

## Additional file 1: IC<sub>50</sub> calculations for 85RF45.1 mAb

In both laboratories, rat 85RF45.1 mAb was tested at 1.2, 3.5, 10.4 and 31.3  $\mu\text{g}/\text{ml}$  in two feeding experiments (F1 and F2). Oocyst count in each mosquito and the best fit to a Hill equation are shown.
