THE PAN-AMERICAN MEDICAL CONGRESS.

SECTION ON GENERAL SURGERY.

The Section on General Surgery extends a cordial invitation to all medical gentlemen engaged in the practice of surgery; as teachers or practitioners in any of its branches, to participate in all its meetings and contribute papers for the general information.

Such papers should conform to the requirements, as set forth in the general regulations of the Congress.

In view of the wide extent of the constituency of the Congress and the varied human environment necessarily under observation, it is suggested that the topic of endemic or surgical diseases prevalent in each country might fittingly receive a large

share of attention from the members of this Section; but carefully-written papers upon any topic connected with surgical bacteriology, surgical pathology, or operative surgery of the regions, will be welcomed by the Section.

JOHN B. HAMILTON, *Executive President*.
