# Project "Text Database and Dictionary of Classic Mayan"

2014 - 2029

North Rhine-Westphalian Academy of Sciences, Humanities and the Arts

University of Bonn / Göttingen State and University Library

Compilation of a text database and dictionary of Classic Mayan, the language of the approx. 10,000 ancient Maya hieroglyphic texts, dating between 500 BC and 1500 AD, found in more than 500 archaeological sites in Southern Mexico, Guatemala, Belize and Honduras

**[mayadictionary.de](http://mayadictionary.de)**

K3245

K797

*Drawing by George Stuart*  
 Copyrighted Drawing by George Stuart

Life cycle, identity, origin (birth, death, role, status)

kinship and lineage (dynastic record, family ties)

political organization (power and authority)

Constituting social and political order (warfare, alliances, expansion)

Creating and designing the built environment and objects within it (constructing, dedicating, erecting etc.)

religion (calendar rituals, blood offerings, ancestor veneration)

Varia (mythologies, origins of dynasties, astronomy)

Missing: daily life, trade records, book keeping

Preliminaries to consider before  
TEI-encoding Maya Hieroglyphic texts

A B

## Laxtunich, Lintel 2

*Provenance:* Laxtunich  
*Finding spot:* ?  
*Discovery:* looting < 1970  
*Custody:* John A. Stokes Gallery (1970)  
*Custody:* Kimbell Art Museum, Dallas  
 (acquired 1971), exhibited in Piano  
 Pavilion (as of 2019)

*Date:* c. A.D. 785  
*Artist:* Ancient American  
*Period:* Late Classic period (A.D. 600–900)  
*Medium:* Limestone with traces of paint

*Classification:* Sculpture, lintel

*Dimensions:* 115.3 x 88.9 cm

*Accession no:* AP 1971.07

*Photograph:* Kimbell Art Museum, 2019

*Online:* <https://www.kimbellart.org/collection/ap-197107>

*Publication:* Karl Herbert Mayer 1984, p. 17;  
 1987, p. 17; Houston, Stuart 2019

N-O *Drawing:* Marc Zender, 2016 (Zender and  
 Beliaev 2016, p. 17)

*References:* Mayer 1988, p. 17; Stuart 1999, p.  
 343

## Text field

left-to-right, top-to-bottom, double column,  
a matrix of blocks constituting a text

## Hieroglyphic Block Hieroglyph

stacked, nested, overlapping and intersected arrangement of glyphs

## Glyphs Signs

"it was terminated"  
(syllabic signs)

370hc . [ 699st : 181bh ]\_

*Horror repetitionis*: Allography and violations of reading order

**u-ti-ya** > *uhtiiy*  
"it happened"

**u-ti-ya**

**u-ya-ti**

**UH-ya-ti**

**u-ya-ti**

i' u-ti "then it happened"

# A selection of signs for the syllable /u/

A <sub>1</sub>	6 AJAW	6 Ajaw [day]
B <sub>1</sub>	13 "K'ayab" [K'AN-'a-si-ya (9.17.)5.0.0	13 K'ayab [month] Dec. 25, AD 775
A <sub>2</sub>	NAAH-5-TUUN-ni	<i>naah 5 tuun</i> , "first five stones"
B <sub>2</sub>	?-OOK-ki	? <i>ook</i> , "? foot"
A <sub>3</sub>	?-K'UHUL-OOK tzi?	? <i>k'uhul ook tzi?</i> , "? holy foot"
B <sub>3</sub>	u-K'AL-wa TUUN-ni	<i>u k'alaw tuun</i> , "he wraps the stone"
A <sub>4</sub>	ch'a-JOOM-ma	<i>ch'ajoom</i> , "incenser"
B <sub>4</sub>	TAHN-TE'-K'INICH	Tahn Te' K'inich, Ruler of Aguateca
A <sub>5</sub>	AJ-3-BAAK-ki	<i>aj 3 baak</i> , "he of the 3 captives"
B <sub>5</sub>	a-9-HA'B? *la ta	<i>a 9 ha'b *lat</i> , "he of the 9 years past?"

