1 Executive summary

This deliverable provides an account of all dissemination activities carried out by LoCloud during over the thirty-six months of the project.

LoCloud supports small and medium-sized institutions in making their content and metadata available within Europeana, by exploring the potential of cloud computing technologies. To achieve this, the project has developed a cloud-based technology infrastructure to enable the aggregation of local cultural content. It is also developing a number of micro-services to help reduce technical, semantic and skills barriers, and to render the content more discoverable and interoperable.

A dissemination strategy was set out at the inception of the project in the Dissemination Plan (D6.1) and which was updated in the Interim Dissemination Report (D6.2). The strategy aimed to raise awareness about the LoCloud project and its activities amongst:

- Internal stakeholders within the partner organisations.
- Organisations with an interest in cloud computing, applied to small and medium sized institutions, including small and medium sized cultural heritage institutions, holders of private collections, and others.
- The Research Community with an interest and involvement in cloud computing in general, and to cultural institutions in particular.
- The European Commission's CIP ICT PSP programme and related projects funded by the programme.
- Users of Europeana, members of the general public, students, researchers, etc.

The objectives of the dissemination strategy are to:

- Identify the interests of the stakeholder community, and the main channels for communication and networking activities.
- Build and extend the project contact database by clustering with other projects, participating in events, and exploiting the partners' networks of contacts.
- Informing the stakeholder community about news, events and activities by developing a project newsletter, exploiting social networking channels, as well as traditional media.
- Providing an up-to-date set of dissemination materials by developing the project website, briefing papers, presentation template, and other materials for use by the partners.
- Presenting the project at relevant national and international events.

These objectives were pursued until the end of the project and this final dissemination report provides an account of all the dissemination and promotional activities carried out by the partners throughout the entire project duration in the tables to be found in the Annexes.

2 Dissemination activities

This section provides a review of all dissemination activities carried out during the thirty six months that the LoCloud project was active. It describes the audiences targeted for dissemination, the means and resources used to promote the project progress and their result, and the actual activities carried out to reach the identified audiences.

2.1 Involving stakeholder communities

The following stakeholders were identified as target groups in the initial dissemination plan:

- Internal stakeholders within the partner organisations;
- Organisations with an interest in cloud computing applied to small and medium sized institutions, such as small and medium sized cultural heritage institutions, national and domain aggregation services, holders of private collections, Europeana, and others;
- Research communities with a general interest and involvement in cloud computing, and a particular interest as applied to cultural institutions;
- The European Commission's CIP ICT PSP programme and related projects funded by the programme;
- Europeana, end users of Europeana (e.g. students, researchers, etc.).

All LoCloud partners have been actively engaged in promoting LoCloud both to their internal stakeholders and external audiences, targeting the communities of small cultural institutions, researchers, and companies working in the domain of cloud computing, specifically for small institutions. Throughout the project partners have reached out to stakeholders through presentations at national and international events, training workshops, through press releases, news on their websites, and to their networks via mailing lists and social media. The project has organised conference workshops each year and these have been well attended.

There has been a regular and mutual exchange of information between LoCloud and Europeana. In addition to face-to-face meetings between LoCloud and Europeana, LoCloud partners have participated in Europeana Annual General Meetings, in Aggregator Forums, Task Forces and in the 2015 EuropeanaTech conference, (see below).

The Europeana office maintains the Europeana pro web site (<http://pro.europeana.eu>) and disseminates information about projects, including LoCloud, to its stakeholder community through the website, a quarterly newsletter, and its news channel. The office also maintains a calendar of events informing group members about upcoming events, inviting participation in clustering activities, and disseminating information about the project's participation in international conferences and events.

LoCloud has followed the work of, and exchanged information with, Europeana Cloud¹, Europeana Creative² and Europeana Inside³. This is done mainly via the exchange of news, with occasional virtual and face-to-face meetings.

¹ <http://pro.europeana.eu/web/europeana-cloud>

LoCloud has also exchanged news and information on the results of the project with the national, domain and thematic aggregators within the Europeana network including CARARE, Europeana Fashion, Europeana Film Gateway, Europeana Space, TEL, Athena Plus, EAGLE, Deutsche Digitale Bibliothek, Hispania, etc.

2.2 Events

Partners have participated in more than two hundred separate events giving presentations at conferences, seminars and workshops within the local heritage and professional domains, with the aim of promoting the results of the project, and advocating the contribution of content/metadata to Europeana. The project organised workshops as part of international conferences during the second and third years, the first being held during the 18th general assembly of ICOMOS in Florence in November 2014 and the second during Digital Heritage 2015 in Granada in October 2015. The final project conference was held in Amersfoort in the Netherlands in February 2016. In addition to these major project events, partners participated in workshops at the EVA conference in Jerusalem in November 2015, at TPD in Poznan in October 2015 and at the EuropeanaTech conference in Paris in February 2015. There were a large number of national workshops organised by partners for institutions in their countries, and a series of five workshops in the Balkan countries.

The Final Conference in Amersfoort provided the occasion to announce the results of the LoCloud Competition and to recognize the winners.

Below are a few highlights of events organised by LoCloud, or with a substantial project presence, during the three years of the project. A full list of events is included as Annex 1 to this report.

The LoCloud Final Conference 5th February 2016, Amersfoort

The LoCloud Final Conference (<http://www.locloud.eu/Events/LoCloud-Conference>) was hosted by RCE at their offices in Amersfoort, the Netherlands on Friday the 5th February. The programme provided an opportunity for partners to show case their content, which has been provided to Europeana, and for the technical developers to describe the services developed in the project.

