
Build a BinderHub

The #TuringWay team
Sheffield workshop, 18th March 2019

Housekeeping

Agenda

9.30 - 10.00: Registration, coffee and introductions

10.00 - 10.30: Introduction to the workshop and The Turing Way

10.30 - 11.00: Introduction to Binder and why *you* should build a BinderHub

11.00 - 12.30: Zero to BinderHub

12.30 - 1.30: Lunch

1.30 - 2.00: Pico-WOW: Contributing to Binder

2.00 - 3:30: Collaborative working

2.45 - 3.00: (Coffee halfway through the hack)

3.30 - 4.00: Looking forwards: Progress review, lessons learned and future strategies

4.00 - 5.00: Optional hangout with instructors

The Turing Way

A lightly opinionated handbook
for reproducible data science

<https://github.com/alan-turing-institute/the-turing-way>

Including chapters on:

CL = requires some knowledge of the command line

https://github.com/alan-turing-institute/the-turing-way/blob/master/book_skeleton.md

Checklists for researcher, PI and admin team

- Researcher
 - Version control
 - Capturing compute environment
 - Writing and running the code
- PI
 - Results presented are those from the final run of the analysis
 - Check that another researcher can run the code
- Admin
 - Version control
 - Data and code archive
 - Open access publication

And more...

[About](#) [Programmes and Ever](#)

Collaborations Workshop 2019 (CW19)

Twitter: #CollabW19

The Software Sustainability Institute's Collaborations Workshop series brings together researchers, developers, innovators, managers, funders, publishers, leaders and educators to explore best practices and the future of research software. Collaborations Workshop 2019 (CW19) will take place from Monday 1st to Wednesday 3rd April 2019 at **Loughborough University** in the **West Park Teaching Hub**, Loughborough.

Image by Loughborough University.

The themes of the workshop are interoperability, documentation, training and sustainability.

[Register on the CW19 Eventbrite page](#)

