Digital skills for library staff and researchers WG

Open Science essentials workshop

Dublin 2019 LIBER

Wednesday June the 26th
9-10:15 am - Arts Block Building Room 3074

Open science skills for both research librarians and researchers are at the centre of all evolutions towards "openness". Created in July 2018, the "Digital Skills for Library staff and Researchers" LIBER working group has started working in two complementary directions: building a skills set list, and spotting Open Science training programmes relying on skills identification.

The first results of this combined approach shall be presented during this workshop and will lead to collecting feedback and active input from the workshop participants. We need to discuss these results, and we need your vision and reactions – this is an active and collaborative workshop!

This active workshop of 75 mn shall be continued by a presentation of the SSHOC Project with a focus on Social sciences in the EOSC, in collaboration with LIBER Digital Humanities WG and DARIAH (**workshop 4 10:30-12:00**)

This workshop is complementary with :

- the 2018 LIBER/FOSTER+ workshop "Let's build the skills!" https://zenodo.org/record/1308131 and
- the EOSCpilot & LIBER Webinar "Skills and Training in Open Science and the EOSC ecosystem" https://zenodo.org/record/2247650,
- See our "digital skills for OS" references on Zotero https://www.zotero.org/groups/2340674/liber_digital_skills_for_open_science

The Digital Skills LIBER WG is aiming at spreading a more open culture and positioning libraries as a key-partner with skills training for a complex and forward-thinking conception of Open Science.

A workshop feedback shall be published on Zenodo

LIBER WG Digital Skills

Susanne Dalsgaard-Krag, DK & Cécile Swiatek, FR

https://libereurope.eu/strategy/digital-skills-services/digitalskills/members/

9:00 **Welcoming**
By Susanne Dalsgaard-Krag and Cécile Swiatek, Digital skills for library staff and researchers WG

9:05 **Identifying examples, methods and partners in the Open Science European Landscape : presentation of the selective Open Science skilling and training initiatives case-reviews**
By Cécile Swiatek and Anna Wojciechowska

LIBER Digital Skills Working Group: Case Studies on Open Science Skilling and Training Initiatives in Europe

https://zenodo.org/record/3251731

9:15 **Digital Skills list presentation**
By Thorsten Meyer

09:30 **Group discussions on developing OS skills - challenges, priorities, planning**
Facilitated by Ciara McCaffrey

10:10 **Wrap-up, end of workshop**

10:15 **(short) Coffee Break**

90-mn workshop #4 "Social Sciences & Humanities Open Cloud – What's in it for Research Libraries?" is starting at 10:30 – same room, 3074 !