² <http://pro.europeana.eu/web/europeana-creative>

³ <http://www.europeana-inside.eu/home/index.html>

Ole Myhre Hansen opening the LoCloud Conference

After a welcome from Henk Alkemade of RCE, Ole Myhre Hansen (NRA) introduced LoCloud, explaining the goals of the project, describing the Services developed by the project and showing some examples of the content provided. An important set of services has been developed by the project for smaller cultural institutions and to ease the process of providing metadata and content to Europeana.

Henning Scholtz presented the Europeana Business Plan and described Europeana’s new Publishing Framework. The focus of Europeana is now on improving quality of data and experiences for its users. A LoCloud partner, BJC, has provided some of the highest quality open access content that is currently available on Europeana.

Nathalie Gascoin talking about the experience of the Archives Départementales de la Gironde in LoCloud

The next session provided a showcase from LoCloud with partners presenting both their content and describing how they had involved small and medium sized cultural institutions in their regions in the project. Presentations were given by:

- Belgrade City Library, Serbia - Jasmina Ninkov and Predrag Djukic
- Discovery programme, Ireland – Louise Kennedy
- Fondazione Ranieri di Sorbello Collezione– Giulia Coletti
- Hacette University, Turkey – Tolga Cakmak, Bulent Yilmaz and Ozgur Kulcu
- Gironde – Nathalie Gascoin
- Cluj County Library – Sorina Stanca
- National Archives of Norway, Joachim Fugleberg
- MECD, Spain – Maria Carrillo
- Archaeology Data Service, UK – Holly Wright

Marcel Watelet of the European Commission followed by giving a presentation on the new H2020 programme and Cultural Heritage, highlighting calls that would be of interest to the audience.

The programme focus then moved onto the technologies with presentations by Marcin Werla of PSNC on LoCloud Collections and the take-up by cultural institutions. Rymvidas Laužikas of VUFC then followed describing the Historic Place Names Service developed in LoCloud.

After lunch Richard Leeming of the BBC described the Research and Education Space initiative. RES is a partnership between the BBC, JISC and the British Universities Film Council in an initiative to improve access to public archives for use in education. RES is an open platform that includes linked open collections data from Europeana alongside data from UK institutions and the BBC itself.

Richard Leeming presenting RES

The next session provided a show-case of LoCloud services with presentations from the technical developer partners:

- Getting More out of your data – Dimitris Gavrilis, Athena RC
- Micro-services in LoCloud – AIT, Walter Koch
- Aggregating cultural heritage metadata using the MINT platform (Presented by Dimitris Gavrilis in place of Vassilis Tsouvaras).
- On the map – Runar Bergheim, AVINET, Norway.

Runar Bergheim presenting the Geocoding service

The final session presented the results of the Competition run by LoCloud during summer and autumn of 2015 (see Section 2.3.6 below). A short video provided a show-case of the competition entries including those by the winner and runner up. Henk Alkemade presented the awards to the competition winner, Mihael Muršec a secondary school student from Slovenia, and the runner-up, Bogdan Stanciu a journalist from Romania.

The conference concluded with a summing-up by Kate Fernie.

Mihael Muršec and Bogdan Stanciu with their certificates

LoCloud Workshop, EVA/MINERVA, 8 November 2015

Partners participated in a successful LoCloud Workshop at the EVA/MINERVA conference in Jerusalem on 8 November 2015 (<http://www.digitalheritage2015.org/>). The workshop showcased the technical outcomes of the project and included the following presentations:

- Overview of the LoCloud Project (Holly Wright, UoY ADS)
- Creating mappings with the MINT system (Vassilis Trouvaras, NTUA)
- MORE: using LoCloud: services in the Aggregation Workflow (Vassilis Trouvaras, NTUA)
- LoCloud Micro Services and the Digitisation Workflow (Walter Koch, AIT)
- LoCloud Collections (Holly Wright, ADS)

LoCloud Workshop, Digital Heritage 2015, 1 October 2015

A workshop showcasing the content outcomes of LoCloud was organised by UoY ADS at the international Digital Heritage Congress on 1 October, 2015, in Granada, Spain (<http://www.digitalheritage2015.org/>). The workshop programme was as follows:

Introduction

- LoCloud: Local content in the Europeana Cloud (Kate Fernie, UK)

Technology Case Study

- Geolocation LoGeo API tool (Franc Zakrajsek, Slovenia)

National and Regional Case Studies

- Magic lantern slides and 3D PDFs: Working with diverse content providers (Louise Kennedy, Ireland)
- Romanian digital collections in Europeana (Sorina Stanca, Romania)
- Dynamics and partnership with local associations involved in LoCloud: A study case with Gironde (Agnès Vatican, France)
- Czech digital collections from the archaeology and architecture domain in Europeana (Irena Blazkova, Czech Republic)
- Balkan LoCloud Experience (Jasmina Ninkov and Predrag Djukic, Serbia)
- The cultural challenge in Umbria: Local institutions growing up in the cloud (Giulia Coletti and Claudia Pazzini, Italy)

Giulia Colletti presenting the Fondazione Ranieri di Sorbello's experiences in LoCloud

LoCloud and Communities

- LoCloud Support for communities and cultural tourism (Silvia Alfreider, Norway)
- LoCloud: What's in it for me? (Henk Alkemade, The Netherlands)
- Concluding Remarks and Discussion (Holly Wright, UK)

The workshop was very well attended and it was successful in attracting interest about the project from stakeholders.

In addition to the LoCloud workshop, the project was presented by Holly Wright of the ADS in the Tag Cloud project workshop at the Digital Heritage 2015 conference. The theme of the Tag Cloud workshop was "Engaging and governing in the Cultural Heritage services" and the workshop was held on 29 September.

LoCloud Hackathon, 11 February 2015

Developers in the Lab at the Google Culture Institute during the LoCloud Hackathon.

