

**Familiar Lessons in Mineralogy and Geology, Designed for the Use of Young Persons and Lyceums.** In two Volumes. By JANE KILBY WELSH, Author of 'The Pastime of Learning, with Lessons in Botany.' Volume I. pp. 404. Clapp & Hull, Boston.

In addition to the works thus far noticed in the present number of this Journal, we have received for examination a handsome duodecimo bearing the above title. This volume contains lessons in Mineralogy and Conchology, written in a familiar style, suited for family use, and illustrated by about 80 engravings. The fair author of this manual has gathered information from sources the most authentic, and given it a form that cannot fail to be inviting to the mind of the young. Already well known, and having done a share of service to the rising generation by her illustrations of vegetable nature, she will fix still more firmly the foundation of her fame by these more profound investigations. The science of Botany is rendered familiar and attractive, more easily than that of Mineralogy; the phenomena of life afford, in the former, almost exhaustless sources of variety and beauty, by which the interest of the reader may be kept alive. In the present volume, Miss W. has exhibited a happy tact in accomplishing the same object, in a branch of science in which she had not their aid. We hope she may attempt, at some future period, the easier task of a similar work, in which sensation as well as life will furnish material for her descriptions.

**The Cholera Asphyxia of New York.** By MARTYN PAINE, M.D. pp. 160. New York.

This excellent volume consists of Dr. Paine's letters on the cholera recently published in this Journal, with several others of equal interest and value. We regret that the late reception of this work, and the want of room, must prevent our doing anything more than recommend it to the reader.

---

The favors of Drs. North and Allen were duly received.

---

Whole number of deaths in Boston for the week ending Oct. 27, 45. Males, 28—Females, 17. Of convulsions, 3—cholera malignant, 14—disease of the heart, 1—old age, 2—consumption, 5—lung fever, 2—croup, 1—mortification, 1—marasmus, 1—diarrhoea, 2—burn, 1—typhous fever, 1—intemperance, 1—dropsy on the brain, 3—teething, 1—accidental, 1—dysentery, 3—fever, 1—scarlet fever, 1—hooping cough, 1—drowned, 1.

## ADVERTISEMENTS.

### MEDICAL SCHOOL OF MAINE.

THE MEDICAL LECTURES at BOWDOIN COLLEGE will commence on MONDAY, the 18th day of February, 1833.

Theory and Practice of Physic, by JOHN DELAMATER, M.D.

Anatomy and Surgery, by REUBEN D. MUSSEY, M.D., Professor at Dartmouth College.

Obstetrics and Medical Jurisprudence, by JAMES MCKEEN, M.D.

Chemistry and Materia Medica, by PARKER CLEAVELAND, M.D.

The ANATOMICAL CABINET is extensive, and the LIBRARY is one of the most valuable Medical Libraries in the United States. Both are annually increasing.

Every person, becoming a member of this Institution, is required *previously* to present *satisfactory* evidence that he possesses a good moral character.

The amount of fees for admission to all the Lectures, is \$50. Graduating fee, including diploma, \$10. There is no Matriculating nor Library fee. The Lectures continue three months.

Degrees are conferred at the close of the Lecture term in May, and at the following Commencement of the College in September.

Boarding may be obtained in the Commons Hall at a very reasonable price.

Brunswick, October 8, 1832.

Oct. 31. eop5t.

P. CLEAVELAND, Secretary.

---

Printed and published by CLAPP & HULL, 184 Washington Street, Boston.—\$3 a year, in advance.
