

REGISTRY

re3data.org meets the demands of researchers, funders, and publishers by providing each identification of appropriate research data repositories. This international collaboration

is the largest registry of data repositories in the world and includes information about over 1,300 repositories for data producers and users in all academic disciplines.

RESEARCH DATA REPOSITORIES

Based on its rich, descriptive schema re3data.org provides detailed information about the research data repositories. Distinctive icons help researchers easily identify relevant repositories for accessing and depositing data sets.

Information

The research data repository provides additional information on its service.

Access

The research data repository provides information on the terms of access to its data, database and upload.

Licenses

The terms of use and licenses of the data are provided by the research data repository.

Policies

The research data repository provides a policy.

Certificates

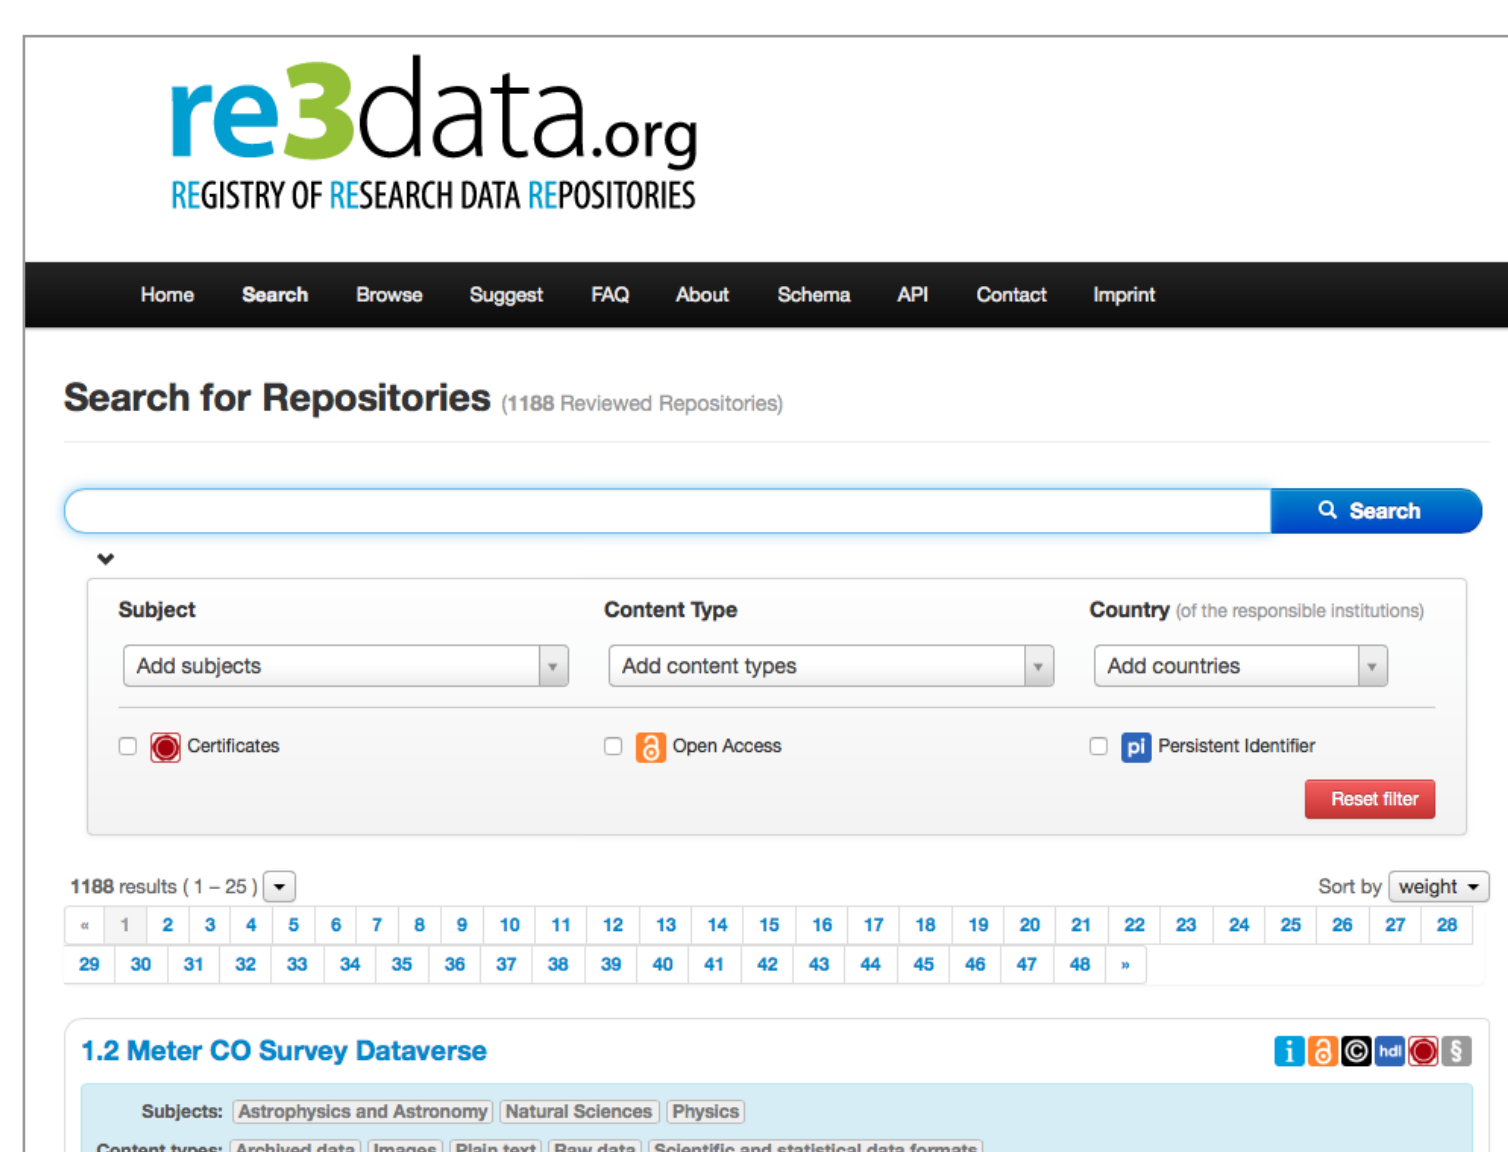

The research data repository is either certified or supports a repository standard.