A Hackathon was organised for LoCloud and Europeana by Athena RC at the Google Culture Institute in Paris on 11 February during the EuropeanaTech conference. The event gathered together 22 developers who worked on innovative applications for the cultural heritage sector, using Europeana data and LoCloud services including the MORE repository, enrichment services, Geolocation services, the historical place names service, the vocabulary service, and the Wikimedia application.

Developers presented their applications to an international panel of judges including Costis Dallas (Athena Research Centre), James Helmsley (Europeana), Andy Neal (Digital Heritage New Zealand), Ingrida Vosylute (University of Vilnius) and Kate Fernie (2Culture). The panel voted for the most innovative application/service presented by developers at the Hackathon.

MoRe Quality by Vangelis Banos (Greece) was the winning application.

A website was set up for the hackathon by Athena RC to provide information about the event and the services available at <http://more.locloud.eu/hackathon/>.

The Hackathon was promoted by LoCloud partners both before and after the event. The connection with the Google Culture Institute raised a lot of interest among developers in the Hackathon and in LoCloud services. Two articles, one on the event in general, and one on the winning application, were published on the LoCloud web site and in the February newsletter:

<http://www.locloud.eu/News/We-attended-the-LoCloud-Hackathon>

<http://www.locloud.eu/News/LoCloud-Hackathon-winner>

EuropeanaTech2015, 11-13 February 2015, Paris, France

The EuropeanaTech conference brings together application developers, information professionals, technology researchers and decision makers in the cultural domain. The 2015 edition of the conference (<http://pro.europeana.eu/event/europeanatech-2015>) aimed to explore technical challenges and new developments around discovery and re-use of cultural content, with a look to the future of digital cultural heritage at Europeana and internationally. There were keynote presentations from Rewired State, the Digital Public Library of America, Digital New Zealand, Trove, Google Research, the Smithsonian, “Good, Form and Spectacle” and the BBC.

Rymvidas Laužikas presented an ignite talk on the LoCloud historic place name service during the main plenary session. Runar Bergheim presented the Geocoding service during one of the parallel conference sessions on data quality. Kate Fernie presented work on the CARARE metadata schema with Valentine Charles of Europeana during a parallel session on data modeling.

A project poster was presented in the exhibition area of the conference and attracted a good level of interest amongst the developer community (see the poster in section 3.1 below). The project was well represented by partners at the conference, a mid-term plenary meeting having been held at the National Library of France on the day before the EuropeanaTech conference started.

Rymvidas Laužikas present the challenges of Historic Place Names at EuropeanaTech

ICOMOS Workshop, ICOMOS 18th General Assembly, 11 November 2014, Florence, Italy

A LoCloud workshop was organised by the Archaeology Data Service and the National Archives of Norway during the 18th General Assembly of ICOMOS in Florence.

LoCloud at the ICOMOS 18th General Assembly: Kate Fernie (2Culture Associates), Holly Wright (Archaeology Data Service) and Silvia Alfreider (National Archives of Norway).

The objectives of this workshop were to stimulate discussion and collaboration between curators, experts and stakeholders in digital libraries, cultural heritage, tourism and local communities about new ways to make holdings more widely available; and to showcase the latest developments in supporting small and medium-sized cultural institutions in making their digitised collections available online, via the Europeana portal, through the LoCloud project.

The event included the following presentations:

- Overview of the LoCloud project, and how local cultural institutions can get involved, Kate Fernie, 2Culture Associates, UK
- Overview and demonstration of LoCloud mapping tools and cloud-based services for Europeana, Dimitris Gavriliis, ATHENA Research Centre, Greece
- Overview and demonstration of LoCloud Collections: a new collection management system for small to medium sized organisations to make their collections available online, and discoverable within Europeana, Holly Wright, Archaeology Data Service, University of York, UK
- Overview and demonstration of geographic location and map based services for local heritage within LoCloud services for Europeana, Siri Slettvåg, Avinet, Norway
- Support for communities and cultural tourism, Silvia Alfreider, National Archives of Norway, Norway

The workshop raised interesting and lively discussions on the topics addressed and a number of participants showed interest in the project. The event was also useful networking exercise, being part of the ICOMOS conference, which attracted a considerable number of International participants from cultural heritage institutions.

Workshops in the Balkan countries

Zavod Jara, BGB and GKR organised a series of workshops in four Balkan countries: Bosnia and Herzegovina, Montenegro, Macedonia and Albania.

The programme for each workshop consisted of two main parts: a general presentation of the LoCloud project and its services; and a practical workshop on LoCloud collections - how to set up a digital library for small institutions.

The partners anticipated that about 25-30 participants, mainly from small institutions, would attend each workshop. By the end of the series a total of 121 people had participated in the workshops. The details of the workshops are shown in the table below.

Place	Date	Co-organizers	Presenters
Cetinje , National library of Montenegro "Đurađ Crnojević" Montenegro	15th April 2015	Jelena Đurović and Vjenceslava Ševaljević from National library of Montenegro "Đurađ Crnojević"	Predrag Djukić / BGB, Andreja Silić Švonja /GKR
Trebinje , Hotel Leotar, Annual Meeting of Library Association members Republic of Srpska	16th April 2015	Stojka Mjatović from Librarians Association in Republic of Srpska	Predrag Djukić / BGB, Andreja Silić Švonja /GKR
Skopje , National and University Library "Sv. Kliment Ohridski", Macedonia	7th May 2015	Viktoria Kostoska from National and University Library "Sv. Kliment Ohridski" and Ivanka Sokolova from Public Library Brothers Miladinovci in Macedonia	Breda Karun / Zavod Jara, Andreja Silić Švonja / GKR
Sarajevo , Faculty of Economics, University of Sarajevo Bosnia and Herzegovina	26th May 2015	Biserka Sabljaković from Faculty of Economics Library in Sarajevo and Nadina Grebović-Lendo from BAM Association of Informational Professionals from Libraries, Archives and Museums in Bosnia and Herzegovina	Breda Karun / Zavod Jara, Andreja Silić Švonja / GKR
Tirana , Medicine University Library, Albania	3rd June 2015	Monika Luarasi from Science Library Polytechnic University of Tirana and Lindita Papadhopulli from Medicine University Library in Tirana	Sara Vukušić / GKR, Andreja Silić Švonja / GKR

Distance learning courses

Hacettepe University, Turkey implemented the LoCloud eLearning course in their distance-learning environment between December 2015 and January 2016. To date there have been 79 participants in the course.

