# 1. Executive Summary

This document addresses the result of the Task 8.1: Developing the project website and intranet that focused the development of an external project website hosted http://www.recipss.eu/. Ιt also contains а description of Planview Projectplace<sup>®1</sup> (www.projectplace.com), the project management platform used as the internal repository as well as for internal communication and collaboration.

The website includes a summary of the project, presentation of the consortium, large scale demonstrators description, related initiatives, project news and events. It also contains a list of public deliverables from the project, together with publications, white papers and reports.

A partner-restricted information repository will be hosted for regular (non-classified) project internal communication and collaboration.

This document seeks to describe the structure and the main functionalities – pages, sub-pages, sliders, graphic, current content, menu, etc. – included in the project website.

In order to complete this task, the task leader (SIVECO):

- Created the website map and validated with all partners.
- Created/collected the website content and validated with all partners.
- Implemented and released the website.

<sup>&</sup>lt;sup>1</sup> Planview Projectplace® platform is a commercial service provided for ReCiPSS under an agreement between KTH and SUNET. The platform features more functionalises than what have been described in section 3. Further quires about the platform should be referred to Planview Projectplace®.

# 2. Website start-up

The address of the ReCiPSS website is: <a href="http://www.recipss.eu/">http://www.recipss.eu/</a>

The structure of the **ReCiPSS** website is as follows:

- ✓ Home
  - o Summary of the project
  - o Project News
  - Events
- ✓ About us
  - o Consortium
  - Advisory Board
- ✓ The Project
  - o Objectives
  - Large-Scale Demonstrators
  - o Impact
  - Related Initiatives
- ✓ Results
  - o Deliverables
  - o Reports
  - White papers
  - Publications
- ✓ Press and Media
  - News
  - Press Releases
  - Newsletter
  - Media
  - Promotional Materials
  - Presentations
- ✓ Contact us

Figure 1: ReCiPSS website structure and pages header

All the sections/pages presented above can be accessed through the Main menu, visible in all pages of the website.

### 2.1. Home

The **Home** page aims to provide a **Summary of the Project**, including **Project News** and **Events** related to ReCiPSS project.

The first page will appear as in the image below:

Figure 2 : ReCiPSS website home page

The **Home** page includes also a slider zone with pictures relevant for the project's topic. If the left arrow button or the right arrow button is pressed, the visitor can see the homepage slides.

Figure 3: ReCiPSS slider buttons

The slides that will be displayed are captured in the following pictures.

Figure 4: ReCiPSS first slide

Figure 5 : ReCiPSS second slide

### 2.1.1. Summary of the project

In the **Summary of the project** section a short presentation of the project is displayed.

Summary of the project

As part of the European Research Framework H2020, the European Commission supports the European industry in the large-scale build-up and implementation of circular manufacturing systems in order to drive a development towards a stable circular economy in the EU. The Research Project "Resource-Efficient Circular Product-Service-Systems" (ReCiPSS), kicked off on June 1st 2018.

Figure 6: Home page Summary of the project section

The entire content is shown in **Summary of the project** page which can be accessed either through **Read More** button or through **Summary of the project** menu element.

Events

World Remanufacturing Confer...
September 13, 2018

The ReCiPSS projects will be presented at an important event, World Remanufacturing Conference, during September 2018 thanks to FRAUNHOFER team. You can find more details for this event here: https://www.worldremanconference.com/

Figure 14: Events section

Figure 15: Events dedicated page

For each event from **Events** section a Linked in pictogram is displayed that allows visitors to share the content on his/her Linked In account by clicking the pictogram.

The buttons Previous and Next allow the visitors to navigate between events from Events.

### 2.1.4. Consortium

A slider with the logos of the project partners is displayed.

Figure 16: Home page Consortium section

The slider moves automatically in order that all the 13 consortium partners to be displayed.

### 2.1.5. Footer section

This section is shown on every page of the website. It contains the project logo, the project Linkedin Social Media page link and the Privacy Policy statement (Detailed in Annex A). Also, in the bottom of this section, an EU disclaimer is shown.

