

# Joanna Leng: Me, the RSE Role and Innovation Board Games

UNIVERSITY OF LEEDS

Business and sociological plots show how new ideas and technology are adopted. I have been working on a paper (Securing the future of Research Computing in the biosciences, PLOS Computational Biology) where we have been trying to place IT services, research computing and RSEs on these plots.

- Where are you and the RSE role on these plots?
- Where is the computer hardware you use on these plots?
- Where is IT services?
- Where is a local HPC service?
- Where is your favourite programming language?
- Where is the development tools that you like to use?
