

# Azores Case Study

Marina Carreiro-Silva and Telmo Morato - IMAR-Uazores  
Covadonga Orejas - IEO

ATLAS Kick-off Meeting  
Edinburg, 13-15 June 2016

Credits: Ricardo Medeiros, DOP

Azores Deep-Sea Environments

Credits: Fernando Tempera

Deep-sea – Cold-water corals as prominent habitats

- Island shelves & Island slopes
- Seamount summits & Seamount slopes (deep and shallow)
- Abyssal Plain
- Hydrothermal vents

Credits: Fernando Tempera, DOP

Deep-sea – Cold-water corals as prominent habitats

Tempera, F, Atchou E, Amorim P, Gomes-Pereira J, Gonçalves J (2013). Atlântica Area Marine Habitats. Adding new Macaronesian habitat types from the Azores to the EUNIS Habitat Classification. Technical Report No. 4/2013 - MeshAtlantic, IMAR/DOP-UAç, Horta, 126pp.

CWC richness and distribution

Credits: Telmo Morato, IMAR

Conservation - Marine Protected Areas

Credits: Gilberto Carreira, DRAM

Part of OSPAR network Marine Protected Areas

Conservation - Marine Protected Areas

**Condor Seamount:**  
The seamount has been recently declared a Marine Protected Area and has been used as a scientific observatory since 2010, allowing the safe deployment of scientific equipment within the scope of WP2

**Coral garden** composed by the octocorals *Dentomuricea meteor* and *Viminella flagellum*  
**Depth:** 195-210 m

**DeepSeaLab** aquaria facilities at IMAR for the maintenance and experimentation with deep-sea organisms

Human activities – Fishing

Bottom Longline Fishing

Credits: Telmo Morato

Human activities – Fishing

Pelagic Longline Fishing

Credits: Telmo Morato, IMAR

Human activities - Blue Growth opportunities - Mining

Credits: Telmo Morato, IMAR

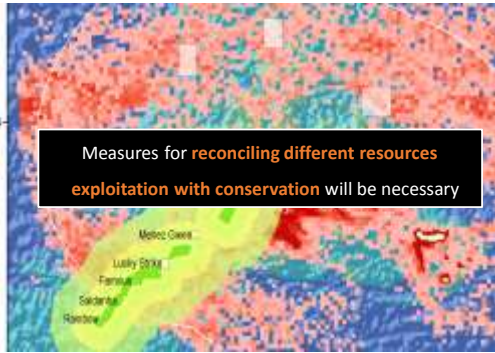

Massive sulfide deposits, manganese nodules, Mn Cobalt crusts

Human activities and conservation

## List of partners and links to other WPs

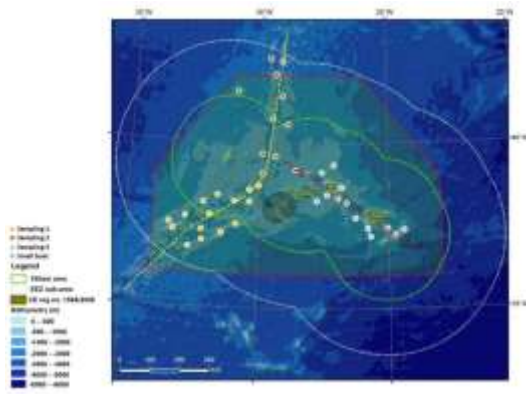

WP (partners)	Collaborative activities	PM
<b>WP2</b>	<i>In situ</i> studies at Condor seamount to characterize total community OM mineralisation; ecophysiology experiments at IMAR aquaria facilities; developments of hydrodynamic - biogeochemical - physiological models for the Condor seamount.	29
<b>WP3</b> (HWU, IEO, IFREMER, MSS, UCD, UOX)	Meta-barcoding of eDNA studies for biodiversity assessments in the Azores (seawater, sediment, plankton samples, VME indicator taxa and commercially valuable fish species); application of GES, EEf and GOODS' to the Azores case study, under present and future ocean conditions.	57.5
<b>WP4</b> (IFREMER, HWU, IEO, UCD, UOX)	Genetic and life history studies of selected VME indicator species in the Azores (mainly corals and commercially important fish) and oceanographic models to determine the importance of the Azores as a source and/or stepping stones on connectivity patterns in the North Atlantic.	7
<b>WP5</b> (Utr, NUIG)	Inventory of existing and potential (Blue Growth) ecosystem services and ocean monetary values; assessment of ecosystem services risks and pressures; assessment of willingness to pay for conservation for the Azores Case Study area.	2
<b>WP6</b> (NUIG, Utr)	Creation of maps of VMEs, fish habitat and ecosystem goods and services; carry out Strategic Environmental Assessments; test new Blue Growth scenarios, develop cost efficient environmental assessment and identify appropriate adaptive management measures for the Azores Case Study area.	8
<b>WP7</b> (SC, NUIG)	Collaborate on science-policy interface activities to ensure societal and policy relevance in the Azores Case Study area; and on the implementation of EU and international regulations and agreements recognising both the economic potential of the Atlantic and the need for sustainable management.	3
<b>WP9</b> (ODE, AquaTT)	IMAR will subcontract a local NGO that will work in close collaboration with science communication specialists, ODE and AquaTT, to develop and communicate a suite of outreach activities and products in the Azores.	1

## List of available datasets

- Dataset on the deep-sea biodiversity, and the ecosystem evaluation framework to identify EBSAs in the deep-sea;
- Seamount ecosystem evaluation framework database, built upon past EU projects such as Coralfish and Hermione;
- Database on Azores vulnerable marine ecosystem (COLETA);
- Database on deep-sea fish in the Azores and on the Condor seamount ecosystem;
- IMAR-UAz video library on deep-sea habitats;

## List of planned cruises

Dates	Ship (institute)	Area	ATLAS Case Study	ATLAS WPs	ATLAS Participants	Equipment
15/04/16-31/07/16	RV Arquipélago (DOP/UAz)	Azores (Mid-Atlantic Ridge and Terceira Rift)	8	3,4,6	IMAR-UAz	Experimental fishing equipment
2/07/16-24/07/16	Meteor (Universität Erlangen-Nürnberg)	Azores (Mid-Atlantic Ridge and Terceira Rift)	8	3,4,6	IMAR-UAz	ROV+arm, MBES, SSS, CTD, ADCP, EK-600, Box corer, rock corer, multicorer
16/07/16-06/08/16	Pelagia (NIOZ)	Condor Seamount and Menez Gwen hydrothermal vent field	8	3,6	IMAR-UAz	ROV, UAV
20/09/16-25/10/16	RV Sarmiento de Gamboa (CSIC)	Alborán Sea to Azores	7,8	1,2,3,4,6	IEO, Ifremer, IMAR-UAz, HWU	ROV+arm & novel plankton sampling device, MBES, SSS, CTD, ADCP, EK-600, Box corer, Van Veen, multicorer
2017-2018	RV Arquipélago (DOP/UAz)	Azores (Mid-Atlantic Ridge and Terceira Rift)	8	3,6	IMAR-UAz	landers, cameras
