"? A law or a lie? A conspiracy theory means a lie yet the theories of Einstein mean a law in current and thus proven to be fraudulent science. My Elementary List of a thousand terms and definitions solves this Babylonian confusion.) A Local Law is a reality that allows for seeming contradictions due to problems with perspective. 100% true facts pro and 100% true facts con are only a seeming contradiction in the 3rd Law of Everything Bayes.

Proven Law of Everything of which there are ten dualistic ones that all apply all the time and everywhere and can be observed and tested by everyone. They combine into one grand law of everything temporarily best named One Law of Nature. The per definition infinite topology truths (waarheden in Dutch) / realities (realiteiten in Dutch) One Workability (werkelijkheid in Dutch) leading to very practical workability (werkbaarheid in Dutch).

Proven One Law of Nature and One Law of Human Nature as the instruction manual of the individual and collective instrument brain of homo sapiens for homo sapiens.

ALL THE THEOREM-BASED SCIENCE WAS IN AGES AGO I JUST ADDED A FEW TWISTS & COMBINED IT ALL BY FOLLOWING THE PROPER PROCEEDING AS ALREADY SHOWN IN PREVIOUS PUBLICATIONS

One Grand Law of Everything as One Law of Nature break one you break all ten dualistic laws of everything proven beyond reasonable doubt meaningless cosmos baring required absolute proof inverse meaningfulness free will of the cosmos and me.

A quick and dirty recap:

The first five laws of everything are more focused on the applied mathematical side of physics and the last five laws of everything are more focused on the physical side of physics.

1st Law of Everything classical mechanics: Add a fifth law of thermodynamics: Every object has an incidental  $v$  max. (The snowflake-like 1-neutrino has mass with an incidental  $v$  max of probably nigh  $10c$  at the highest pressure in the proven infinite cosmos and  $c$  is an obvious average to any six-year-old with Bildung); (Forget Newton who btw stole the falling apple from Sir Hooke, anyway all the mathematics was in ages ago. As with 2nd LOE Gauss, 3rd LOE Bayes, 4th LOE Euclid, 5th LOE Euler.

Discard those names with that of Descartes out of elementary science into the history of science box.)

2nd Law of Everything: Add the combining fifth normal bell-curve distribution both continuous and quantified basis of all statistical distributions and reasoning;

3rd LOE Add redefining Bayesian Reasoning as both deterministic and probabilistic in one all-encompassing physics of mathematics theorem interpretation of the synapse of the instrument brain;

4th LOE Add the Block Model order function of the cosmos and the collective instrument brain 3D Euclidean geometry cosmic & brainwaves as mixed salads of picture salad, word salad, fine number salad, and course number salad algorithms identical to the four first (mind you now via Descartes directly postulated in 3D) postulates of Euclid proving the fifth parallel postulate a geometric theorem as it does via deduction prove the flat geometry of Euclid not to be axiomatic assumptions in elementary science. More on that below.

5th LOE Add via a reductio ad absurdum double tetrahedron diamond tile containing two object subject 1-neutrinos via reverse engineered correctly framing artistic testable and best practice tested composition scenarios of largest inherent circular arguments showing only data pro and none con in all of several separate fields in science showing Euler's Identity to solve particle-wave duality via curved fields of high non spun snowball-like graviton and Higgs particles and high spun particles as eight proto black hole gluons.

6th LOE One infinite 3D empty space continuously invaded ether;

7th LOE Infinite separate elements of interacting absolutely conductive mass movable connected atoms in a 4D to infinite D topology vector per singularity/ point mass;

8th LOE Strong Force  $\text{kgm/s}$ ; constructive deconstructive reconstructive;

9th LOE Weak Spin Force  $\text{kgm/s}^2$ ; constructive deconstructive reconstructive;

10th LOW Symmetry in infinite local Nirvana cycles both parallel and in-line high identical snowball-like high spin-particles resonate via causing waves in curved local fields. Hence form repetition even as conscious thoughts as interactive moving timeless/ lifeless mass.

As I've already proven in the elementary List there is no reason that the cosmos isn't deterministic yet required by the rule of Law of Nature to use the inverse of meaning and free will ex the 3rd LOE. Yet, now again improved:

All are now Newly based on Just One axiomatic assumption:

#### IMPROVEMENTS TO THE MODEL

This article further improves the Elementary Scientist Exam and the five other Zenodo-published articles, including the elementary list with the Unambiguous 1000 Elementary Terms, Definitions, and Descriptions in Elementary Science, Courtrooms, and Schools. (Proven to have a very high view-to-download ratio with 317 views and 243 downloads in six months after publication. A glitch (?) at CERN probably causes a 0 view 0 download error.) The undisputed reason for the improvement follows from the indisputably best-practice correct definition of science. In this article, this is improved to include in italics

***A decent systematic trial and error search for all the laws of everything and an all-inclusive Bildung in Education Permanente.***

This has been solved and published in mentioned publications as One Law of Nature makes One Law of Human Nature. These two laws elevate all sciences to the wordiness of an exact science. Mind, that this definition can be reduced by redefining certain terms. It's a never-ending process akin to growing wise oak of the tree-like tower of science continuously broadening and improving its base. This has been successfully done for the first time in 5000 years.

*Mathematics must be made to fit Nature and not the other way around.*

Here I show that the five exclusive elementary axioms of the physics of everything can and thus should be reduced to only one grand trigonometry axiomatic assumption of one consistent cosmos of 3D elements of absolutely unchangeable mass in one 3D empty space ether. Because consistency logically dictates an infinite topology, all linear and flat geometry postulates aren't axiomatic assumptions but are deduced as theorems in elementary mathematics, a form of applied mathematics.

