

# Python Relational Operator Swap

Set up the initial libraries and dependant functions.

```
#Installation example:  
#install.packages('hexbin', repos='http://cran.us.r-project.org')  
#Knit doesn't seem to be working in RStudio, R command:  
#require("knitr")  
#opts_knit$set(root.dir = "/data/anon/SemanticTransformation")  
#rmarkdown::render("./RSource/TransformationComparison.Rmd", params = list())  
  
#Note: Either before this or in this R script, remove cases where the  
#transformation = original (Only really need to check in the swap)