3 Means of dissemination

3.1 Dissemination materials

A set of promotional materials were prepared and made available for use in the first year of the project. These materials include:

- A project leaflet
- A general poster translated in all partner languages
- A technical poster produced in February 2015 for the Europeana Tech conference, providing an overview of the LoCloud services; translations are being made available
- A project fact sheet
- A LoCloud PowerPoint presentation template.

LoCloud: Beyond the Space

LoCloud Collections

- Lightweight, out-of-the box repository
- Provided as a service
- Dedicated to small memory institutions
- Simple, easy to start
- Supports multiple collections
- Supports many data formats
- Customizable interface
- Online support
- Multilingual
- Compatible with Europeana
- Highly available

MORE

The services for harvest, Ingest, Validate, Transform, Enrich and Publish takes part in MORE, which has the following features:

- Enrichment micro-services
- Multiple input sources
- Curation oriented
- REST API support
- Many formats
- Easy to use
- Flexible
- Scalable

OAI-PMH

MINT

- Provides users the ability to perform a mapping of their own metadata schemas to reference domain models (LIDO , EDM, Carare Schema)
- Follows a typical web based architecture
- Supports multiple organizations
- Compatible with Europeana

Other Services

Wikimedia

Web Service that uses a REST interface Communicates with Wikimedia commons and facilitates the exchange of information which include:

- Title
- Description
- Date
- Image (url)
- Source

LoCloud Crawler

A set of tools to automatically extract structured metadata from HTML web pages.

Enrichment Micro-services

Background Links

- Automatically links items in the collections to background information contained in DBpedia pages.
- REST service

Geo-coding

- Facilitates geocoding of existing cultural heritage data without location information that can be resolved to coordinates
- REST API support

Vocabulary Matching

- Create, manage, publish, share, re-use of Ontologies, taxonomies, Thesauri
- Multilingual vocabularies and format
- REST API support

Thesauri

- Automatically links relevant information from the metadata to relevant classes in a provided vocabulary.
- REST service

Historic Place Names

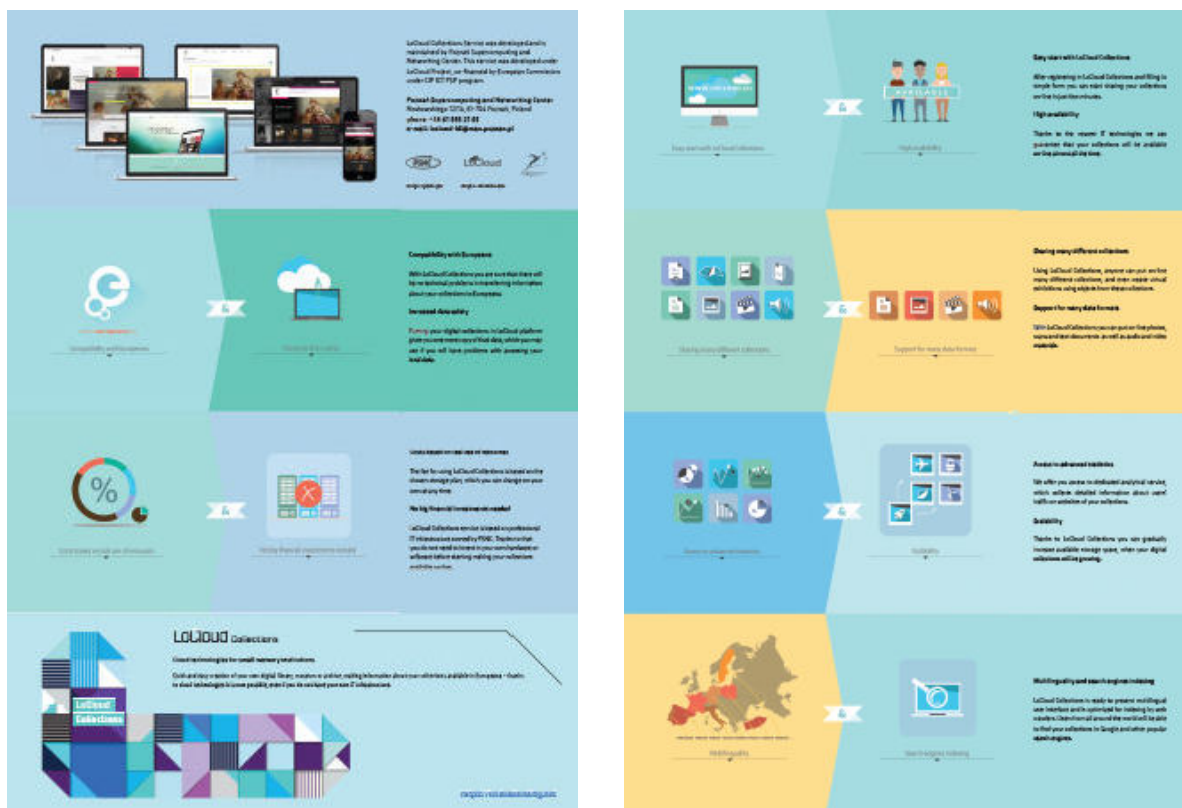

- Semi-automatic historical geo-information management functions
- Designed for aggregation and enhanced usage of digital heritage information.
- REST API support

www.locloud.eu

LoCloud is co-funded under the CIP ICT PSP programme

LoCloud technical poster

A new LoCloud Collections leaflet was produced by PSNC as marketing collateral and for distribution at the Final Conference.