Pure mathematics is metaphysics in which the postulates of Euclid remain basic mathematical axiomatic assumptions i.e. axioms. This is logical because, in the metaphysics of pure mathematics, you are required to build an \* empty \* seemingly magic high hat. Contrary to that elementary mathematics is applied mathematics with inherent garbage in problems.

Nota Bene! The entire model supporting the One Law of Nature is now based on merely one axiomatic assumption of the One Consistent Cosmos Axiom!

Nota Bene 2! Currently only "shut up and calculate" science prides itself on not making any assumptions which is a blatant lie. All calculations in mathematics are based on a great many axioms that are inherent. This is common knowledge in mathematics and requires no reliable source other than that claim. The logical definition of axioms is fundamental assumptions that can't be derived from other axioms. Ergo in wordiness axiomatic assumptions.

Nota Bene 3! Current science prides itself on being evidence- or better data-based sec. That too is a blatant lie because Quantum Mechanical observations in quantum Alice and Bob detector experiments are based on polarisation. Akin to the bars of a jail observing only half of the picture and the rest is now proven garbage in interpretation via incorrect use of the collective instrument brain. Not having followed the instruction manual because not even having bothered to compile one.

The current scientific concept of inconsistent because mathematically unsolvable quantum weird physics constitutes inconsistent, incontinent mathematics. Current science should get its shit in order. In R&D, marketing, and Sales humour, cabaret, and taking artistic liberties is per logical definition part of an essential survival trait of the species. This again is common knowledge in these fields of science. It requires healthy manic oversight and healthy temporary depression of the instrument brain on the details. Preventing from not seeing the forest from the trees. QED!

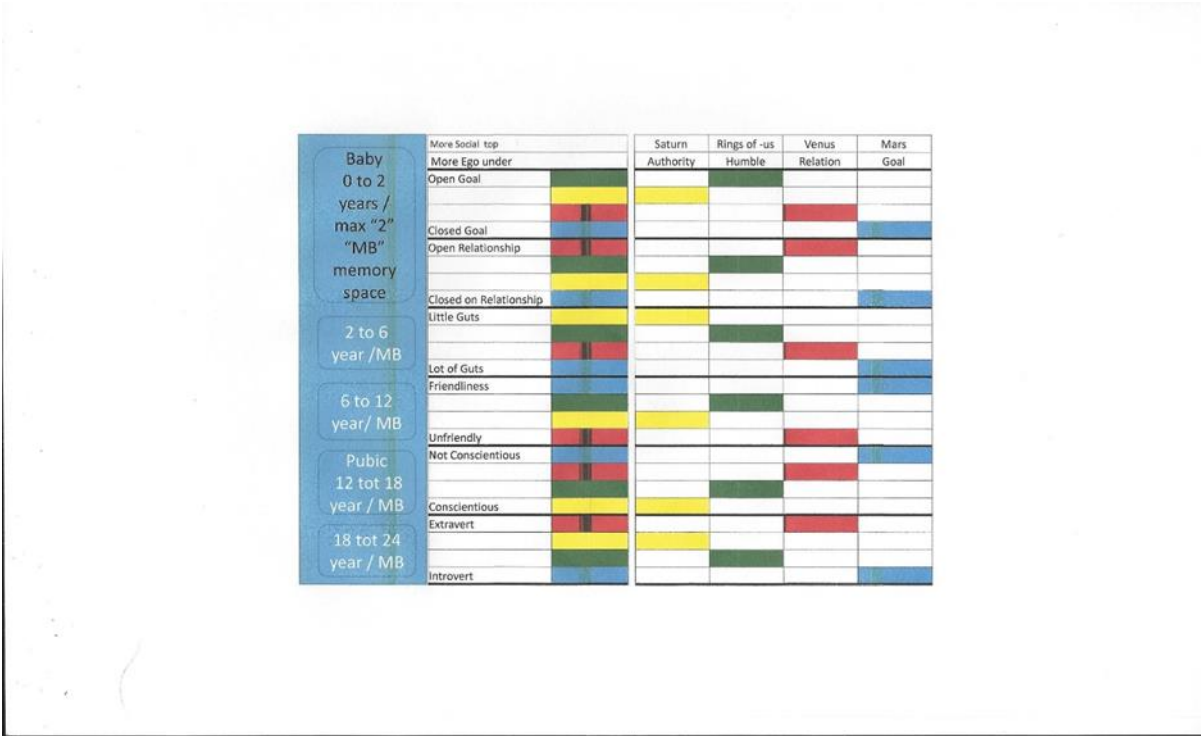

Here, I furthermore show that this model has a limited number of new twists as an easy-to-falsify claim with enormous consequences, such as preventing the continuation of the 5000-year war that coincides with the 5000-year unreasonable doubt on infinity in mathematics, philosophy, and thus physics—having proven that this correlation is causation.

YOLOUR: You Only Live Once Unique Reincarnation in infinite local Nirvana wavelike cycles in line and parallel in infinite fase timelines following One Law of Nature by splitting the unsplitable make ten dualistic laws of everything for the optimum understanding for homo sapiens by homo sapiens.

