

INDUGRID-PLATFORM

The entry portal to the corporate energy community

WHAT CAN THE PLATFORM DO FOR MY COMPANY?

If you are interested in participating in a corporate energy community (EC), the InduGrid platform can

- identify suitable partner companies for forming an EC
- optimise the matching of performance profiles among EC participants
- quantify potential savings or new sources of income
- estimate the demand for renewable energy sources within an EC (e.g., for sizing a planned PV system)

IS INDUGRID RELEVANT FOR MY COMPANY?

- ✓ My company has a relevant demand for electricity and/or heat.
- ✓ My company has a surplus of renewable electricity or (waste) heat at least some of the time –

OR

- ✓ My company would like to obtain energy from an energy community.

We find the right partners for the energy exchange!

THAT SOUNDS PERFECT! WHAT'S NEXT?

Set-up an initial consultation appointment with the NEFI team!

Step 1: Enter your relevant data on the InduGrid platform.

Step 2: Identification of potential energy communities through matching of generation and consumption profiles

Step 3: Analysis of potential savings through optimisation of energy flows

Step 4: Implementation of optimised control systems for energy communities