LoCloud Collections leaflet

Partners have worked with 2Culture to translate promotional materials into their national languages. The technical poster, leaflets, press releases and a range of other materials have been made available in partners' languages.

All dissemination materials are available to members of the project for download from the LoCloud website.

3.2 Videos

NRA and UoY ADS developed a video about LoCloud during the first year of the project. The video provides an introduction to the project and its vision for developing cloud-based services for small and medium sized cultural institutions.

The video is available on the home page of project web site and also in YouTube at: <https://youtu.be/Vyo7Z4KClow>.

A YouTube channel⁴ was established to upload the introductory video. Two further videos have since been uploaded: a screen cast of the Geocoding service made by AVINET and a showcase of entries to the LoCloud Competition made by 2Culture Associates for the Final project conference.

⁴ <https://www.youtube.com/channel/UCLfjUUivJWpqzqjKTOWgtQ>

Snapshot of the LoCloud introduction video

A series of training videos demonstrating the LoCloud Services were produced by PSNC and are available on the project's support portal at: http://support.locloud.eu/Training_Videos. The video's are delivered using the Interactive Scientific TV platform in Pioneer network.

3.3 Web site

The LoCloud web site (<http://www.locloud.eu/>) was launched by MDR in the first month of the project (March 2013) and is now maintained and developed by 2Culture. The site provides information about the project, and includes an intranet section for members of the project consortium.

The public area of the web site includes:

- About – the project, consortium and activities
- News – news bulletins and newsletters
- LoCloud Collections
- Resources – presentations by project partners, publications, dissemination materials, links to related projects and initiatives
- Support – links to the LoCloud support centre, providing access to documentation, learning materials, questions and answers, and help desk
- Events – events of interest to the LoCloud community
- Get involved – a section providing information for small and medium sized organisations interested in joining LoCloud
- Contacts – How to contact the LoCloud project.

The latest additions to the project website were sections for the LoCloud Competition (<http://www.locloud.eu/LoCloud-Competition>) and for the Final conference.

The screenshot shows the LoCloud website's competition section. At the top, there is a navigation bar with links for About, News, LoCloud Collections, Resources, Support, Events, Get Involved, and LoCloud Competition. The LoCloud logo is prominently displayed on the left. Below the navigation bar, the main heading is "LoCloud Competition" with a sub-link for "Competition Information". The text below the heading reads: "A big thank you to all of those of you who entered the LoCloud Competition! The international competition invited students, curators and others to explore their local history through Europeana and share their story in the My Local Heritage competition. The mission was to find images, texts, film and sound from the archives on www.europeana.eu and relate these to a story about a place and its people. We received many highly enjoyable entries from across Europe. An international jury consisting of Vilde Ronge, the Assistant Director at Riksarkivet/the National Archives of Norway, Milena Popova of Europeana and Kate Fernie of 2Culture Associates, chose a winner and a runner-up in the competition. LoCloud is holding a conference in Amersfoort, the Netherlands on 5th February 2016, during which we will showcase the competition entries and award prizes to the winners." Below this text are two links: "Read competition news" and "View details of the competition entry requirements". The section then introduces the winner with the heading "And the winner is..." and a photograph of a group of people on a boat. The text next to the photo reads: "Maribor in the past and today Slovenia Mihael Muršec, a second grade high school student from Slovenia, was placed first with his video entry: Maribor in the past and today. 'I've been interested on multimedia since the primary school' says Mihael Muršec. 'I'm a member of the school computer club in II High school, Maribor. I directed and mounted the video that was recorded by the other members of the club: Sven Pušnik, Patrik Rek, Nejc-Filip Svenšek'."

The competition section of the website provides access to all of the entries

The web site is made available in English. Partners have created pages about the project and specific activities (such as press releases and the Competition) in their national language on their own websites. See for example: <http://www.locloud.eu/LoCloud-Competition/Competition-Information/In-your-country>.