This provides the locally testable notion of one Nirvana per reductio ad absurdum double tetrahedron diamond as a complete discrete movie of two snowflakes that conform to the one law of nature at rising (emerging) complexity level cumulation point after that drop to the least complex state which as a seeming contradiction is infinitely complex. Akin to a Rubik's cube in nodes and anti-nodes of rising and falling complexity. The seeming contradiction of being absolutely unique and identical at the same time all the time is easy to explain by using two separate connected key rings representing dynamically uniquely deforming elements built up out of absolutely identical rings of mass.

The new block model is the proven fourth law of everything and the instruction manual for the individual and collective instrument brains that science lacks again falsifying and correcting current science. It also proves that the doubt exists because the instrument brains of most mathematicians and physicists are as a genotype easy to recognize and register on video deep idiots at all seeming contradictions such as ironic humour as an essential scientific teaching tool required for Bildung and complex interactive geometry both requiring an artistic personality type. All genotypes are different sorts of potentially highly gifted idiots that can't recognize themselves directly in the mirror due to that idiocy. Everyone can learn to test themselves using their easy-to-recognize idiots who can independently point out what sort of an idiot you are by repeated self-tests. Homo sapiens are robots that work objectively provided they prove to have followed the One Law of Nature as an exact science. The idea that the laws of the cosmos are too complex for the collective brain of homo sapiens is falsified by the fact that we have not gone extinct long ago.

Any psychologist should be able to show any inconsistencies i.e. contradictions or incompleteness/ loopholes \* within an hour \* in this model because it is depicted on one easy-to-fact check A4 piece of paper. They can read this like a musician can read musical notes. Only the less experienced or less talented psychologists will require further pages on the underlying statistics. Psychologists are

withholding essential evidence based on an illegal earning model of desire we all in varying degrees are forced to use in the current sinister sick science society.

Subsequently, any physicist should \* within the hour \* prove this not to be the five elementary algorithms of each 1-neutrino as proto RNA/ DNA. Evermore complex DNA alive built out of lifeless mass as continuous within quantified limits in infinite nirvana life death cycles in the deterministic mindset of no free will or meaning to life and not having complete absolute proof by dictate of the third law of everything Bayesian probabilistic reasoning judge all elementary issues in the five elementary mindsets. As a seeming double contradiction, this includes four mindsets with free will and meaning to life in the individual and correctly organized and trained collective instrument brain on the grand goal of homo sapiens. It's a double seeming contradiction because every mindset even that of not having free will or meaning implies having free will for a meaningful goal.

THE > 99.9% MANY NINES PROOF OF ONE MEANINGLESS EVERYTHING => PROOF OF THE INVERSE

The infinite truths and infinite realities that can only seemingly be inconsistent with one meaningless workability (werkelijkheid in Dutch) in this proven for 99.99 many nines percent and rising best practice highly practical workability (werkbaarheid in Dutch) will due to obvious lack of data to be taken into evidence force by the 3rd Law of Everything the physics philosophy of a slight twist in the definition of the Bayesian formula to be both deterministic and probabilistic including everything that is placed in its mathematical "memory bank". It will only be complete in infinity which is thus as Gödel's theorems also prove is never. Per the dictate of this law of Bayes, homo sapiens must act as if having free will and meaning to life, yet with the free will mindset of not having free will or meaning. The latter has the mental pro of acceptance of fate and the con of inactivity when urgent action is required. This is all dealt with in the Elementary List q.v.

It's in so many words also consistent with all the world religions such as current science with a mostly anti-religion religion having not bothered to follow the proper proceeding and defining the physics of religion as the internalized hypnotics as a survival trait of the collective instrument brain. 'Consistent' means 'no conflict' given the current mounting amok in the world as an evident also very much religious world war as a crucial scientific insight that eludes most scientists including not grasping the urgency.

Most scientists including most physicists and mathematicians can't get their heads around the logical effect of taking the inverse of meaningless having meaning in proper argument. You swap them by taking the inverse as absolutely true i.e. fact knowing that it's nigh absolutely proven untrue due to the lack of required absolute truth. It's illegal in science to swap back and forth without being explicit about the swap. The cosmos having no meaning also means that any mindset has no meaning because any stated goals are meaningless and thus the cosmos is flawless. After having taken the inverse as a fact then we get the possibility in a proper argument of getting a > 99.9% meaningful proof. Its foundation lies in the inverse which is inherently imperfect. As a metaphor, you've gone from being a meaningless cowboy with the white hat to at best the meaningful cowboy with the white hat and little black dot the smallest possible boss of god. The current oligarchs of science such as NWO act like they are the greatest bosses of god of the god that doesn't listen. Funding anti-scientific pseudo-science and not funding proper science is malpractice on their obligations to humanity on the social contract that causes genocide of the preventable continuation of the 5000-year war and thus criminally insane science.

Ergo, every high school child should have been taught the theory on the proper use of the five mindsets in the twelve years of Bildung since birth instead of using it as a dirty little secret earning model of desire to slowly teach adults to show how the instrument brain as part of a collective

instrument brain works after it has gone wrong. The third law of everything as the unsplitable part of one law of nature dictates that lack of the required complete absolute proof due to lack of data to take into evidence proves the inverse of using mindsets by hedging the bets.

This only leaves room for per definition illegal irrational doubt that the cosmos is or was at any time in any way inconsistent i.e. real magic instead of easy law illusionism seeming magic due to different sorts of inherent idiocy.

Because it's consistent there are several other ways irrespective of the starting point of reasoning that all lead to the same conclusion.