- I. A transliteration, transcription, morphological analysis and translation of an ancient text cannot fully represent its original renderings, spellings and formalities. Size of blocks, style of carving and placement of text fields reflect social hierarchies, indicate artists or schools and are indicators for time and space
- II. The original glyph arrangement within the text and block matrix must be encoded in DE as reading orders are often violated, 30% of all known signs are still undeciphered, thus the **visual** and the **spoken** word differs
- III. Question marks are used ambiguously indicating unknown readings, undeciphered passages, eroded text portions, problematic sign readings must not be used in digital epigraphy to replace e.g. graphs, signs, blocks, passages etc. in a database

# Maya Epigraphy using TEI ... and beyond!

# Encoding Maya Texts

- project-specific TEI-schemes:
  - base, inscriptions, codex
  - TEI-all conform, using odd-chaining mechanism
- stand-off markup used for:
  - referring to Sign Catalogue (for graph variants and transliteration values)
  - referring to artefact documentation and context information (supported by ontology and vocabularies)
  - linking areas of the facsimile to corresponding text
- encoding workflow supported by parser
  - transforming numerical transliteration to according TEI document structure
- Exist-App tg:schemaSync
  - updates RelaxNG schema in TextGrid Lab automatically

  </seg>
</ab>
```

# tg:SchemaSynch - Synchronising ODDs and RNGs

tg:SchemaSynch Config

## ODD2RNG Synchronisation

A Plugin to synchronise ODD and RELAXNG Schemas stored within TextGrid. It compiles ODD Schemas and creates RNG Validation Schemas.

### TWKM (IDIOM) - TEXTWÖRTERBUCH DES KLASSISCHEN MAYA

As a TEI-P5 ODD the TWKM Schema is used to customise TEI-ALL with regard to the TWKM-Projects scientific needs. In total the TWKM Schema consists of three ODD schemes chained to one another: (1) A Schema to markup mayan inscriptions and (2) a schema to markup ancient mayan codices are chained to a base schema.

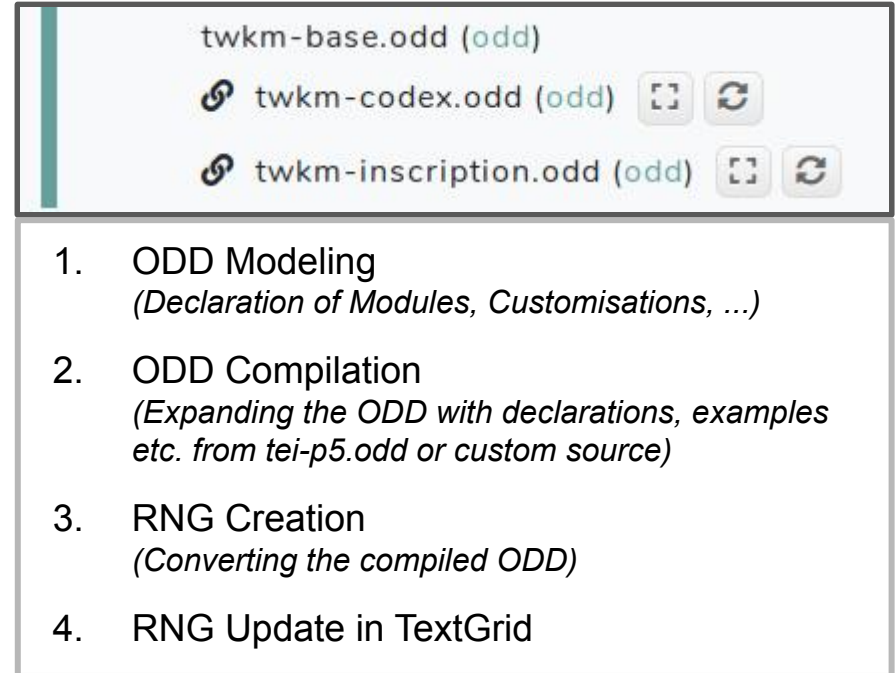

- [twkm-base.odd \(odd\)](#)
- [twkm-codex.odd \(odd\)](#)
- [twkm-inscription.odd \(odd\)](#)

- eXist-db app
- Using TEIC Stylesheets
- Synchronise ODD and derived RNG Schemes

# ODD Chaining, RNG Validation and TextGrid

- 3 ODDs as customisations of TEI P5-ALL using ODD Chaining\*
  - **base-schema**: Main modules, element restrictions and custom `tei:dataSpecs`
  - **inscription-schema**: Customisation with regard to the encoding of carved mayan inscriptions
  - **codex-schema**: Customisation with regard to the encoding of mayan codices
- Synchronisation of modified ODDs with RNG validation Schema in VRE TextGrid

\*) <https://teic.github.io/TCW/howtoChain.html>

twkm-base.odd (odd)

 twkm-codex.odd (odd)  

 twkm-inscription.odd (odd)  

1. ODD Modeling  
*(Declaration of Modules, Customisations, ...)*
2. ODD Compilation  
*(Expanding the ODD with declarations, examples etc. from `tei-p5.odd` or custom source)*
3. RNG Creation  
*(Converting the compiled ODD)*
4. RNG Update in TextGrid
