Academy of Medical Sciences	
Data management plan required?	Yes - to maintain research integrity, institutions and researchers must ensure research data is preserved so that results can be verified and the data reused in future. The Academy expects all of its award holders to maximise the availability of research data. Therefore, in your application form you may be requested to provide a Data Management and Sharing plan.' In addition, they state that if the research data is of significant value to the research community then a data management and sharing plan should be submitted.
RDM policy Link	Policy is available within application guidance notes of all schemes
Definition of data	Not specified
Length of data management plan	Maximum 300 words
DMP template/ requirements	• Where and when will you make the data available? • How will others be able to access the data? • If the data is of high public interest, how will it be made accessible not only for those in the same or linked field, but also to a wider public audience? • Specify whether any limits will be placed on the data to be shared, for example, for the purposes of safeguarding commercial interests, personal information, safety or security of the data. • How will datasets be preserved to ensure they are of long-term benefit? • What resources will you require to deliver your plan? • Does your Institution have a data repository that is available to you?
Required data repository	Data should be deposited in a recognised, relevant and publicly available repository
Time for data release	Not specified
Time for long-term storage of data	Not specified
Costings	Not specified
Last updated	Not known
Contact Details	kelly.makarona@acmedsci.ac.uk
Comments	Data management and sharing plans should specifically be made for Daniel Turnberg Travel Fellowship. Plans will be reviewed as part of the funding decision.
