

PROOF OF THE CLASSICAL MECHANICAL COSMOS IN FIVE ADVERTISEMENT POSTERS

THIS CURES SINISTER SCIENCE AND PROVIDES AN EASY WAY OUT OF HOMO SAPIENS' 5000-YEAR WARPATHTOWARD EXTINCTION

Gerhard Ris former DA magistrate and lawyer with thirty years experience in courts of law.

The previous DOI publications are in the links below. My last publication on Zenodo ten days ago has 37 views and 43 downloads.

Current Peer Review Science is only consistent with being God's greatest boss, the occult quantum weird god that doesn't listen.

This advertisement poster is new and sufficient for any intelligent unbiased person to be convinced of the claimed proof.

<https://youtu.be/4MbW1L8jhFY>

Selling science properly in classes on YouTube is a dictate of the definition of science given below.

Descartes + Super Conductivity => Postulate Absolute Conductivity => 3D Euclidian Space Workability / 3D objects never change when moved => flat geometry Euclid is a **non-axiomatic geometric theorem** in elementary mathematics and dito physics. QED! (In the metaphysics of pure mathematics flat geometry remains axiomatically assumed)

GERHARD RIS

Intelligent well-educated people don't need more information than this poster to become convinced that naming, shaming, and ridiculing the Dutch Research Council NWO is the decent procedure in the current paradigm. NWO flunked the Elementary Scientist Exam. The fastest way to get proper funding for science is using your power which will force NWO to advise the Dutch politicians to do the proposed Oracle Senate Test by emergency law. That decision alone will as per hypnotic robotics change the paradigm instantly. Because NWO won't fund me hopefully Patreon will.

That alone will quickly and hopefully still in the nick of time stop the 5000-year war spiraling further out of control toward an otherwise inevitable horrible extinction.

ADDING ONE NEW INSIGHT

In this article, I also wish to add new insight into the unique type of the matryoshka mindset model as the non-religious part of homo sapiens robotics.

Homo Sapiens are proven to be robots that must deeply religiously by the one law of human nature believe not to be robots in a meaningless everything of the cosmos.

Recap: the DNA genotype is the greatest predictor of human behavior. In decreasing predictive value order the phenotype is deeply religious culture, upbringing, or trauma in DNA and instrument brain. Then the neurologically internalized hypnotics as religion for instance job deformation or education. The slightly religious hypnotic fashion of the day by advertisement of the peer groups and last of all the non-religious unique type as the least influential but unpredictable part of human behavior.

For the most part, this is the know-how of psychology that should have been taught to all in high school and now requires urgent remedial teaching. The slight know-why twist is new.

IMPROVEMENTS TO THE MODEL

This article further improves the Elementary Scientist Exam and the six other Zenodo-published articles, including the elementary list with the Unambiguous 1000 Elementary Terms, Definitions, and Descriptions in Elementary Science, Courtrooms, and Schools. (Proven to have a very high view-to-download ratio with 317 views and 243 downloads in six months after publication. A glitch (?) at CERN probably causes a 0 view 0 download error.) The undisputed reason for the improvement follows from the indisputably best-practice correct definition of science.

A decent systematic trial and error search for all the laws of everything and an all-inclusive Bildung in Education Permanente.

This has been solved and published in mentioned publications as One Law of Nature makes One Law of Human Nature. These two laws elevate all sciences to the wordiness of an exact science. Mind, that this definition can be reduced by redefining certain terms. It's a never-ending process akin to growing wise oak of the tree-like tower of science continuously broadening and improving its base. This has been successfully done for the first time in 5000 years.

Mathematics must be made to fit Nature and not the other way around.

Science proper per definition demands all-inclusive Bildung. Bildung requires marketing, advertisement, and sales of science proper. To that end please note this selection of thumbnails as posters advertising the classes explaining the model in chunks of nigh 4-minutes.

(The Zenodo link to the scientific DOI publication at CERN works even when you get a "forbidden" glitch.)