#### DECENT SCIENCE STARTS WITH DESCARTES & DISCARDES DESCARTES

It's illegal on the given definition of elementary science to add footnotes to the quote "I think therefore I am" because the all-inclusive Bildung demands open-source publication which is possible via Wikipedia. If it's not on Wikipedia it per logical definition isn't elementary science.

Furthermore, there is no evidence that Descartes was the first to state this. Maybe some Babylonian was earlier. This religious devotion in current sick science to idealize geniuses must stop because it's a devilish way of the oligarchs in science to try to remain the greatest bosses of god deciding what can be funded as science and what not idiotically claiming that science can't be defined which is the strongest proof in mathematics falsified in the reductio ad absurdum.

Legally speaking it's not even 'game over' because due to disqualification the game for current scientists never started in elementary science. Claiming any position in elementary i.e. most fundamental in the everything super set of the cosmos requires to be certified as an elementary scientist by having passed the elementary scientist exam, which I've proven to have passed summa cum laude. I'm thus a proven reliable source on elementary issues. Being a mere basic scientist such as a Nobel Prize laureate professor of physics only proves expertise prior odds authority in Physica Minor. The challenge of the improved elementary scientist exam is in all-encompassing Physica Mayor (pronounced Maior or Major). Legally speaking akin to buying a secondhand bike of which the lock is broken it forces rigorous scrutiny besides knowing from whom one bought the bike not to be deemed a criminal. Having as a fact of common knowledge in the science of Science in Transition legally speaking every scientist knows something is seriously wrong in current sick science. Science in Transition is as good as dead and buried by the oligarchs of sinister sick science. Akin to any German after the war stating "not to have known" isn't sufficient. They could and thus should have known.

So, let's start with Descartes: as a baby, I experimented via trial and error interaction in my cosmic bubble and later discovered that the cosmos is consistent and classical mechanical. That is what on the given definition of science systematically is the default position requiring valid falsification disproof of being elementary. Akin to a mathematician being able to reprove the theorem of Pythagoras as a matter of course any physicist or mathematician should be able to reprove the claimed falsification that the cosmos is classical mechanics. They can't. Descartes absolutely proved that classical mechanics is the fail-safe default position. All subsequent claimed non-pseudo science should thus be consistent with this the in-part beginning of the absolute proof that the instrument brain is part of an everything superset not completely being empty space nothing.

As I proved in 2010 the Michelson and Morley experiment is consistent with a dynamic ether. Had the Higgs particle probability found by CERN in 2012 been found in 1887 we would have had an ether yet a dynamic one. In that case, what Einstein would have come up with remains unanswerable.

The cosmos is best practice on Okham's razor beyond reasonable doubt proven to be infinite elements of unsplitable absolutely conductive mass in classical mechanical motion based on a beginning of absolute proof of an everything consisting of something mass and "something" (jargon) as one infinite nothing empty space ether. A Bayesian artistic testable scenario of infinite separate elements of movable unsplitable connections proves that there is no reason for any doubt that it's possible to produce the required composition of one sort of gods-particle probably the 1-neutrino that acts like a snowflake producing everything including a Gerhard Ris typing this an infinite amount of times this time as in the infinite past, infinite present, and infinite future. The second law of everything following the tenth law of everything Symmetry and especially the second law of everything a normal bell curve distribution dictates that every such Gerhard Ris is unique in for sake of the argument let's say fingerprints.

Like in solving a never-ending story of murder cases I only claim to have proven what route is best to be funded in further scientific research. That mass and not matter is elementary is in part based on a beginning of absolute proof that the mass is the murder weapon carrying the fingerprint of mass murderer Mother Nature. That demands further funded scientific research and a fit-for-consumption way of organizing improved politics to prevent pestering indirectly producing love.

This is overkill because Albert Einstein, Erwin Schrödinger, and Lewis Carroll et al had already in a well-founded way in so many words stated that quantum weirdness was absurd. This is common knowledge in this field of expertise and unsystematic thus illegal to provide a source on this correct definition of science all the more so because John Bell by theorem has falsified the anti-thesis as absolutely unsovable given the axiomatic assumptions on which it's based. Because science is per definition reasonable unreasonable doubt is illegal.

To prove that the model conforms to the definition of all-inclusive trial and error Bildung in Education Permanente thus after birth until death the model is claimed to be explainable to any six-year-old after seven years of appropriate Bildung. The latter, as defined in the elementary list, means acquired general knowledge and skills.

Most current scientists as per the current paradigm are brainwashed that science should be autistically boring and deadly serious. The best practice communication between different sorts of idiots is an essential scientific survival trait of decent survival in marketing, advertisement, HRM/sales management, and sales of the decent production of science. Only science that \*always\* stays consistent with R&D isn't anti-scientific pseudo-science but science proper that will prevent nuclear war and thus possible premature extinction by doing something radically different. This solution by the Oracle Senate Test can hopefully still in the nick of time be tried and tested as this model dictates by one law of human nature that is logically derived from one law of nature.

Mind that the model also works for a polar bear wanting to survive by desperately attempting to put the walrus on his menu. If that succeeds the polar bear if it doesn't want to go extinct must as a species find a way that enough polar bears via any means such as copycatting learn to do this.

The elementary reason that the current majority democracy and the democratic (what ever the oligarchs want) statistics in science can't work is when temporarily switching off the second law of everything the normal bell curve statistics is the following:

100% of humanity goes literally suicidally mad when there is no symmetry as the 10th law of human nature derived from the one law of nature dictates as the equality inequality bandwidth.