Figure 17: Footer section

### Related Initiatives

ResCoM

ResCoM, which stands for Resource Conservative Manufacturing, has developed a collection of methodologies and tools for the implementation of closed-loop manufacturing systems. Co-funded by the European Commission, the project concluded in October 2017. The ResCoM outcomes help designers and manufacturers understand how collection, remanufacturing and reuse of products can lead to more profitable, resource-efficient and resilient business practices compared to the current linear manufacturing system. The platform and tools are accompanied by a series of industrial case studies demonstrating the benefits of its application across various industries. ResCoM is the predecessor of the ReCiPSS.

For more information visit: www.rescoms.eu.

ERN also is a project that was concluded in 2017, that deals with remanufacturing good practice in the EU, also funded via Horizon 2020. With an EU market potential of €90bn by 2030, remanufacturing is set to become an increasingly important aspect of the future manufacturing industry Remanufacturing allows companies to strategically position themselves close to their customers whilst delivering economic and environmental savings ERN helps existing remanufacturers improve their operations and encourages new business to take up remanufacturing.

This website reports the outputs of the European Commission-funded project, European Remanufacturing Network funded under Horizon 2020. Below, you can find links to pages with more information on the project and tools and resources that it generated.

The enduring output of this project is the Conseil Européen de Remanufacture (CER, European Remanufacturing Council). This is a fee-paying consortium of enlightened

manufacturers who want to advance the European remanufacturing agenda including addressing the key priorities from the ERN project

For more information visit: www.remanufacturing.eu.

### A H2020 research and innovation project

The European Commission supports industry in large scale implementation of Circular Manufacturing Systems – a drive towards a stable circular economy.

Resource-efficient Circular Product-Service Systems (ReCiPSS) is a research project kicked-off on June, 1st 2018.

Two industrial large-scale demonstrators of the Automotive and the White Goods industry are involved in the project. ReCiPSS is co-funded by the European Commission's Horizon 2020 research and innovation programme under grant agreement No 776577-2.

As part of the white goods demonstrator, Gorenje gospodinjski aparati d.d., one of the leading European household appliances producer, will implement an innovative circular pay-perwash scheme for washing machines in 4 European countries.

As part of the automotive spare parts demonstrator, the Circular Economy Solutions GmbH together with Robert Bosch GmbH will streamline the reverse logistics flow for 80,000 cores, enabling aftermarket stakeholders to close the loop by using a single service provider for reverse logistics and by simplifying the existing complex trade levels.

The CoremanNet service network, well established in the European automotive aftermarket, will be the first to integrate these new services in its infrastructure.

To successfully implement the demonstrators, ReCiPSS will develop further circular tools/methodologies and will develop ICT platforms allowing data exchange for both cases. The platforms and the data exchange will enable usage tracking and remote monitoring, in the case of washing machines and value chain collaboration, in the case of automotive parts.

The project brings together 13 partners from 8 countries and will be coordinated by the KTH Royal Institute of Technology, Sweden, with the support of a unique consortium of experts, which consist of 4 research and 9 industrial partners.

More information about the project will be available soon at www.recipss.eu (the website is under construction).

# 3. Internal information repository: Planview Projectplace®

Planview Projectplace®, a project management software from Planview², is used for the ReCiPSS internal communication and collaboration. The structure of the ReCiPSS workspace in Planview Projectplace® is as follows:

- Overview
- Conversations
- Plan
- Board
- Documents
- Meetings
- Issues
- Members
- Recycle Bin

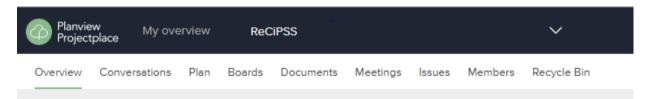

Figure 43: Planview Projectplace® structure and pages header

### 3.1. Overview

The **Overview** section aims to provide an overview of the current status of the ReCiPSS project as shown in Figure 44.