Identifiers

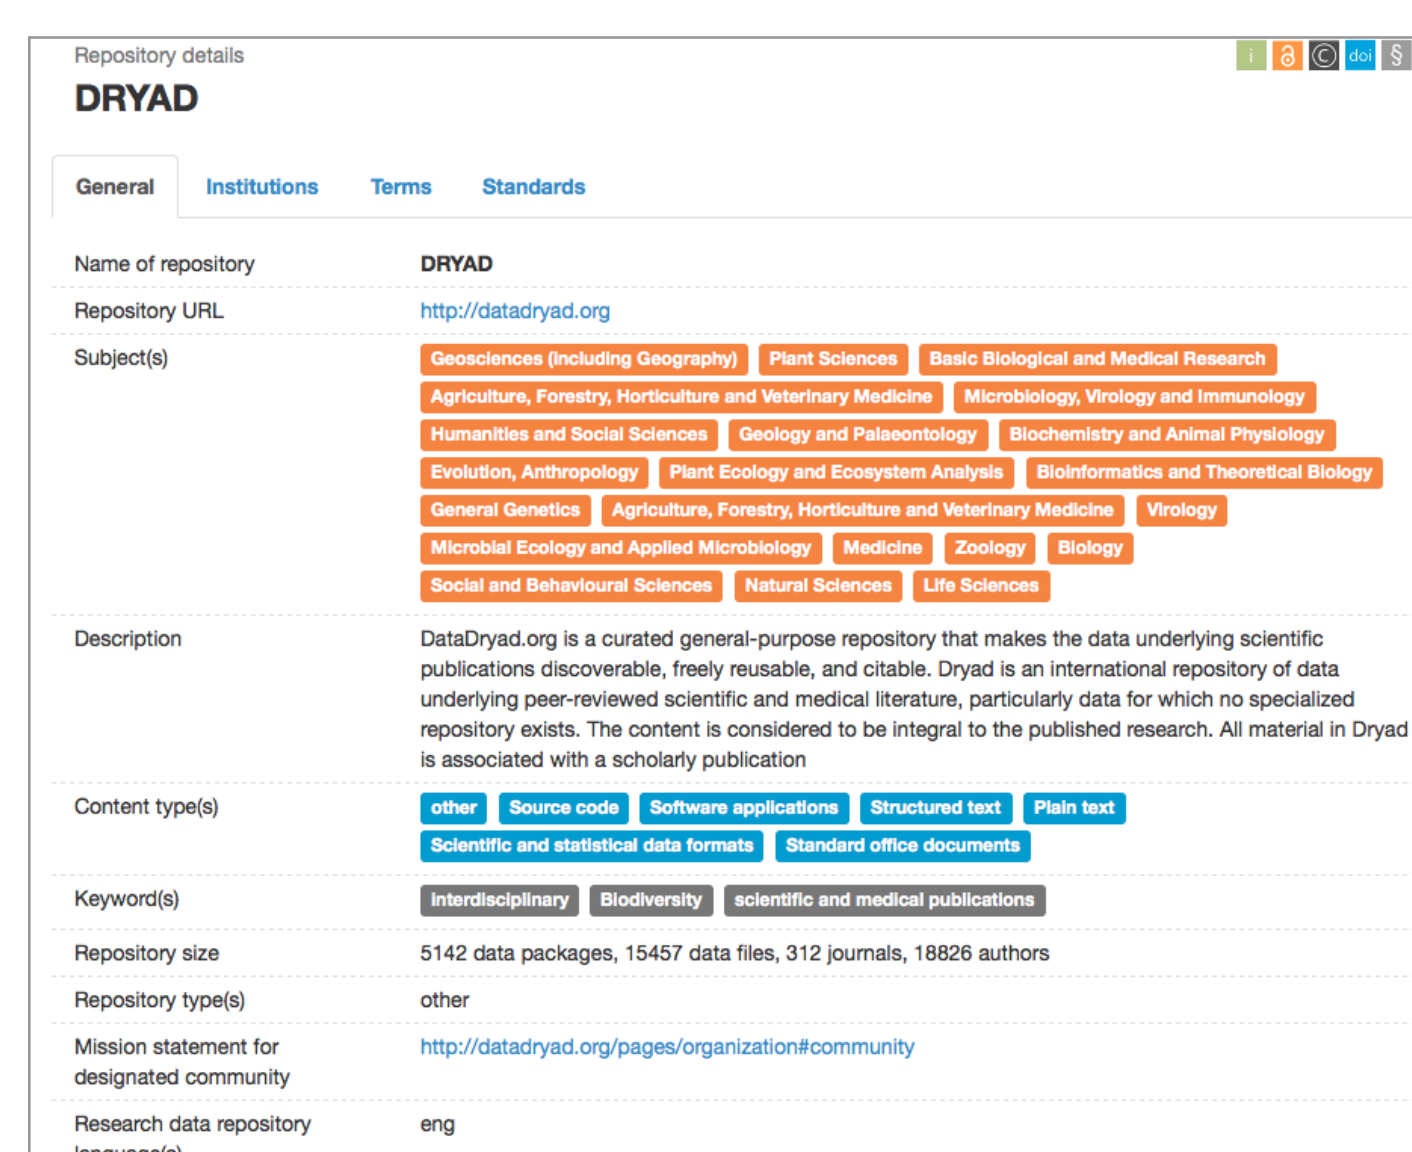

The research data repository uses a persistent identifier system to make its provided data persistent, unique and citable.

