

[<Files\\H11>](#) - § 2 references coded [2.91% Coverage]

Reference 1 - 0.74% Coverage

We have been receiving late rains and no cultivation as a result

Reference 2 - 2.17% Coverage

Normally we have floods every time it rains and most of the time we have drought because we have not been receiving rain. This year we had good rains but it came late and it caused a flood.

[<Files\\H13>](#) - § 1 reference coded [2.36% Coverage]

Reference 1 - 2.36% Coverage

**1. Have there been delays in the start of the rainy season and early ends of the rainy season in the past five years? If yes, why do you think so?**

Yes, the rain is delayed almost every year.

[<Files\\H14>](#) - § 1 reference coded [0.42% Coverage]

Reference 1 - 0.42% Coverage

Yes the rain is always delayed

[<Files\\H15>](#) - § 1 reference coded [2.12% Coverage]

Reference 1 - 2.12% Coverage

**2. Have there been delays in the start of the rainy season and early ends of the rainy season in the past five years? If yes, why do you think so?**

Yes, the rain is always delayed.

[<Files\\H16>](#) - § 1 reference coded [1.80% Coverage]

Reference 1 - 1.80% Coverage

There have been delays in the start of the rain, affecting the planting season. Even last year and this year, it came so late, too late to cultivate

[<Files\\H17>](#) - § 1 reference coded [0.57% Coverage]

Reference 1 - 0.57% Coverage

Yes the rain is delayed almost every year

[<Files\\H2>](#) - § 1 reference coded [3.06% Coverage]

Reference 1 - 3.06% Coverage

3.

Yes, the rain mostly comes late and we lose the planting season. Sometimes the rain comes in the tenth month and while you are just preparing your field and sowing in January and hoping it will rain till March, meanwhile the rain has already said its goodbyes leaving you standing in the field hopeless.

[<Files\\H20>](#) - § 1 reference coded [0.44% Coverage]

Reference 1 - 0.44% Coverage

Yes the rain is always delayed

[<Files\\H26>](#) - § 2 references coded [4.78% Coverage]

Reference 1 - 1.26% Coverage

For the past six years, we have had no rain at all and when it does come it is delayed.

Reference 2 - 3.53% Coverage

The rain fluctuates and comes rarely and for the past six years we had no rain at all. The vegetation and all our crops just dries up and we lose everything, crops, livestock etc. It is just hunger in this community, hunger for people and animals.

[<Files\\H3>](#) - § 1 reference coded [0.81% Coverage]

Reference 1 - 0.81% Coverage

Yes the rain comes really late, affecting the planting season

[<Files\\H34>](#) - § 1 reference coded [1.16% Coverage]

Reference 1 - 1.16% Coverage

The rain does not come at all, we just have hunger in this community.

[<Files\\H4>](#) - § 1 reference coded [0.82% Coverage]

Reference 1 - 0.82% Coverage

There have been delays in the starting of the rain but we don't know why.

[<Files\\H41>](#) - § 1 reference coded [2.32% Coverage]

Reference 1 - 2.32% Coverage

Yes it comes really late compared to how it was in the past. When it comes, it starts in February instead of November , the normal time and because of this the growing season is shortened and plants end up dying

[<Files\\H42>](#) - § 1 reference coded [0.43% Coverage]

Reference 1 - 0.43% Coverage

Yes the rains are always delayed

[<Files\\H43>](#) - § 1 reference coded [0.49% Coverage]

Reference 1 - 0.49% Coverage

Yes the rains are always delayed

[<Files\\H44>](#) - § 1 reference coded [0.45% Coverage]

Reference 1 - 0.45% Coverage

Yes the rains are always delayed

[<Files\\H5>](#) - § 1 reference coded [1.85% Coverage]

Reference 1 - 1.85% Coverage

Yes, the rain comes really late, even for the past years. This year it came late but it was much better compared to other years because we received more rain this year.

[<Files\\H60>](#) - § 1 reference coded [2.36% Coverage]

Reference 1 - 2.36% Coverage

With the rain. The season is really short, leaving crops in the field to die and we have no hope we are not able to do anything. Years can pass by without any rain at all

[<Files\\H7>](#) - § 2 references coded [1.56% Coverage]

Reference 1 - 0.48% Coverage

Yes the rain is delayed almost every year

Reference 2 - 1.07% Coverage

Without rain, we don't get any food from the wild. No fruits, no spinach. Maybe just wood.

[<Files\\H8>](#) - § 1 reference coded [1.05% Coverage]

Reference 1 - 1.05% Coverage

The rain has been delayed all these years compared to how it was in the past.

[<Files\\4>](#) - § 1 reference coded [4.88% Coverage]

Reference 1 - 4.88% Coverage

For rain, it comes late and has become rare. Long time ago, when we expected rain it always came and it came on time, for now we don't receive enough rain anymore. The flooding of the river used to be normal and harmless, now it has become worse and dangerous.

[<Files\\K6>](#) - § 1 reference coded [1.99% Coverage]

Reference 1 - 1.99% Coverage

Lack of rainfall that brings about drought. This should be researched on and addressed