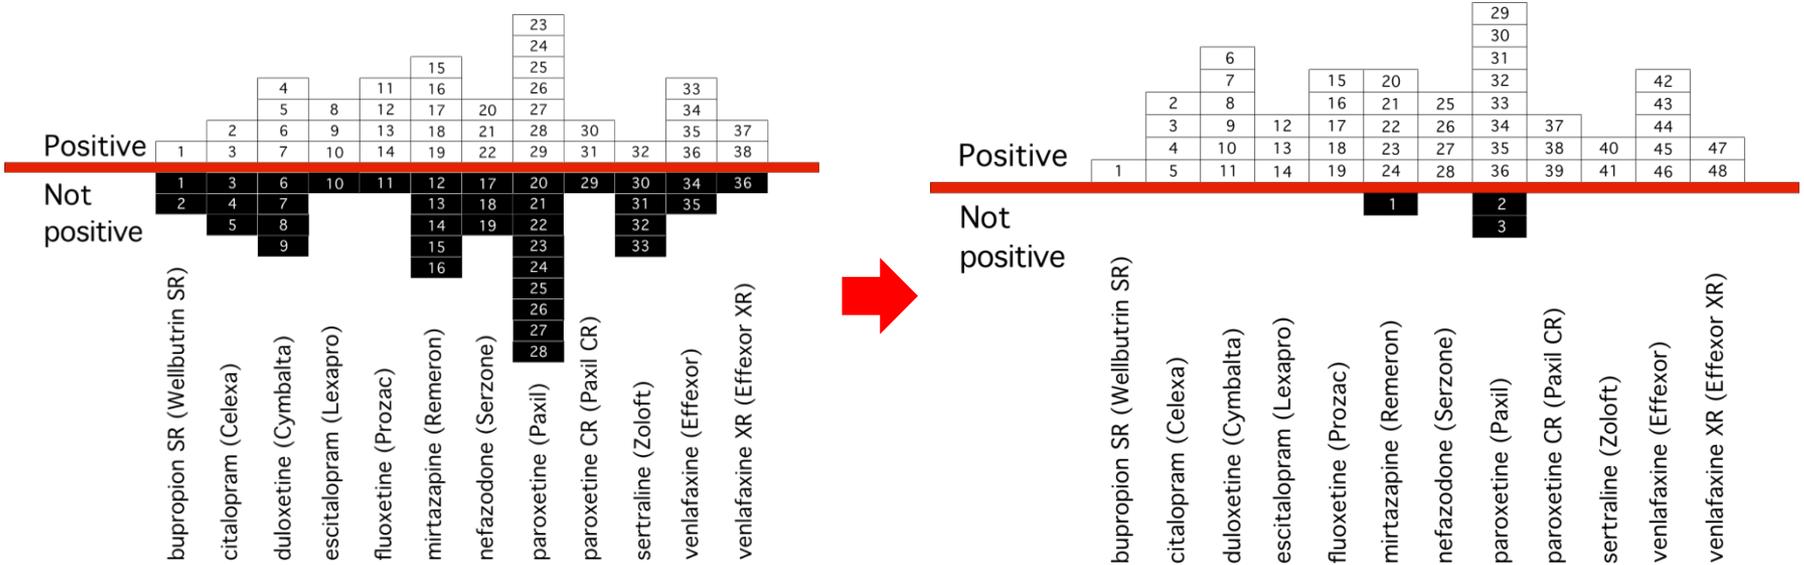

The background of the slide shows a blurred lecture hall. A whiteboard in the background contains several mathematical formulas. The most prominent one is the log-likelihood function for a Bernoulli distribution:
$$\ell(\theta) = \frac{1}{M} \sum_{m=1}^M \log \pi(y_m; \theta)$$
 Below this, another formula is partially visible:
$$q_{1/2}(\theta)$$
 The background also shows the silhouettes of people in a lecture hall, suggesting an academic or research setting.

Why does reproducible research matter?

What does reproducible mean?

		Data	
		Same	Different
Analysis	Same	Reproducible	Replicable
	Different	Robust	Generalisable

Why does this matter?

Dutch psychologist admits he made up research data

By Kate Kelland | LONDON

A Dutch psychologist has admitted making up data and faking research over many years in studies which were then published in peer-reviewed scientific journals.

Diederik Stapel, a psychologist working at Tilburg University in the Netherlands, said he had "failed as a scientist" and was ashamed of what he had done, but had been driven to falsifying research by constant pressure to perform.

The respected journal Science, which published some of Diederik Stapel's work earlier this year, issued an "expression of concern" editorial in which it said it now had serious concerns about the validity of Stapel's findings.

Reinhart, Rogoff... and Herndon: The student who caught out the profs

By Ruth Alexander
BBC News

© 20 April 2013

This week, economists have been astonished to find that a famous academic paper often used to make the case for austerity cuts contains major errors. Another surprise is that the mistakes, by two eminent Harvard professors, were spotted by a student doing his homework.

It's 4 January 2010, the Marriott Hotel in Atlanta. At the annual meeting of the American Economic Association, Professor Carmen Reinhart and the former chief economist of the International Monetary Fund, Ken Rogoff, are presenting a research paper called Growth in a Time of Debt.

At a time of economic crisis, their

How can the Turing Way help?

*Make
reproducibility,
“too easy
not to do”*

*Share the
responsibility
of
reproducibility*

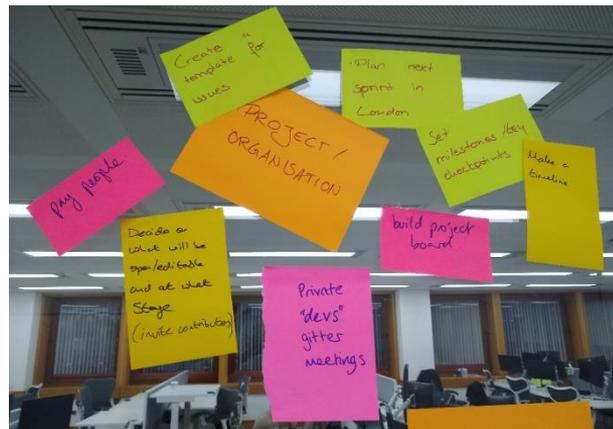

Plan for today

<https://github.com/alan-turing-institute/the-turing-way>

Goals

- Learn what Binder is and how it can help
- Build your own BinderHub!
- Feed back on BinderHub documentation and features
- Think about how a BinderHub for your institution/department could look like...

In a supportive and friendly environment!

Code of Conduct

“The Turing Way team are dedicated to providing a welcoming and supportive environment for all people...we do not tolerate behaviour that is disrespectful to our community members or that excludes, intimidates, or causes discomfort to others.”

https://github.com/alan-turing-institute/the-turing-way/blob/master/CODE_OF_CONDUCT.md

Code of Conduct

- Be respectful of different viewpoints and experiences.
- Use welcoming and inclusive language.
- Do not harass people.
- Respect the privacy and safety of others – stickers available if you don't want your photo taken
- Be considerate of others' participation.
- Don't be a bystander.

https://github.com/alan-turing-institute/the-turing-way/blob/master/CODE_OF_CONDUCT.md

Agenda

9.30 - 10.00: Registration, coffee and introductions

10.00 - 10.30: Introduction to the workshop and The Turing Way

10.30 - 11.00: Introduction to Binder and why *you* should build a BinderHub

11.00 - 12.30: Zero to BinderHub

12.30 - 1.30: Lunch

1.30 - 2.00: Pico-WOW: Contributing to Binder

2.00 - 3:30: Collaborative working

2.45 - 3.00: (Coffee halfway through the hack)

3.30 - 4.00: Looking forwards: Progress review, lessons learned and future strategies

4.00 - 5.00: Optional hangout with instructors

Introduce yourself
