

# About the audience

Time to Professionalise Data Stewardship, 17 September 2019, Open Science Fair,  
Porto

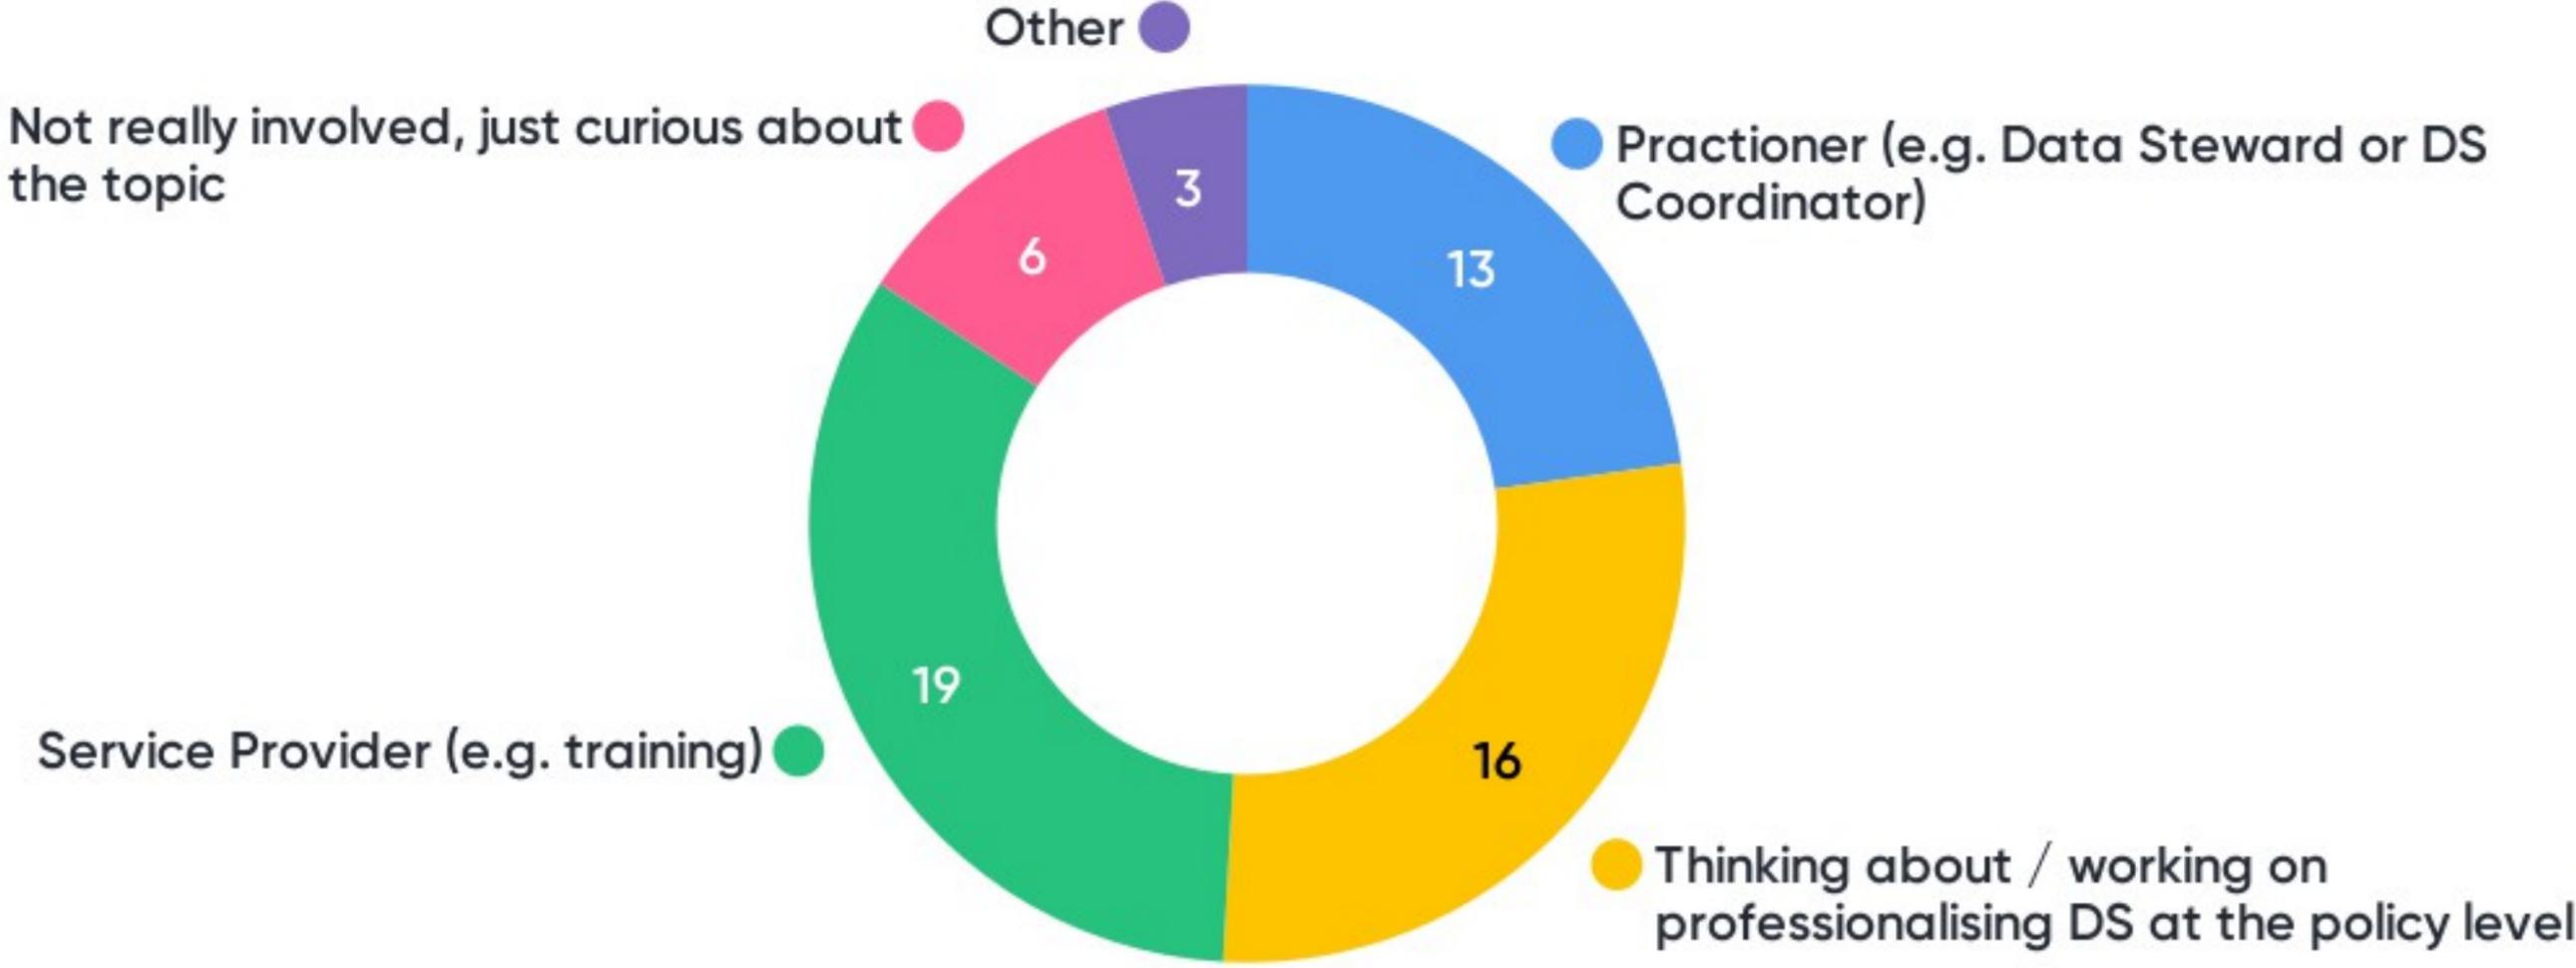

# What is your role / function?

# country where you work

# What is your involvement with data stewardship?

# What challenges and/or solutions would you like to bring to the table today?

Define the profession

Critical roles for small institutes

Definition of levels

Understanding career pathways

Skills

How to engage researchers in attending RDM/DMP training?

Best practices; where to start from; how to involve the faculties at my university

Skills

Join efforts across Europe

# What challenges and/or solutions would you like to bring to the table today?

What is needed to define data stewardship roles

Funding

Tools

Small organisations and institutions

implementation of data stewardship, balance between added value and extra admin work

Time

Skills

Skills to be DS are not well defined.