<sup>&</sup>lt;sup>2</sup> Planview is a global enterprise software company headquartered in Austin, Texas

Page 26 of 34

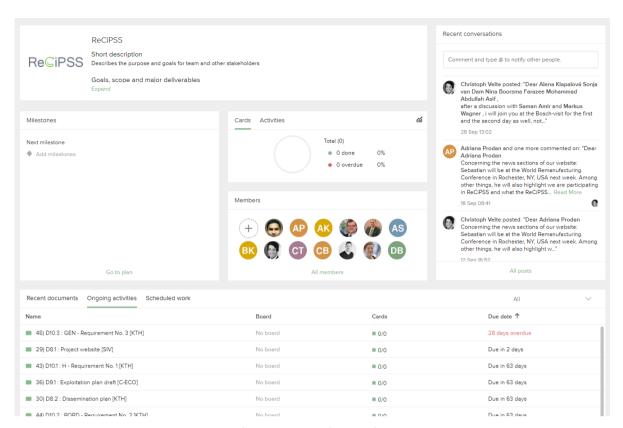

Figure 44: Overview section

The **Milestone** window provides an overview of the upcoming milestones including a short description and the deadline as shown in Figure 45.

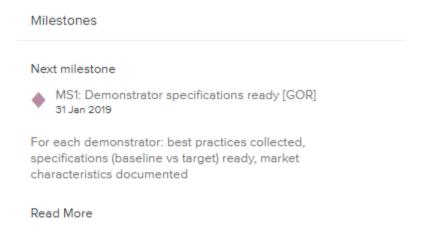

Figure 45: Milestones section

The Cards and Activities dashboard gives visibility into ongoing work as shown in Figure 46.

Figure 46: Cards and Activities dashboard

The **Recent document** section shows the documents that are recently uploaded or modified. For each document it is reported the author who modified it, the type of change and the date of change as shown in Figure 47. By clicking on the individual document, a separate window opens that shows a detailed information about the document and actions that can be performed (e.g. open, share, comments, etc.).

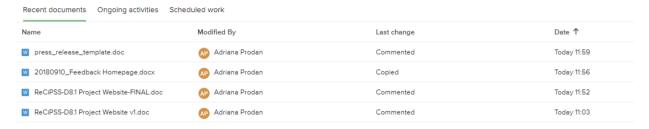

Figure 47: Recent documents section

The **Ongoing activities** section shows a list of the current activities and their due date as shown in Figure 48. By clicking on the individual activity a separate window opens, that shows a detailed information about the activity and the actions that can be performed.

Figure 48: Ongoing activities section

The **Recent conversations** sections reports the latest conversations between the members of the project as shown in Figure 49.

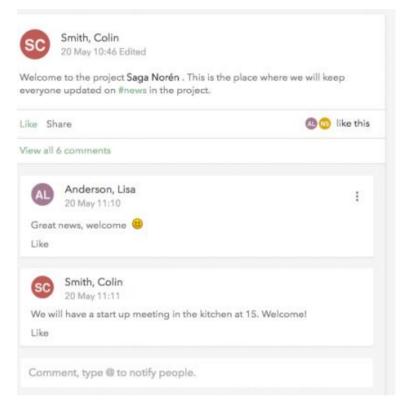

Figure 49: Recent conversations sections

### 3.2. Conversations

The **Conversations** tool shown in Figure 50 is used for communicating within the members of the project.

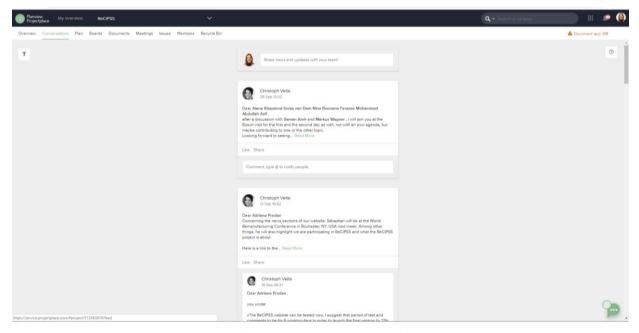

Figure 50: Conversations tool

### 3.3. Plan

The **Plan** tool visualizes the work using a traditional work breakdown structure on the left and a Gantt chart on the right as shown in Figure 51. In the *Plan* tool it is possible to add activities, milestones and important dates to the plan. The work that is being done on each activity can be seen by cards connected to the activity.

