

Dear Prof. X,

As a library, we are responsible for the bibliometrics research and analysis in SDU. Your profile scored really high in a study we conducted concerning h-index analysis based on results retrieved from Scopus.

We would like to present you our findings along with your research footprint in scientific databases like Scopus, Web of Science, Google Scholar, ResearchGate and Orcid.

Would you be interested in having a recorded discussion with us over our findings?

The whole process will last approximately 30 minutes and has to be in person.

We are looking forward to your answer.

Best regards
