

Table 4 Crude and adjusted ^a effects of the intervention using logistic regression (n=47)

		All 6 correct measures	At least 5 correct measures	At least 4 correct measures
Crude OR	Parameter	4.31	3.17	8.00
	95% CI	(0.7 – 26.6)	(0.92 – 10.96)	(0.92 – 69.24)
Adjusted OR	Parameter	Not possible to estimate adjusted OR		
	95% CI			

Abbreviations: OR = odds ratio; CI = Confidence Interval.

^a Adjusted for sex, age, education level, smoking status, presence of asthma or rhinoconjunctivitis, risk perception, parental asthma, and knowledge about preventive measures against asthma and allergies before the intervention