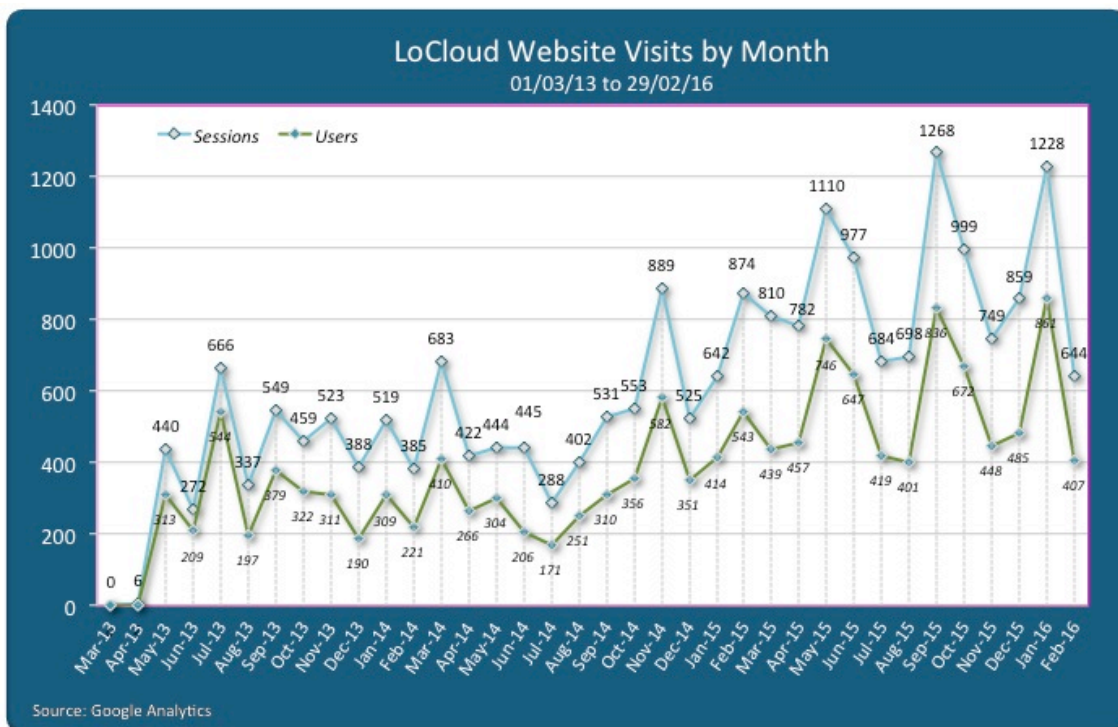

Website statistics

Below are some **statistics on access** to the LoCloud web site during whole project lifetime, from 1st March 2013 to 29th February 2016.

Note: While systems are in place to prevent visits from site administrators (by IP and by website account), these systems are not 100% reliable, and may result in inflated visit counts from the UK. Google Analytics does not record visits from users with JavaScript disabled. There are no accurate figures for the percentage of users with JavaScript disabled, but is generally considered somewhere between 2% to 3%. Where easily identifiable, data for visits and referrals from crawlers and spambots have been excluded from these results.

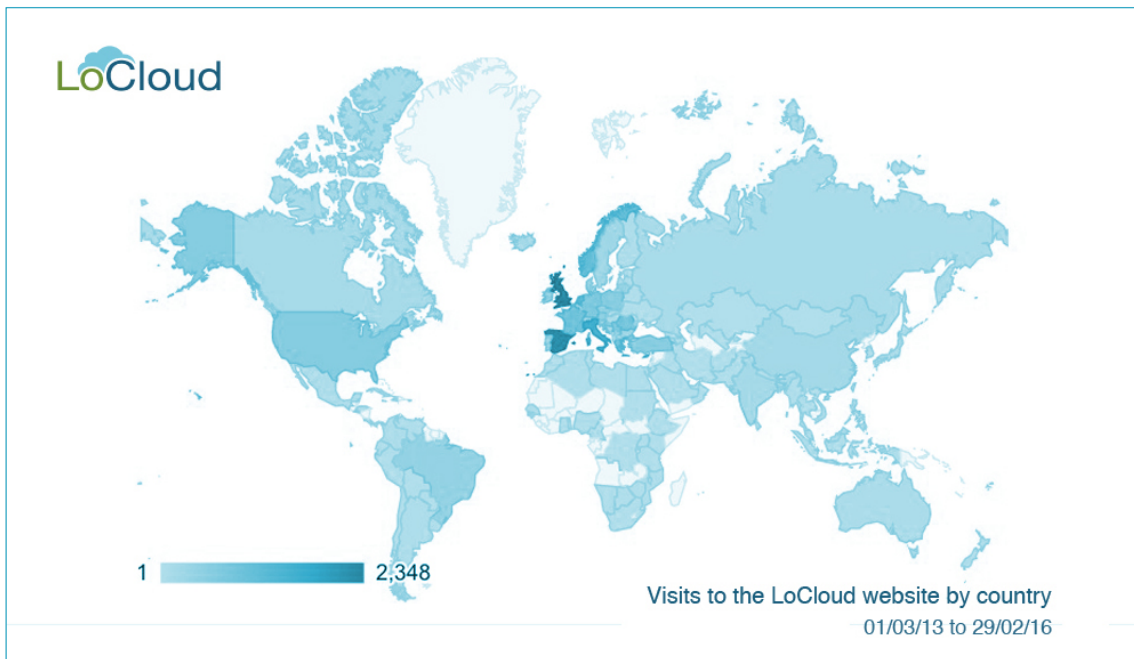

Visits

During the last year, the number of visitors has increased by over 50% since the previous period. The total number of visitors across the whole three years stands at 14,638 with 72,816 page views in 22,711 sessions.

Analysis of the demographics shows that the UK provides the largest source of visitors (10.6%). Spain is the next largest source (10%) with Italy (6.9%), Cyprus (5.5%) and Norway (4.9%) the next largest sources of visitors to the website. The last twelve months have seen increases in the relative numbers of visitors from Spain, Serbia, Croatia and Slovenia; this probably reflects widespread dissemination about the LoCloud Competition by partners in those countries.

