

SSHOC pools and harmonises the tools and services that unlock heterogeneous SSH data collections across Europe. This makes data easy to process, enrich, analyse and compare.

Main impacts

The Social Sciences and Humanities are seamlessly integrated in the **European Open Science Cloud**

Availability of an EU-wide, easy-to-use SSH Open **Marketplace**, where tools and data are openly accessible

EU-wide availability of high quality "cloud ready" **SSH tools** and high quality **SSH data**

EU-wide availability of **trusted and secure access mechanisms** for SSH data, conforming to EU legal requirements

State of the art Research Infrastructure in several pilot domains advanced through **dedicated SSH data pilots cluster projects**

Maximising reuse through **Open Science and FAIR principles** (standards, common catalogue, access control, semantic techniques, training)

Goals for CLARIN participation in SSHOC

CLARIN will bring to SSHOC its expertise in Language Technology, and some of its core technical infrastructure components. Generalizing and adapting our services for processing data from the social sciences and cultural heritage where needed. The SSH will profit from this as CLARIN will from the assets and expertise of the other SSHOC stakeholder infrastructures. Together we will also assure the position of the SSH in the new to develop EOSC.
