

[<Files\\H15>](#) - § 1 reference coded [3.73% Coverage]

Reference 1 - 3.73% Coverage

The government has put restrictions to stop the cutting down of trees. We need to come together as a community to come up with measures to take care of the trees and the environment as a community and not depend on the government only. If we don't do this on our own, it may be too late to save our communities.

[<Files\\H23>](#) - § 1 reference coded [3.15% Coverage]

Reference 1 - 3.15% Coverage

If we all come together and discuss with the government and perhaps an area can be allocated to be used as a community garden where every house has a plot and people work together. This will help us

[<Files\\H24>](#) - § 2 references coded [3.26% Coverage]

Reference 1 - 1.12% Coverage

We are not coping well because we don't have machines to help with the irrigation

Reference 2 - 2.13% Coverage

We just need water pump. This is the way forward for us because our only hope now is water supply. If we are given water pumps we will be self-sufficient.

[<Files\\H25>](#) - § 1 reference coded [1.17% Coverage]

Reference 1 - 1.17% Coverage

We just need water pump, pipes and tanks to be able to support ourselves.

[<Files\\H26>](#) - § 2 references coded [8.85% Coverage]

Reference 1 - 4.62% Coverage

We have good underground water and one doesn't need to dig that deep to get water, so the potential to garden is huge but some people are not able to make gardens because they are not strong enough and our people lack knowledge of gardening and growing crops because we are mainly livestock farmers. We are not crop farmers.

Reference 2 - 4.22% Coverage

We received training on cropping, we are naturally livestock farmers and so growing crops is not in our culture and because of this, one training is not enough, we need more training and more knowledge on how to grow crops and make gardens. We need frequent training until we are fully equipped.

[<Files\\H27>](#) - § 1 reference coded [2.10% Coverage]

We need boreholes and water pumps to be able to help ourselves

[<Files\\H36>](#) - § 1 reference coded [1.53% Coverage]

Reference 1 - 1.53% Coverage

We have hunger in this community and we need a hospital. We need water supply to make gardens

[<Files\\H37>](#) - § 1 reference coded [2.34% Coverage]

Reference 1 - 2.34% Coverage

We don't have the capacity because we are left vulnerable, we have lost all we had. We need money from the government and social funds to help us.

[<Files\\H38>](#) - § 1 reference coded [1.61% Coverage]

Reference 1 - 1.61% Coverage

We could be helped with boreholes and especially hospitals. We want a community garden to help us.

[<Files\\H39>](#) - § 1 reference coded [3.40% Coverage]

Reference 1 - 3.40% Coverage

Perhaps we can be given a community garden that can support everyone and each family can be given a plot to grow food. We also need hospitals and cellphone receptions. Water can be provided through digging boreholes.

[<Files\\H41>](#) - § 2 references coded [12.71% Coverage]

Reference 1 - 2.27% Coverage

Maybe the government or perhaps international organizations could help to tackle these problems. If money is given, it can be used to help people make gardens and invest in education and in turn create jobs

Reference 2 - 10.44% Coverage

We need an irrigation system and tools to help us to successfully make gardens and make a living. We are very poor. There is no rain and plants just dry up and die. Another problem is, people do not have work, we look for work but there is no work to make a living, so there is no means of livelihood. The drought relief only helps for a few days and we get it twice a year. A pension fund for old people is not helpful because the families are very big and food is expensive. The only solution is a water supply to make gardens and this we currently do not have. The government can help us set up irrigations and water supply and help with the fence as well. We do not have

the capacity to do this ourselves. If we had enough water and tools, we will have a good livelihood. There is hunger in this community, and people don't have the means to change anything, they cannot buy pumps or tools and there is no rain, so we are as hopeless as can be.

[<Files\\H42>](#) - § 1 reference coded [12.28% Coverage]

Reference 1 - 12.28% Coverage

Anything that can possibly help us such as a garden.

Reference 2 - 5.29% Coverage

1. What do you think needs to be done to help these people to withstand climate change impacts?

We could be helped with frequent drought relief, a clinic and fodder for livestock. These things could help us

[<Files\\14>](#) - § 1 reference coded [3.12% Coverage]

Reference 1 - 3.12% Coverage

We could be given water pumps or water supply to make gardens and we can grow food. If this is done, I will not be a beggar anymore.

[<Files\\15>](#) - § 2 references coded [12.73% Coverage]

Reference 1 - 8.08% Coverage

We try to inform the government about drought but we have not received assistance yet. This year the government said we won't be given any relief because there is no drought, but they did not even come here to see for themselves, they went to other parts that have received good rains and made a decision that there is no drought, but there is severe drought in this community

Reference 2 - 4.64% Coverage

We just need a water supply, by digging boreholes and providing us with pipes to make gardens. This way, we will not depend on the rain and on the government. The soil here is very fertile and gardens will flourish.

[<Files\\16>](#) - § 1 reference coded [1.29% Coverage]

Reference 1 - 1.29% Coverage

We just need water supply to make gardens.