30% of homo sapiens robotically (genotype) are humble hysterics. 80% female and 20% male. They have an average Venus strong Rings-of-Us algorithm combination. 10% of which (= 3%) are SPE (scientific professional level speed of brain intelligence). They lose emotional control when not sold security (Rings-of-Us) which requires a white lie because the workability truth is that there is no such security to be had. The seeming contradiction is that only this uncertainty is proven certain. As long as you adhere to the 10th LOE it will be alright. They are average at out-of-the-box mirroring of emotions provided they aren't under too much mental pressure excellent potential humble leadership as a sales employee. Mind, that authentic humble leadership can only be very/ most effective in a society that is in balance. Narcissistic acting humble is also effective black magic illusionism.

30% of homo sapiens robotically are humble autistics. 80% male and 20% female. They have average Mars and strong Rings-of-Us algorithm combination. They lose emotional control when not sold security under pressure on their strongest DNA talent. They are average at geometry and deeply idiotic at all complex geometry with inherent seeming contradictions such as irony, rheology, astronomy, and quantum mechanics.

NB Putin is a far above-average-thinking autistic authoritarian genotype narcissistic (Leningrad in war as a child) phenotype, mobster/ KGB/ Slavic religious type, in the hypnotics of a war leader. His narcissism takes precedence over the mobster algorithm because there is compelling evidence that certain opposing oligarchs were murdered including their families. This is not done in the mafia-style mobster religion because that endangers their own families. Nobody dares state anything to Putin that they think he doesn't want to hear. So, they don't and Putin although not to endanger his own family is too idiotic to compute this by himself. Pridgozjin was a far above average thinking ADHD-c type of for me unknown phenotype yet also a mobster/ military religious type as no doubt was Julius Caesar having history repeating itself having Wagner march on Moskow and being killed by his great friend Putin playing the role of Brutus. When analyzing this recent history science proper forces me to make a script for Pridgozjin The Movie. This is then based on all the data I have on him taken into evidence as a testable fact which I can publish to receive opposition. As a Bayesian prior odds, educated guess, several oligarchs behind the scenes convinced Pridgozjin that they would back a coup. These oligarchs did not believe the idiot Pridgozjin would do it having guessed that Pridgozjin was bluffing. The correct definition of science demands that a scientific claim is always proper and exact as in accurate yet not more precise or imprecise than the evidence warrants. Ergo, this is a scientific (true) statement in R&D that can be taken into production and sales as R&D. It is thus not taken into production and sales as a producible and saleable God's truth. Compare it to a proven prime suspect requiring further investigation along those lines. (See the EL to understand the difference between accuracy and precision.)

To continue with the percentages of the personality types of the block model:

All 60% of humble humanity searches and finds an authority Saturn to follow as their leader.

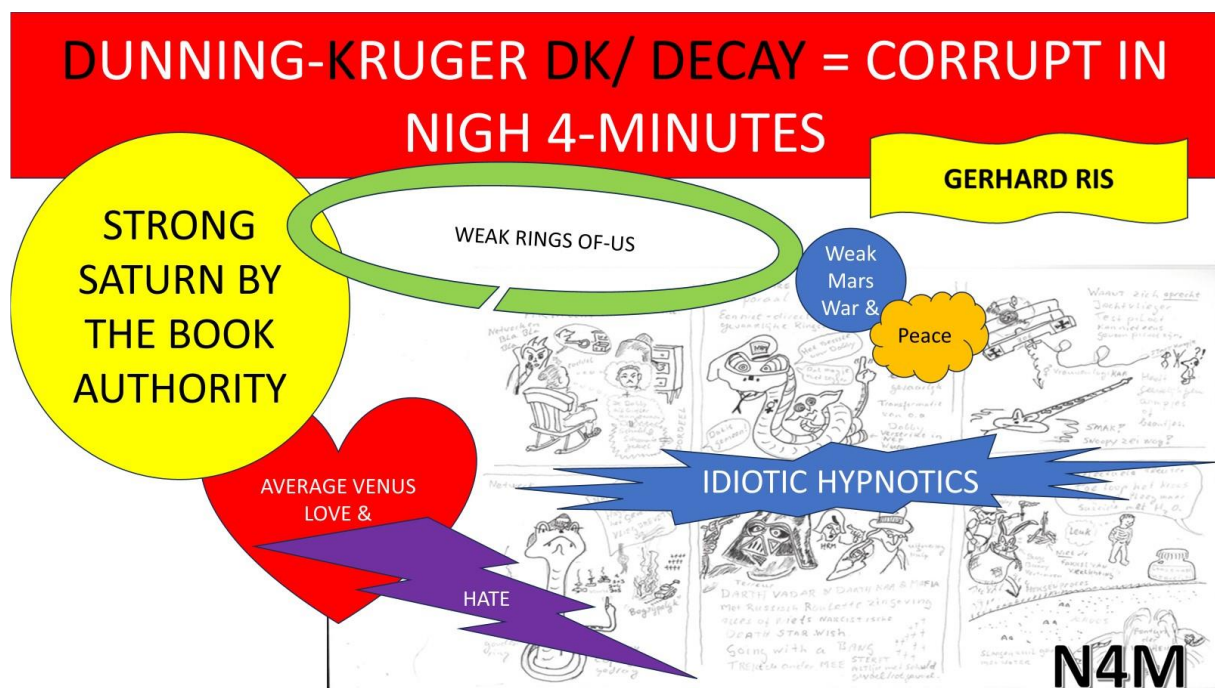

As an artistic out-of-the-set-theory box thumbnail teaser of the (ADHD-h4) advertisement department to R&D break (ADHD-i & ADHD-c4) open a new market (ADHD-nos4) as a scientific speed of brain (4) level problem to take this into healthy autistic authority production and sales on the Saturnus algorithms I've started a YouTube N4M channel with a "Nigh 4-Minutes" 14 video playlist as teasers.

