**Table 2 - Global deaths for 235 causes in 1990 and 2010 for all ages and both sexes combined (thousands) and age-standardized rates (per 100,000) with 95 % UI and percent change**

| Cause | All Ages Deaths (thousands) |      |    | Age-Standardized Death Rates (per 100,000) |      |    |
|-------|-----------------------------|------|----|--|------|----|
|       | 1990                        | 2010 | %Δ | 1990                                       | 2010 | %Δ |

\* For these causes the mean value is outside of the 95% uncertainty interval. This occurs because the full distribution of 1000 draws is asymmetric with a long tail. A small number of high values in the uncertainty distribution raises the mean above the 97.5 percentile of the distribution.

Table 3 - Ranking of YLLs for top 25 global causes in 2010 and additional causes appearing within the top 25 causes for any region across 21 geographic regions ordered by overall global ranking

| Cause   | Global | AP HI | Europe Western | Australasia | NA HI | Europe Central | LA Sthn | Eurp Estrn | Asia East | LA Tropical | LA Central | Asia SE | Asia Central | LA Andean | NA/ME | Caribbean | Asia South | Oceania | SSA Southern | SSA East | SSA Central | SSA West |
