Ω = AB(→C)

between pravā and maṇi, BC repeats a portion from 99d -100d:

lohaṃ karatrayāt

śiśne tu vikṛtiṃ yāte trilohaṃ tatra jāyate

trikarādhaḥ samuddhāryam iti

The error probably arose when a scribe's eye jumped from the –lo of pravālo to the lo- of loha. At B the insert is bracketed for removal. At C it is not.