Visits by country to the LoCloud website

Percentage of visits by country to the LoCloud website, 01/03/2013 to 29/02/2016

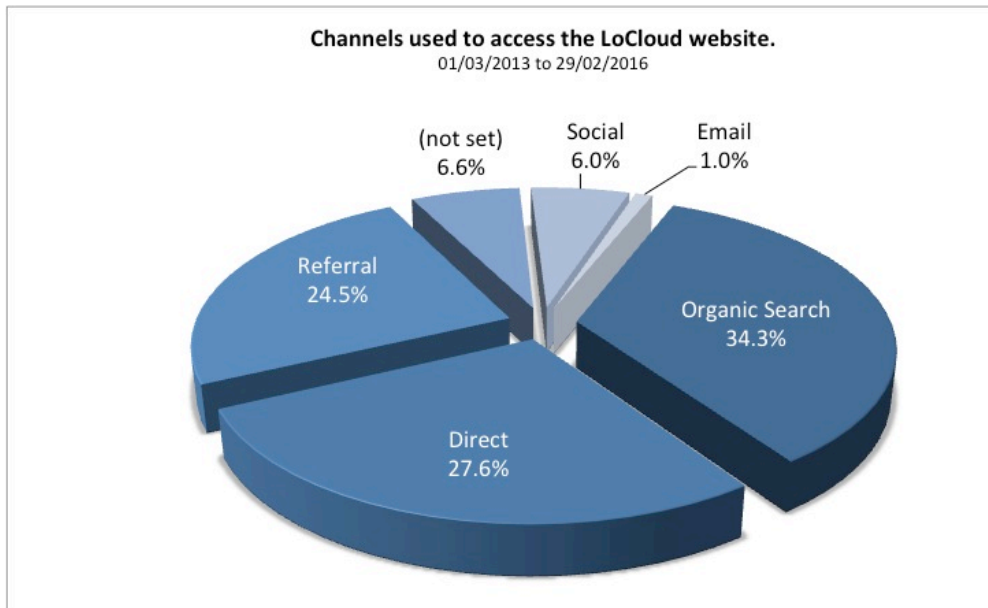

Total number of countries: 141

Country	% Visits	Country	% Visits	Country	% Visits	Country	% Visits
United Kingdom	10.62%	Belgium	1.82%	Albania	0.30%	Saudi Arabia	0.08%
Spain	10.05%	Lithuania	1.62%	Japan	0.27%	Kosovo	0.08%

Czech Republic	1.86%	Macedonia	0.35%	Philippines	0.09%		

Source Google Analytics

Sources of traffic to the LoCloud website

The main sources of traffic to the website are from organic search on search engines (34.3%), direct traffic (27.2%) and referrals (24.5%).

Note: Channel data is not available prior to 25 July, 2013.

Referrals to the website

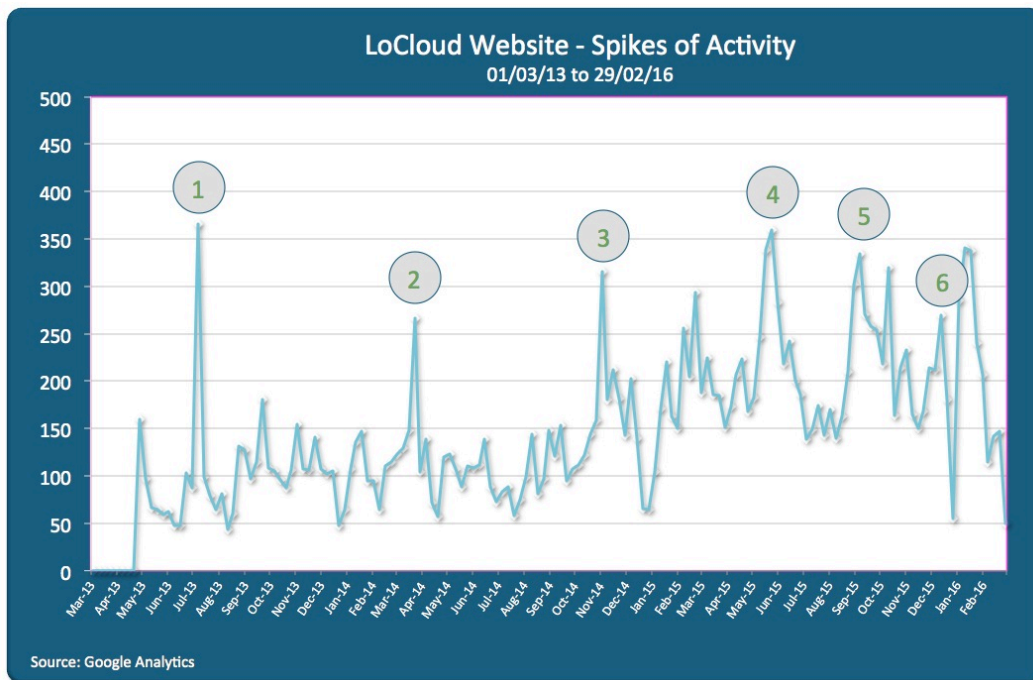

There have been 7,293 referrals from 485 sources over the duration of the project. Measures have to been taken to remove web crawlers from these statistics where practical. Over 20% of these have come via the social media channels (Twitter, Facebook and LinkedIn), around 10% via the partner websites and the remaining from a wide variety of other mainly CH-related sources.

The top 20 referrers are listed on the table below.

Referral Source	Sessions	% Total
t.co (Twitter)	675	9.26%
facebook.com	664	9.10%
culturalheritage2014.eu	369	5.06%
support.locloud.eu	289	3.96%
bjc.ro	274	3.76%

Peaks in visits to the website.

The peaks in visits to the website seem to relate to the following events:

1. Promotion of the project by mailing list in Spain, July 2013.
2. Promotion of the new LoCloud video launched on March 23 2014.
3. Promotions relating to the LoCloud workshop at ICOMOS Florence (11th November 2014) attracting traffic from the UK and Italy, combined with promotions of the LoCloud country workshop held in Cyprus in the framework of EuroMed 2014 in the same month.
4. Dissemination activities relating to the press release announcing the launch of the LoCloud competition on May 13 2015.
5. September and October – further dissemination of the LoCloud competition. 2 tweets on 8th September promoting competition.
6. Announcement and promotion for LoCloud Conference during January and February 2016.

Top Content

The top content on the LoCloud website across the whole period was the home page (22.3%) followed by news (10.2%), the resources section (9.2%), Events calendar (6.6%), About page (6.4%) and the Competition pages (5.9%).

Page	Pageviews	% Total
Home	16,062	22.26%

Activities	1,303	1.81%
Newsletter	1,081	1.50%
Other	21,459	29.75%
Total	72,141	100.0%

Source: Google Analytics

During the final 12 months (1st March 2015 to 1st March 2016), the LoCloud competition pages were the most viewed part of the project website after the home page. LoCloud Collections also increased its share of the traffic receiving 5.92% during this final period.