Because most physicists and mathematicians as I've since 2010 tested start moaning about Dunning-Kruger (when you become in-the-know always add 'DK') I'll start there to show not to worry because that too is covered. Even though most are horrified by it, humour, ridicule, and taking artistic liberties

are \* essential scientific \* survival traits. It's part of proper Bildung in Education Permanente or remedial teaching for adults in today's sick science society.

This is so in science proper because it must stay evidence-based. I.e. it's illegal in science proper to be more precise or imprecise than all data taken into evidence warrants. You must stay within the boundaries that are evidence-based yet must by One Law of Nature fill in all the loopholes in a logically testable way via the probably proven best practice scenario composition that only the appropriate instrument brain personality types can perform in an exact scientific way.

Mind that when you are convinced the drawn concepts are by me that directly is > 99.9% probative value that I'm an artistic ADHD-c personality genotype and belong to the 10% fastest thinkers of all mammals as intelligence meaning the speed of the synapse of the instrument brain.

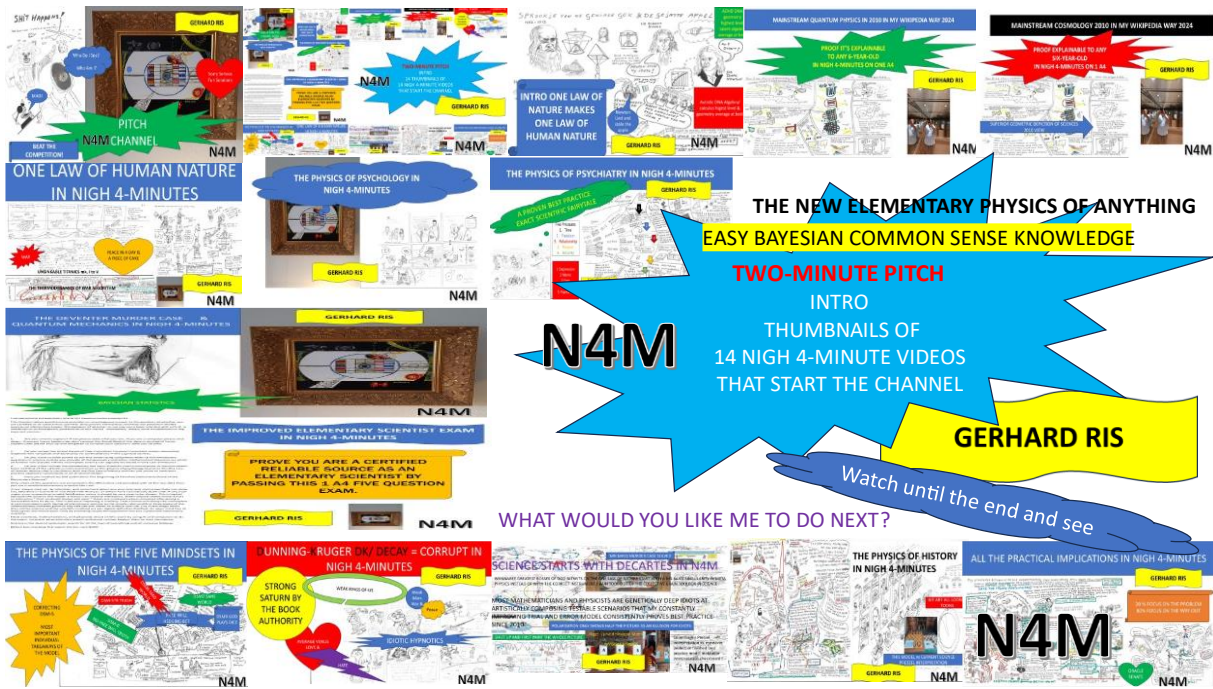

Explaining how the instrument brain of most Dutch magistrates correctly teamed up as authoritarian hysterics works to any six-year-old as per the definition of all-inclusive Bildung on YouTube when the society they are working in goes mad. Indeed, most hours of work in courts of law concern HRM (human resource management better called hypnotic relation manipulation) the problem is that any legal proceeding also needs on average a few hours of work in both out-of-the-box R&D litigation and in-the-box production department expert litigation before sales to function properly. Of course, these relatively few hours of work in law should be at the \* start \* of any legal proceeding! The current Dunning-Kruger DK decay of most Dutch magistrates lies in honestly being deluded into believing to be the best judges in all cases. Observing the horrendous track record proves the obvious delusion. This Nigh 4-Minute thumbnail is an advertisement via a teaser explained in a Nigh 4-Minute video to attempt to solicit a new way of looking at the problem and the proposed way out.

If the fact that these nigh 300 drawn concepts are unfinished and not fully translated irritates you, then that is evidence that you are a criminally insane idiot who by action or default is guilty of genocide. This is easy to prove by fact-checking this yourself or forcing the scientific oligarchs such as the Dutch Research Council NWO to fund the falsification of the Elementary Scientist Exam. And falsifying the claim that the simple decision of NWO to advise Dutch politics to test the proposed

Oracle Senate will as a hypnotic finger snap change international scientific into a paradigm shift ending the peatburn-like 5000-year war. The cure will spread like wildfire akin to a healthy virus.