SEARCH

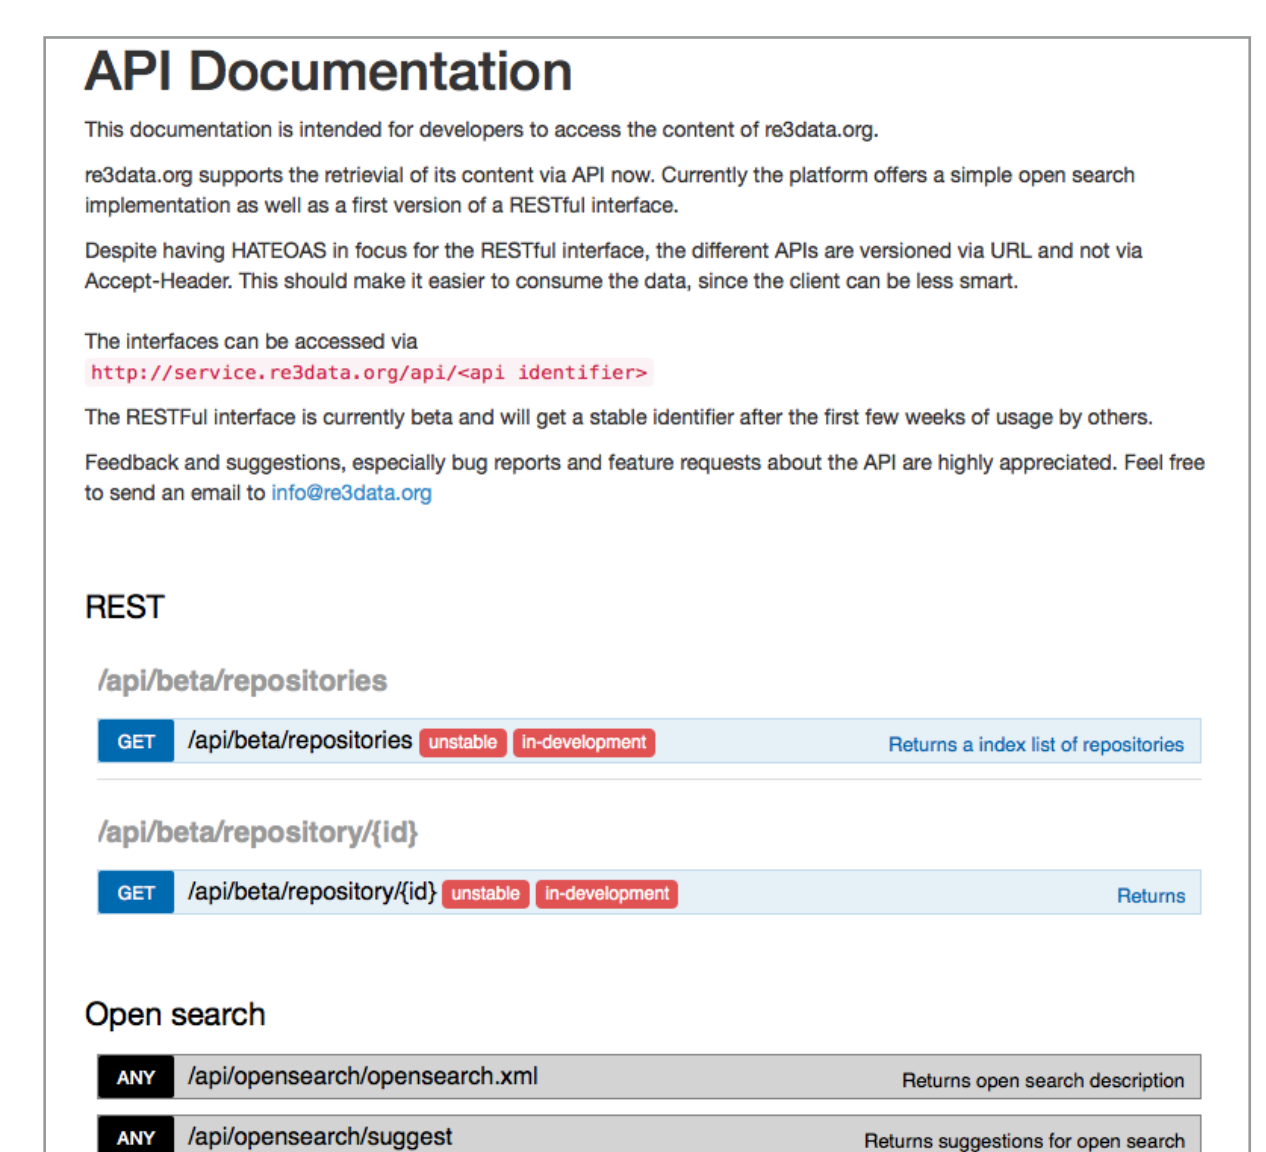

Browse and search for data repositories in your area of interest.

ENTRY

All entries are reviewed by an international editorial board.

API

Records from re3data.org can be retrieved through a machine interface as open data under the CC0 dedication.

FUTURE

After four years of project period re3data.org is transitioning to become an imprint of DataCite and to be included in its service portfolio by the end of 2015.
