

Social Sciences & Humanities Open Cloud: What's in it for research libraries?

DARIAH's mission is to empower research communities with digital methods to create, connect and share knowledge about culture and society.

European Research Infrastructure Consortium - 18 member countries & several Cooperating partners

4 strategic pillars:

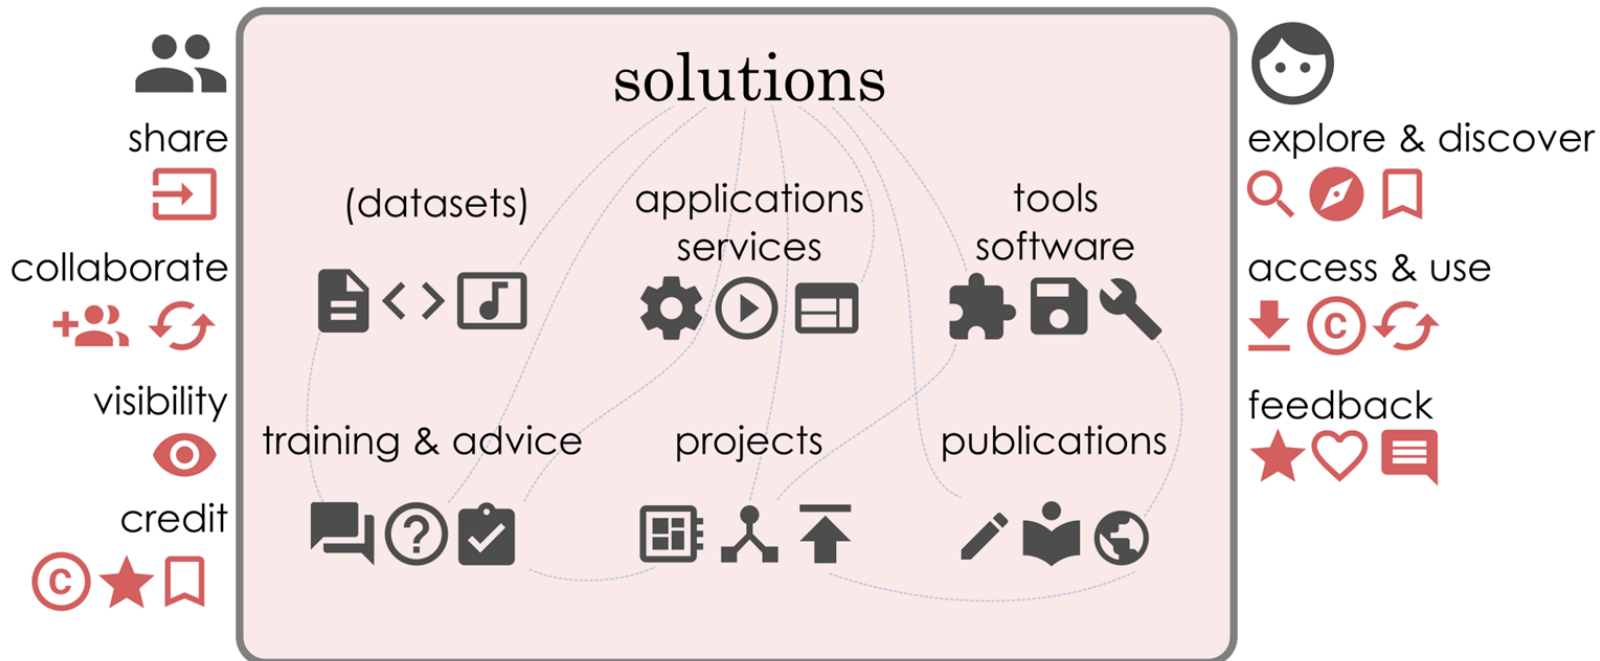

- Education and Training
- Foresight and Policy Work
- Working Groups
- The (future) Marketplace