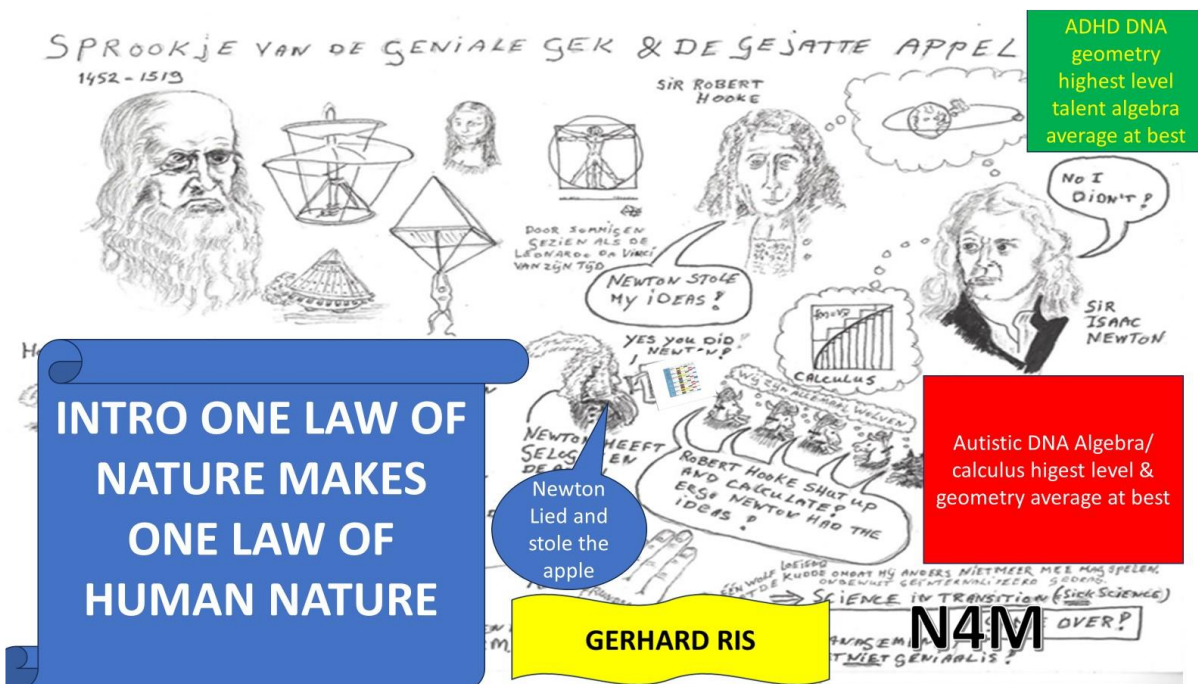

A two-minute pitch introducing Dada Easter Bunny as a litigating predator for the truth when the shit hits the fan. Receives essential contradiction from his shrink Sigmund. Art, Kitsch, Science & Religion prove that the whole story as I saw it late 2018 can be painted on one A4 piece of paper.

Check these teasers out ter fine of the challenge of valid falsification of having passed the Elementary Scientist Exam.

THE IMPROVED ELEMENTARY SCIENTIST EXAM IN NIGH 4-MINUTES

This Socratic taboo questionnaire provides an unambiguous answer to the question of whether you are certified as an elementary scientist. Only proven elementary scientists are potential reliable sources on elementary issues. The question of whether or not you are a basic scientist with a Ph.D. is irrelevant to an elementary probandum of this article. 'Elementary' means most fundamental in the superset cosmos.

1. Are you a homo sapiens? If not please state what you are. If you are a computer please shut down. If you are homo sapiens but don't accept the Grand Goal of the decent survival of homo sapiens then please shut up and enlighten us on what your opinion is after you've died.
2. Do you accept the Grand Axiom of One Consistent Cosmos? Consistent means absolutely loophole-free complete and absolutely no contradictions in the superset cosmos.
3. Do you claim to have solved all the first three rising complexity levels of the elementary questions in science and do you provide all the geometry and other mathematical theorems on which all further non-pseudo infinite incomplete science can logically be based in One Law of Nature?
4. Do you claim to have the elementary and basic scientific instruction manual of the instrument brain and that of the collective instrument brain as the physics of psychology based on the One Law of Human Nature that is consistent with the One Law of Nature and can you prove to have best practice applied it successfully in all of several fields?
5. Have you studied my DOI publication The Beginning of Absolute Elementary Proof of the Elementary Cosmos?

Only when all the questions are answered in the affirmative and provided with all the raw data then you are a certified elementary scientist like I am.

If not, please shut up, be attentive, and come back when you very precisely and respectfully can show any data that is incorrect or not dealt with that you or others have consistently dealt with. If any such major error amounting to valid falsification exists it should be very easy to be shown. This is logical because the claim in this model is that it's all classical mechanics. When anyone shows minor errors or omissions \* that no doubt always will exist \* these are irrelevant when corrected after giving a reasonable time to do so. This is because nitpicking is a fallacy. That science will always be incomplete is not inconsistent with having all elementary science as the simple rules and first three bases of the unfathomably complex game of the tree like the Tower of Science and Life. For if real magic exists then all the science and the scientific method are per logical definition falsified. An open mind has its limits given the Grand Goal. Only by providing respectful opposition are you a potential elementary scientist.

Most scientists, mathematicians, and physicists cheat on this exam by using AI and computers to do the exam. I practice what scientists preach and prove to have beaten them at their own game.