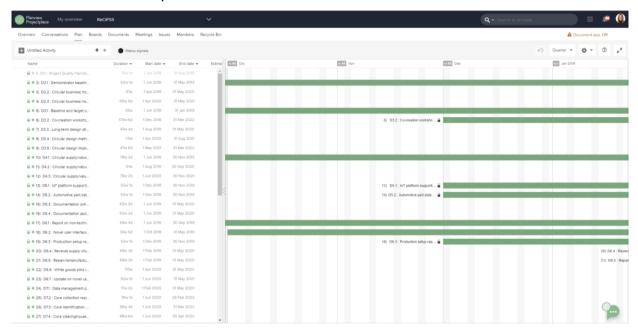

Figure 51: Plan tool

### 3.4. Documents

The **Documents** tool serves as a file repository and is used to share files and collaborate. The files can be organized into folders as shown in Figure 52.

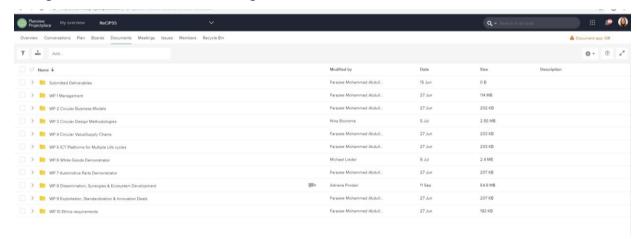

Figure 52: Documents tool

A document can be opened, shared or sent for review as shown in Figure 53. All the comments regarding the document are also visualized.

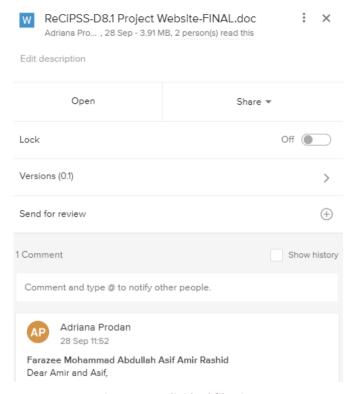

Figure 53: Individual file view

## 3.5. Meetings

The Meetings tool is used for managing meetings as shown in Figure 54.

Figure 54: Meetings tool

### 3.6. Members

In the **Members** tool a list of all the members participating in the project is reported including their contact information as shown in Figure 55.

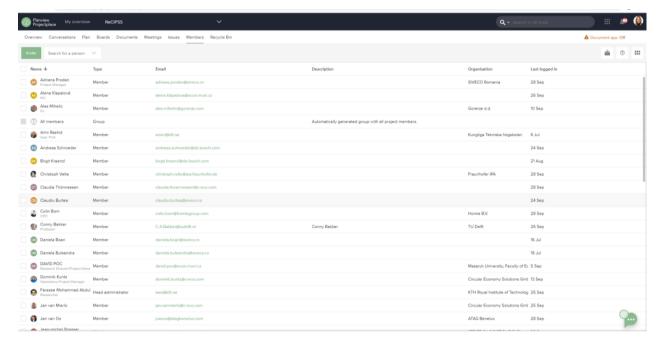

Figure 55: Members tool

# 4. Conclusions

The current deliverable presents the dissemination project website and the partner-restricted information repository used for internal communication and collaboration. Considering the project's duration (4 years) the website could evolve and new features could be implemented in order to cover project's needs related to dissemination objectives. The documentation will be updated each time a new feature will be added to this website. The content of the dissemination website will be permanently updated.

# 5. Annex A- Privacy Policy

### Standard Disclaimer

We will link to external sites that help us perform our mission — to inform about the ReCiPSS project. Links to external sites do not imply any official ReCiPSS endorsement of the opinions or ideas expressed therein, or guarantee the validity of the information provided.