SSH Open Marketplace

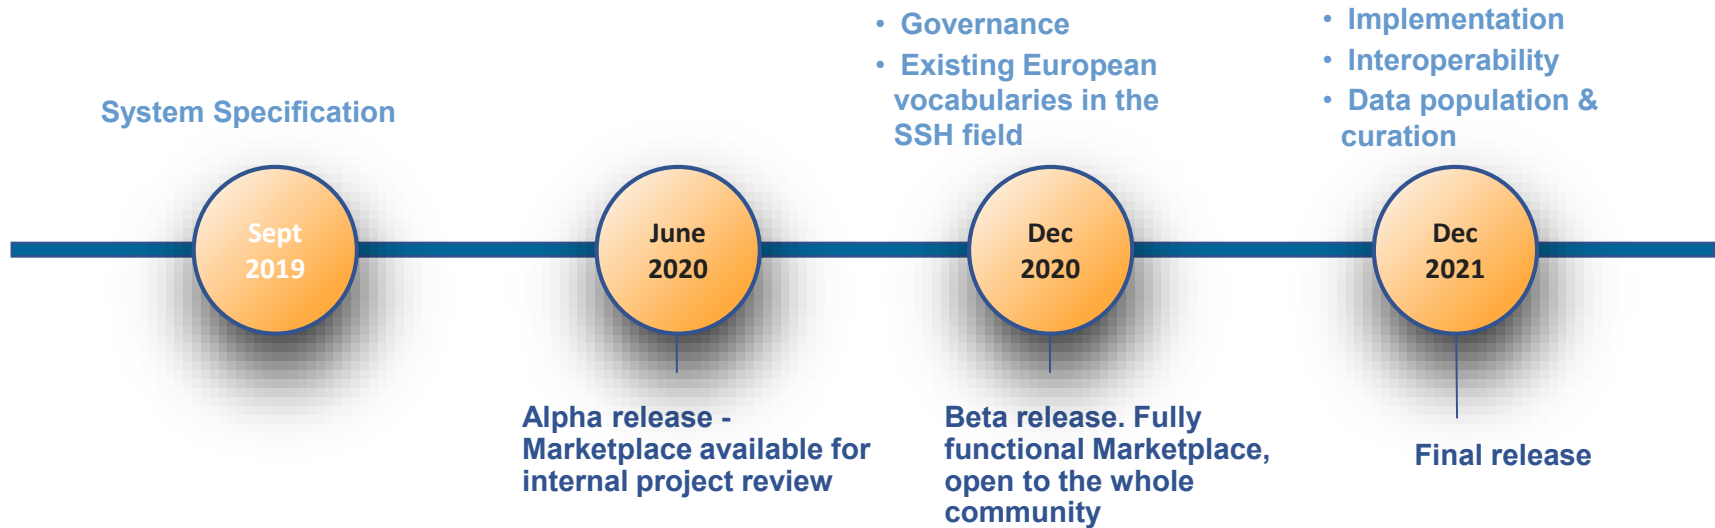

DARIAH developing Marketplace (WP7) in SSHOC project

- Discovery service
- That will focus on solutions / workflows / recipes / scenarios / use cases more than tools or services
- Accompanying/describing the research process / the research practices
- Contextualisation - related publications, projects, ***training material***
- Community - crowdsourcing, feedback
- Curation - governance, moderation

SSH Open Marketplace

Timeline for the creation of the SSH Open MP

What's in it for research libraries?

- Build the Marketplace as a helpful tool to reinforce relationship between librarians and researchers
- Build a Marketplace that can support librarians in easily finding answers to their own training needs
- Build a Marketplace that reflects the existing & useful resources

What's in it for research libraries?

User stories and specifications

As a (role)	I want to (something)	So that (benefit)	Test case and/or Input- /Output Data
young researcher in political sciences and European studies	know what kind of tools the researchers in my community are using	I can identify what is probably the best tool for me as well	researchers views or comments, quotations and links to forum
Student	Get support/help on using of tools (e.g. data handling and analysis, usage of tools)	I understand how to use tools including feeding them with data	Get list of training material for given tool

User stories and specifications

As a (role)	I want to (something)	So that (benefit)	Test case and/or Input- /Output Data
librarian	Contribute in the listing of tools/services/methods	I participate to a common effort of services recollection	Easy contributions
librarian	Help a student or a researcher about the tools and services he could use to solve his/her research problem	I can provide answers and support to scholars	Generate a list of tools and services with rates and comments
librarian	Find some training materials about a digital tool in social science	I can better understand how to use it, and how it could be helpful for the research community	Easy search engine