New vs. Returning Visitors

The site analytics show that over the three years 35.5% of visitors returned to the site. The remaining 64.5% of visitors did not have a Google Analytics cookie when they visited; this could mean either that they had deleted their cookies or that they were genuinely new visitors.

3.4 Social networks

Twitter: LoCloud Project
<https://twitter.com/LoCloudProject>
 Tweets: 317
 Retweets: 472
 Followers: 232
 Included on Lists: 15

LoCloud’s twitter account has increased its reach in the last 12 months, nearly doubling the number of followers and maintaining a high level of retweets.

Slideshare
 The account is used to share presentations project given by partners at events, reports, LoCloud deliverables and promotional materials. The presentations are embedded into the LoCloud website using the slideshare viewer. The table below shows the number of views by document type since the start of the project.

Document Type	No.	Slideshare views
Presentations	41	15,537
Documents	28	9,231
Promotional Materials	11	985
Total	80	

In total there have been **25,753 views** (of which 9,338 are embeds) since the start of the project. This is 150% increase in the number of views (over 15,000) in the last year, which is an indication of the interest in the project generated through dissemination activities during the year. The top viewed presentation with 811 views was given by Agnes Vatican during the LoCloud workshop at Digital Heritage 2015.

A **YouTube** channel was established for the project. The “LoCloud Introduction” Video, LoCloud competition showcase and a screen cast of the GeoCoding service have been uploaded.

3.5 LoCloud Newsletter

The project newsletter has been produced twice a year. Editions were issued in August 2013, February and August 2014, February 2015 and September 2015. They are available from: <http://www.locloud.eu/News/Newsletter>.

A summary newsletter is distributed to email lists, and the full newsletter is uploaded to the project website. Notices about the newsletter are posted on social networks and email lists by project partners. Publishing a summary version of the newsletter with links to the full articles sends traffic to the project website.

The latest newsletter (September 2015) was distributed to about 101 recipients, and was actively promoted through social networks.

LoCloud Newsletter No.5 - September 2015

Welcome to the LoCloud newsletter. In this issue we are announcing the launch of a competition to encourage people to share their local history explored through Europeana and to showcase uses of LoCloud technologies. LoCloud partners are adding large numbers of items to Europeana from local collections held by museums, libraries, archives and house museums. In this issue we are showcasing a few items from these collections to hint at the riches to be explored. We hope to stimulate your interest and to encourage you to explore Europeana and share your discoveries via the **My Local History** strand of our competition.

Earlier this summer LoCloud released a series of training videos and online training courses demonstrating LoCloud technologies. We hope that you will find these resources valuable. We're looking forwards to hearing seeing examples of how LoCloud's APIs, services and applications are being used by institutions and developers via the **My LoCloud Services** strand of our competition.

This autumn and winter we will be presenting LoCloud's results at a number of international conferences culminating in the project's final event in Amersfoort on the 5th February next year. We hope to meet you at one of these events.

Kate Fernie, Project Manager

Second edition of

3.6 The LoCloud Competition

An international competition was organised to encourage people to explore a favourite place or part of their local history through Europeana, and present their experience online in the form of web pages, a blog or video.

The details of the competition and the call for entries were published online (see <http://www.locloud.eu/News/LoCloud-Competition>). A press release was prepared, partners translated the press release into their national languages and the competition was launched in May 2015. Most partners prepared a page about the competition on their own websites in their national language to support their dissemination activities.

The deadline for entries to the competition was originally October 2015 but this was extended to November to allow more time for school students to prepare entries. A total of 37 entries were received. These were judged by an international jury consisting of Vilde Ronge, the Assistant Director at Riksarkivet/the National Archives of Norway, Milena Popova of Europeana and Kate Fernie of 2Culture Associates.

Mihael Muršec, a second grade high school student from Slovenia, was placed first with his video entry: Maribor in the past and today. One of the pictures from his team's video is shown here (left).

Bogdan Stanciu, an experienced, award-winning journalist and non-fiction author based in Cluj-Napoca in Romania, was placed second with his blog post: The

Extraordinary Adventures of Private Nestor.

Both the winner and runner-up were invited to present their entries at the LoCloud final event, which was held in Amersfoort, Netherlands on the 5th February 2016. All the thirty-seven entries are available for viewing on the LoCloud website at: <http://www.locloud.eu/LoCloud-Competition>.

3.7 Publications

Partners have published fourteen papers and a much larger number of press releases, news articles and blog posts. The papers are listed below, while a full list of press, news and social media activity is included in Annex 2.

4 Conclusion

Over the three years of the project all partners have actively engaged in promoting LoCloud both to their internal stakeholders and external audiences. There have been a wide variety of activities targeting staff in small and medium-sized cultural institutions, national institutions, Europeana aggregators and projects, Europeana itself, and also researchers, and developers working in the domain of cloud computing. Throughout the project partners have reached out to stakeholders through presentations at national and international events, training workshops, through press releases, news on their websites, and to their networks via mailing lists and social media.

The project organised workshops during international conferences including the 18th general assembly of ICOMOS in Florence, Digital Heritage 2015 in Granada, TPDL 2015 in Poznan and Eva Jerusalem 2015. The final project conference in Amersfoort in February 2016 provided the occasion to celebrate the project's achievements and to announce the results of the LoCloud Competition and recognize the winners.

The substantial number of dissemination activities has been accompanied by press campaigns and activity in the social media in the partners' national languages, all contributing to raising awareness of the project's progress and results. Increased awareness of LoCloud during the final year is reflected in the large increase in visitors to the project website and to our Slideshare.

"I think cloud based services and infrastructure for the heritage sector are the future.

Such services will help institutions to offer better services and more high quality content to user all over Europe. I invite you to take part in these two competitions and help us, in a creative way, to see new possibilities and make further progress."

Gunnar Urtegaard, National Archives of Norway
