For the past four years, approximately 200 researchers from 35 countries have worked together in the COST Action IS1402 on AGEISM ([www.notoageism.com](http://www.notoageism.com)) to develop a comprehensive body of knowledge on the topic of ageism. Our collaborative work has resulted in numerous publications, [a special issue](#) and an open-access book by Springer: [Contemporary Perspectives on Ageism](#).

Our goals for this final meeting are to:

1. Present the outcomes of the COST Action on Ageism to national and sub-national policymakers responsible for providing services and developing programmes targeting older citizens
2. Increase awareness to the topic of ageism and present solutions to combat ageism at grass-root level.
