3 impactful steps towards efficient use of identifiers

Educational Technology

Policies requiring PIDs

Training to researchers, managers and students

1) automatic assignment of pids

Show usage (f.e. OrcidID for CV) and credit (f.e. Clear identification of researcher)

Platforms linked among them

Research and publication support librarian

Library 1. Training: explain what it is, help them create 2. Incentives: Policies (require it) but also services (make life easier) 3. Demonstrate good practice : use ORCIDs, DOI etc yourself!

Show value (knowledge discover) and make research visible (f.e for funding agencies)

3 impactful steps towards efficient use of identifiers

Benefits of using pid:s for assessment and merit purposes

What objections do you usually encounter?

Do not have time for this	administrative burden	Too many identifiers
Ignorance	Too many plataforms!	Really, another profile?
Time consuming	It is too complex	they don't know it exists

41

What objections do you usually encounter?

What's that?

Confusing (too many different Pids)

I have no time

„What is the benefit?"

'I don't think this is useful to me'

No idea of what it is

I don't want to share this information

Privacy issues

Old habits

41

What objections do you usually encounter?

Don't have that information.	privacy	What are they for?
They see it as a nuisance, without obvious benefits, especially if they have to type in their information all over again.	It's too complicated	No clear guideline
Ask for trainning	I don't have to manage the item/its PID	Fear of success

41

What objections do you usually encounter?

Reluctance from the researchers side	I don't have time for this	No my responsibility
Lack od interest	I already have my institutional profile	Old researchers tejí do not need it
Lack od awarness	IT resistence	I will ask my personal assistant (this is a kind of administrative work)

41

What objections do you usually encounter?

Lack od training for trainers

DOI – the publisher didn't give me one

Assumption that PIDs are fully integrated and can do things that they can't (yet)

Soooo many PIDs! Which ones are actually important?

Misunderstood permanent identifyers ant thought of them as temporary placeholders until the "real" metadata (more explicitly connected to journal) emerged

41

What motivates use of PIDs?

reward
transparency
incentives
persistent
trainning
foreveness
accountability
sharing
visibility
findability
requirements
trusted links
policy
big data analysis
clear benefits
funders' requirement
citation
practical useability
facilitates merit order
ego
standardization
interoperability
reproducibility
requirement
accuracy
services
credit
dissemination
policy compliance
researcher ego
uniquesess
training
team-building
disambiguation
uniqueness
recognisable
metrics
deduplication
insights
resolving ambiguities
item follows researcher
synchronisation
linking
indexing

👤 43

Share any new ideas and thoughts for the road

keep my own ORCID profile up-to-date!

Communicate about PIDs on our web page

Organise a seminar regarding the benefits od PIDs

Join PIDforum.org

Interlink

interoperability

link link link

ORCID Claimathon (sit down with researchers and set-up ORCID with them)

Update my profile... Be an example

20

Share any new ideas and thoughts for the road

Yeah! Link, link, link...

Review my orcid profile

Start the process of mandatory ORCID ID for researchers – policy, administrative staff support.Prepare workshop or propagation presentation on ORCID ID.Propagation of use of DOIs for institutional publications.

Verify my institutional / orcid / whatsoever profile are up to date

Put my pre-Doi publications in zenodo and ORCID

Look at my orcid profile - it's been a while

Merge some initiatives so that it stays clear for researcher and organisation. Not a multitide of PIDS standing more or less the same thing

Look for opportunities to mention PIDs in every training topic
New citation model: ORCID, ORCID, DOI

20

Share any new ideas and thoughts for the road

Synchronize researchers' UUIDs on all repositories we provide, for those who don't have orcids.Encourage them to make orcidsDevelop an app for resolving identifiers across all of our repositories.

Keep talking to each other

Did you find this workshop useful?

Yes, I feel inspired and empowered — 10

Somewhat, I have some new ideas — 14

24

What did you find especially useful or what can be improved?

Useful: group brainstorm

Discussion with other librarians

Improve trainning for researchers

Not only ORCID but also DOI! An how about institutional PIDs?

Presentations in the beginning were important

Activities and menti usage was good

especially useful were examples

It is necessary to link the PIDs among them

Bring some clarity maybe on what organisation is doing what exactly in the PID landscape

17

What did you find especially useful or what can be improved?

Sharing ideas

A broader vision: when PIDs are discussed not only in relation to research, but to businesses; involve entrepreneurs

Group work and brainstorming was very good

Talk about other PIDs

Good format for workshops, facilitated communication

Brainstorming was good. The groups were a bit too big. Maybe not a split by "profession " but by topic

Different perspectives and perceptions. Maybe I would have been interesting to mix the groups at a certain point.

Enfasize the use of Pid's for entities other than Researchers and publications (institutions, projects, …)