[<Files\\12>](#) - § 2 references coded [7.81% Coverage]

Reference 1 - 3.58% Coverage

If we are made aware of climatic predictions, we could plan in advance and relocate our gardens and plant early etc. If we are helped with things such as water pump to make gardens, our lives will be better.

Reference 2 - 4.23% Coverage

We need water pumps to have water supply for our gardens because it is hard to water by hands and fetching water from the river. A constant supply of water all year round to grow crops and vegetables all year round. We also need pipes and seeds.

[<Files\\13>](#) - § 2 references coded [4.00% Coverage]

Reference 1 - 2.68% Coverage

Since we have a river, this is our riches, so perhaps we can be assisted with installing pipes to get water from the river and establish gardens far from flood prone areas, this will really help us a lot.

Reference 2 - 1.31% Coverage

The government and organizations can reach out and assist the people who are suffering due to hunger

[<Files\\14>](#) - § 2 references coded [3.40% Coverage]

Reference 1 - 2.12% Coverage

Food to the hungry during perilous times, water pump to make gardens and fencing material to fence off our garden

Reference 2 - 1.28% Coverage

Water pumps to make our gardens. That is the most important request.

[<Files\\15>](#) - § 2 references coded [16.84% Coverage]

Reference 1 - 4.63% Coverage

The government could perhaps give us solar panels to run generators, instead of electricity and fuel. Also perhaps irrigation and water storage facilities. If we are provided with these, it will help us. We also need water tank with enough pressure like the ones in Etunda irrigation project. They should be erected on a good height to have enough pressure. If we are using energy from the sun, we won't run out.

Reference 2 - 12.20% Coverage

The government could perhaps give us solar panels to run generators, instead of electricity and fuel. Also perhaps irrigation and water storage facilities. If we are provided with these, it will help us. We also need water tank with enough pressure like the ones in Etunda irrigation project. They should be erected on a good height to have enough pressure. If we are using energy from the sun, we won't run out. The intervention by the government is helpful but not sufficient. For example, they give orphans and vulnerable children N\$250 per child and this is not enough. It does not help much because imagine what you can buy with N\$250, when children need food and cloths such as school uniforms. If they make it N\$1000, it is better and will feed the families. We do not have power and no assistance with even loans to help us with farming activities. Interventions such as small business loans to even start a take away, will be helpful to make a living and because you sign a contract, you need to find a way to be paying it back. These things are not implemented in this community

[<Files\\16>](#) - § 2 references coded [9.20% Coverage]

Reference 1 - 7.88% Coverage

It would help us if they can get us medicines and blankets. For gardening, the water here is salty and even if we plant gardens they are never successful because the water is bad. Perhaps we could get pipes bringing water from the river. I don't think this is achievable because they have not even given us electricity and network coverage. We no longer trust the governments or organizations as they don't really help much.

Reference 2 - 1.32% Coverage

If pipes could be provided for us to make gardens, that will be better.

[<Files\\17>](#) - § 1 reference coded [0.34% Coverage]

Reference 1 - 0.34% Coverage

Give us food.

[<Files\\18>](#) - § 2 references coded [4.62% Coverage]

4.

We have land but no means to use it. If we had water pumps and pipes, we can use it and make gardens to grow food. I know that if I am given this opportunity I will work hard.

[<Files\\K3>](#) - § 1 reference coded [5.20% Coverage]

Reference 1 - 5.20% Coverage

I think this community should be provided with machines and pipes, so that they can use these to grow crops and make gardens. We don't have running water or a constant water supply and this is the main problem too apart from drought.

[<Files\\K7>](#) - § 2 references coded [10.02% Coverage]

Reference 1 - 4.29% Coverage

The government could help people with generators to make gardens and become self-sufficient. One thing that pains my heart and many people is hunger. If the government can even donate generators for 5 families to share, both generators and land

Reference 2 - 5.73% Coverage

5.

People come here and shout to me as a leader demanding for solutions. I forward their requests to the government, their office in Opuwo but I have not received any feedback at the moment. The government could help give us generators to make things better for us. I think gardening and crops will sustain us more than livestock.

[<Files\\K8>](#) - § 1 reference coded [11.96% Coverage]

Reference 1 - 11.96% Coverage

We first need to be taught about climate change for us to be prepared. If we are informed in advance, then perhaps we can prepare ourselves. The main problem is the fact that people are hungry, there is no food. So they have a weak immune system and some are malnourished. No livestock, no livelihood, no means to survive, most livestock are dead. Our people are not educated, they don't have money and life is not easy and we don't have land for gardens. Only near the river and prone to flooding. There is also a danger of crocodiles near the river. It is difficult because they also don't have sufficient water to irrigate their gardens and they struggle to buy fuel for their generators because they do not have money. We know of Etunda garden and the government has given them some irrigation systems and they are flourishing. Here it is difficult without that. You can only do so much with your own hands and fetching water. Perhaps the government can also remove rocks to make the land suitable to grow crops and make gardens.

[<Files\\K9>](#) - § 1 reference coded [3.41% Coverage]

Reference 1 - 3.41% Coverage

6.

Perhaps we can be taught how to make baskets to sell and other crafts too and be provided with pipes to make gardens and grow food.
