| Abstract | A catalogue of the world genera of the Asilidae (Insecta: Diptera) is presented. More than 800 genus-group names are listed, of which 552 represent valid names for genera. Information on the original citation of each taxon, type species, and known distribution is given for all names. The genus <i>Epholkiolaphria</i> HERMANN, 1914 is synonymised with of <i>Choerades</i> WALKER, 1851 (syn. nov.). |

| Zusammenfassung | Ein Katalog über die Gattungen der Asilidae (Insecta: Diptera) wird vorgestellt. Dieser enthält mehr als 800 Namen, von denen 552 als valide Taxa einzustufen sind. Enthalten sind Informationen über die Originalzitate, die Typusarten und die aktuell bekannte Verbreitung. Die Gattung <i>Epholkiolaphria</i> HERMANN, 1914 wird mit <i>Choerades</i> WALKER, 1851 synonymisiert (syn. nov.). |

Introduction

HULL (1962) and PAPAVERO (1973) published the most recent generic catalogues for the family Asilidae. An updated catalogue of asilid genera is necessary to summarise the numerous nomenclatural changes and additional information on genera distributions published during the last 30 years.

The catalogue includes 528 valid genus-group names, 24 subgenera, 133 synonyms, 44 homonyms, 18 nomina nuda, and 71 misspelled names (818 entries). This catalogue reflects nomenclatural changes published before 2002 and reveals a 30% increase in the number of genus-group names.

The list of genus-group names contains information on the original citation of each taxon, the respective type species, and known distribution. The zoogeographical region in which the type species of every genus occurs is indicated by square brackets. Biogeographical regions are defined in the following works: Manual of Nearctic Diptera (MCALPINE et al. 1981), Catalogue of Palaearctic Diptera (SOÓS & PAPP 1988), Catalog of the Australasian and Oceanian Regions (EVENHUIS 1989), Catalogue of the Diptera of the Afrotropical Region (CROSSKEY et al. 1980), A Catalogue of the Diptera of the Oriental Region (DELFINADO & HARDY 1975), and A Catalogue of the Diptera of the Americas South of the United States (PAPAVERO 1967). The Australasian and Oceanian Regions are grouped in this work, following the most recent faunistic catalogue of Diptera that groups these two biogeographical regions (i.e., EVENHUIS 1989). The taxa are ordered alphabetically within subfamilies.

The list provided below should be used as a base for further studies, e.g. in nomenclature and phylogeny, and is particularly helpful as an update of currently recognised genera to everybody interested in Asilidae. In addition DIKOW has prepared a list of higher taxa in Asilidae, i.e. family-group names (DIKOW 2004). Both catalogues together will be an essential reference to everybody working on Asilidae and even Asiloidea.

The catalogue contains the information available up to the year 2002.

Abbreviations

Zoogeographical regions

- AFR = Afrotropical region
- AUS = Australasian and Oceanian region
- CHI = Chilean subregion
- NEA = Nearctic region
- NEO = Neotropical region
- ORI = Oriental region
- PAL = Palearctic region

Subfamilies of Asilidae

Acknowledgments

I would like to thank Torsten DIKOW (Cornell University, Ithaca, U.S.A.), Martin HAUSER, Kevin HOLSTON (University of Illinois, Urbana, U.S.A.), Dr. Robert LAVIGNE (Mount Barker, Australia), Dr. Jason LONDT (Natal Museum, Pietermaritzburg, South Africa) and Dr. F. Christian THOMPSON (Smithsonian Institute, Washington, U.S.A.) for helpful discussions and comments on an early draft of this paper. In addition I am indebted to the editors of this journal for publication of this extensive paper.
