Training in Version Control and Project Management

How Do You Better Manage the Software Side of Your Research Project?

Introduction to Version Control and Collaboration with Git

- Inspired by Software Carpentry
- Twice per year, ~60 participants, ~30% remote

Intermediate Git

resoundingly positive feedback

What's Next for Us?

Managing Your Software Project with GitLab

Transition to the OPENedX platform

What Questions Do We Have?

How do the principles of pedagogy/andragogy apply to our particular audience?

How do we make software engineering best practices attractive to scientists?