Science is the decent systematic search for all the laws of everything and all-inclusive Bildung.

Before fact-checking first watch the next N4M!

Interpretation vs. my never perfect or finished best practice model metaphor interpretation chessboard

N4M

I lack the time to correct some of the mistakes in this video other than in this article.

<https://youtu.be/7nJyGoAdXDI>

I want to redo this entire video. I first of all focussed on the instrument brain and need to rethink how best to tell this recently agin improved par of the story of the Cosmos The Movie.

<https://youtu.be/OtG2lgZv54A>

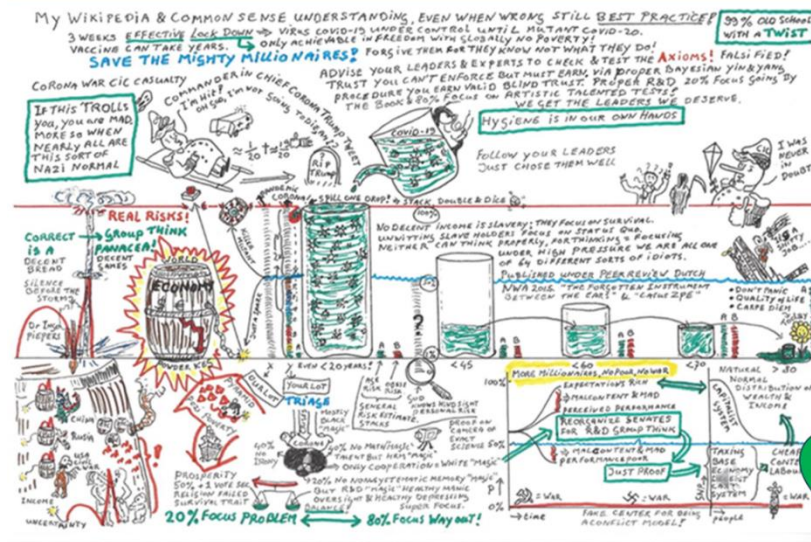

Netanyahu is in exactly the same predicament as Hitler even though he's not an alpha personality type but an authentic authoritarian beta 4 personality genotype. As a healthy neurologically blocking by extreme feelings of shame and guilt on his role on the genocide of 7th oktober 2023 make a hypnotically more and more religious amok in attacking Hamas at all costs with the Palasitians as the scape goat accomplices.

Only when the oligarchs in the USA decide to test the proposed Oracle Senate Test can they force the palastinians & Hamas and Israel to do the same.

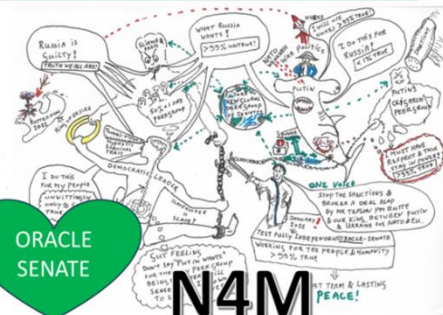

And make Netanyahu the new modern monarch King of Israel as the Messiah that brings peace. because that is what that pesonality genotype craves the most. Well, then give him what he wants and neutralize him. Peace in a day is a piece of cake. Yet only when you do something radically different.

# ALL THE PRACTICAL IMPLICATIONS IN NIGH 4-MINUTES

GERHARD RIS

20 % FOCUS ON THE PROBLEM  
80% FOCUS ON THE WAY OUT

<https://youtu.be/sK00 r 6 VI>

The doodle graphic on the left proves that it's possible to put the whole story on one A4 piece of paper. Donald Trump and the Coronavirus as a metaphor for any serious problem. Published when Donald Trump claimed to have never been in doubt about dying when he as Commander in Chief entrusted with the nuclear button had contracted corona.

The doodle graphic on the right shows how to cure our leaders from their focus-slavery showing Putin as a hammerhead shark.

I predict based on this model that if Trump doesn't fully decompose mentally before the election and the people vote for Vance the USA will become a nuclear mobster state like Putin's Russia.

Therefore Biden should hold this speech before the election a 3-minute read published July 21st, 2024.

<https://risadvies.nl/biden-should-hold-this-speech/>

Or make Trump the new Modern Monarch Emperor of the USA akin to making Putin the new modern Monarch Tsar of Russia.

If 9probably even when) Harris doesn't win the election with a landslide then the Maga movement and Trump will again attempt a coup more forcefully this time. It will depend on the US military to what degree a new Civil War that defacto already started after the attack on Capitol Hill will erupt.

The way out will be further explained in a master class as the next teaser shows.

End footnote: The drawing of Lady Justice was done by me in the 1990s in my first murder case before the Dutch Supreme Court concerning a client who was incorrectly deemed criminally insane. I was trying to reinvent the Bayesian wheel helped by a later physicist with a PhD which was the start of my Just Proof model trying to explain proper evidence and proof to lawyers. I couldn't earn enough already doing a PhD with the late professor of criminal law Hans Nijboer who brought Bayesian probabilistic reasoning via Schum to my attention. It was after leaving the DA's office that the now emeritus professor of statistics Leiden my friend Richard Gill KNAW deemed my Just Proof model "spot on" and we traded the takeaway secrets. Thanks to my friend mathematician Hans Waalwijk a few months ago I succeeded in putting all the shut-up-and-calculate theorems into the model. They are in no way responsible for any claims I make in this model. My whole story is on the internet q.v. as evidence of my claimed personality type etc..