Professional training for data stewards

# What challenges and/or solutions would you like to bring to the table today?

the FAIR4S framework ; using models to create job descriptions

Skills training

How different countries do

Coordination on an institutional and national level, recognition of the profession, long-term investment

Diversity of roles and their definitions; lacking harmonisation and consolidation

Contact Point on "How to's" (Engaging Stakeholders / Convincing Management best practices, Training, etc.)

How to do advocacy to researchers

Career Paths of Data Stewards

# Vote in a group discussion topic

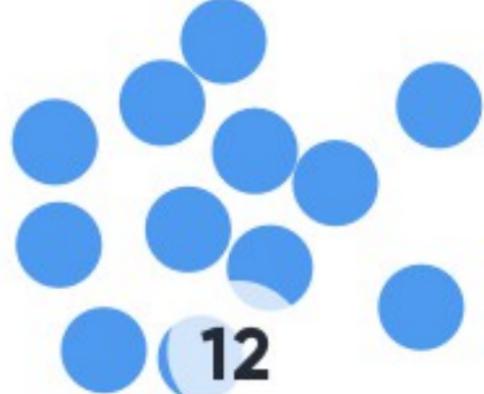

Convincing Management

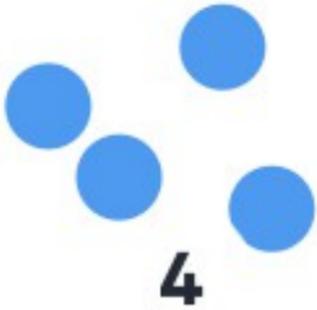

Hiring Data Stewards

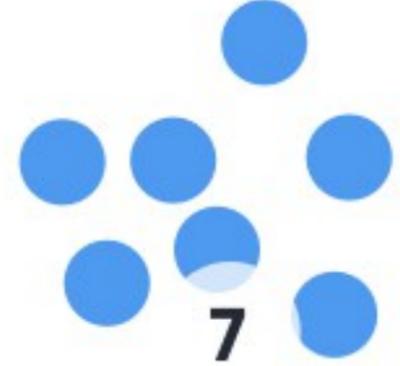

Data Steward Community

Training Data Stewards

Career Development for Data Stewards

Joint efforts across countries

# Ideas and suggestions for next steps as a result from the discussion today?

Trainer handbook

Set up national and European interest group

Shared documents to develop guidelines and templates

Repository of training materials

Directory of resources

community of practice

Align and harmonise work and outputs of different initiatives

Lessons learnt from RSE community

Aligning materials and project results into one central point of information and prepare training materials or courses like e.g. Mantra

# Ideas and suggestions for next steps as a result from the discussion today?

Create interest in and awareness of data stewardship from a very early moment at universities (i.e. bachelor students)

Training handbook

Masterlist of repositories :-)

More training workshops

Collaborate internationally

Take inspiration from more advanced Countries and translate them in our own context.

List of data management/ stewardships courses available in Europe

Liaise with eachother across countries

Create a common definition of data stewardship.
