

TERRA POPULUS

Integrated Data on Population and Environment

Workshop Outline

- TerraPop project overview
- Raster to area transformations
- Tutorial 1 – Area-level extract
- Microdata
 - Attaching contextual variables
 - Microdata geography
- Tutorials 2 & 3 – Microdata extract & analysis
- Area to raster transformations
- Tutorial 4 – Mapping TerraPop data (optional)
- Q & A

TerraPop Goals

Lower barriers to conducting **interdisciplinary human-environment** interactions research by making data with **different formats** from **different scientific domains** easily interoperable

Provide an **organizational** and **technical** framework to **preserve, integrate, disseminate, and analyze** global-scale spatiotemporal data describing population and the environment.

TerraPop in Context

Collaborating Organizations

- Data integration expertise
- Large census and survey data collections & expertise
- Institutional foundation

- Human-environment interactions research expertise
- Environmentally-oriented data collections & expertise

- Data preservation and sustainability expertise
- Social science data collections & expertise

- Major producers and distributors of data on both humans and their environment
- Major producers of tools for integrating and transforming data across formats
- Leaders in preservation and sustainability

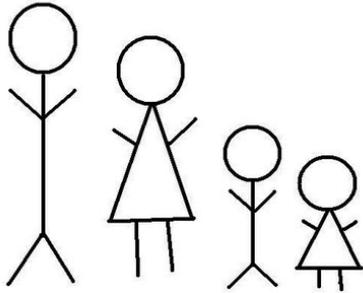

Source Data

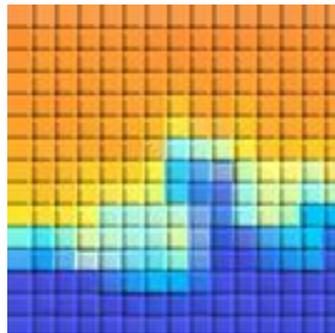

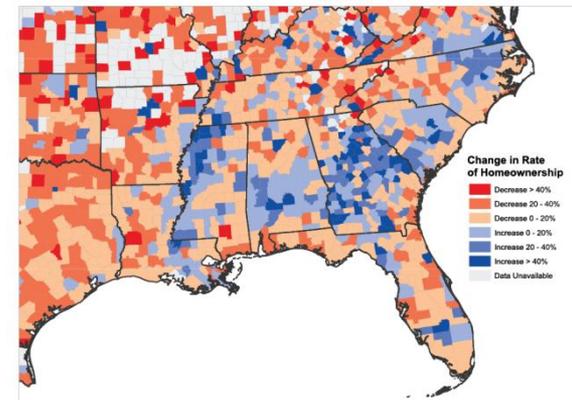

- **DOMAINS & FORMATS**
- **POPULATION MICRODATA**
- **AREA-LEVEL DATA**
- **ENVIRONMENTAL DATA**

Making disparate data formats interoperable

Microdata:
Characteristics of individuals
and households

Area-level data:
Characteristics of places defined
by boundaries

Raster data:
Values tied to spatial
coordinates

Age Birthplace
 Sex Mother's birthplace
 Relationship Race Occupation

Population Microdata Structure

Geographic and housing characteristics

- Rows

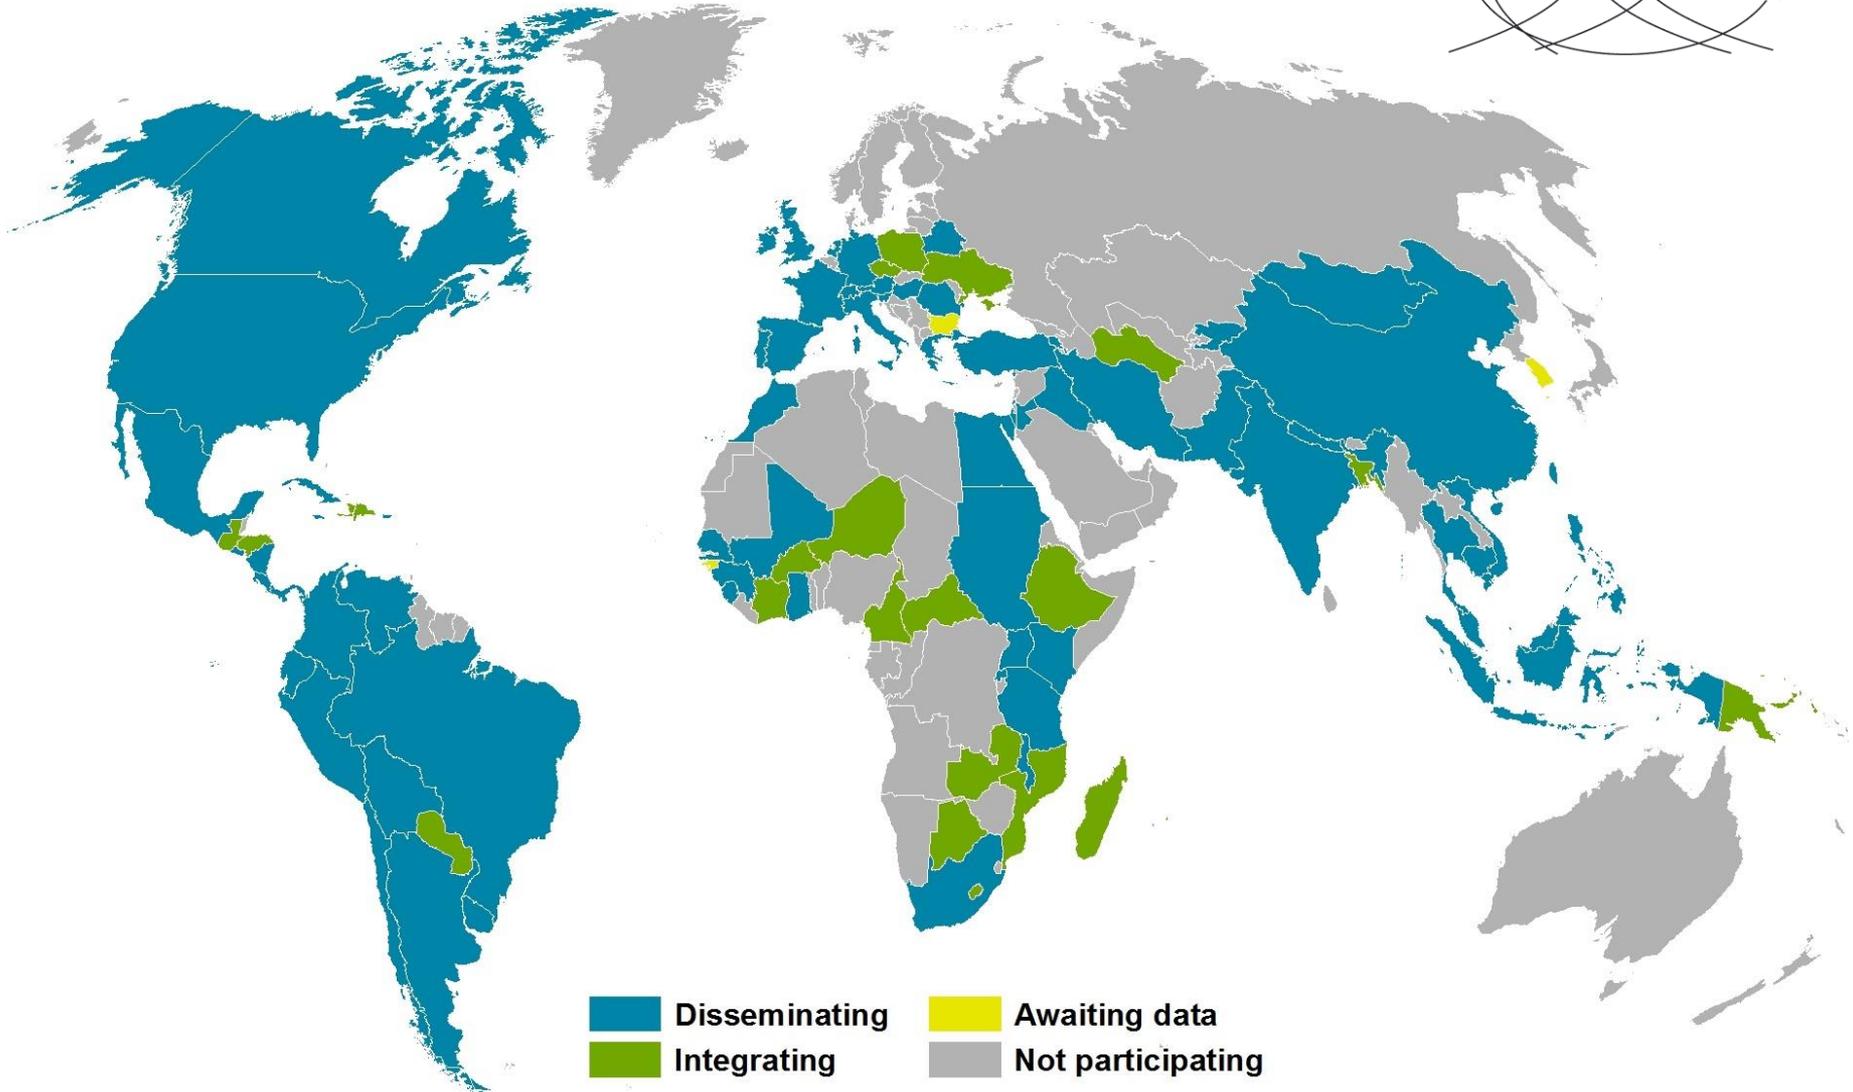

- Household records
- Person records within households

- Columns

- Variables

Microdata Availability

Area-level Data Sources

- Census tables, especially where microdata is unavailable
- Other types of surveys, data
 - Agricultural surveys
 - Economic surveys, data
 - Election data
 - Health data
- Legal/policy information

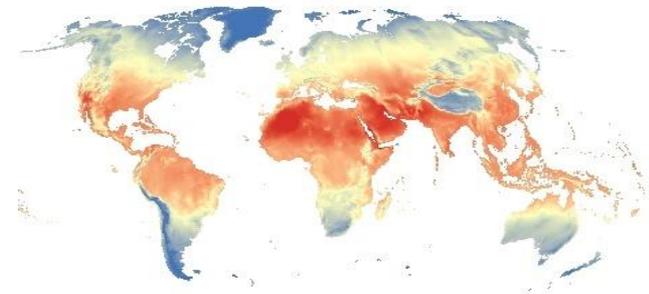

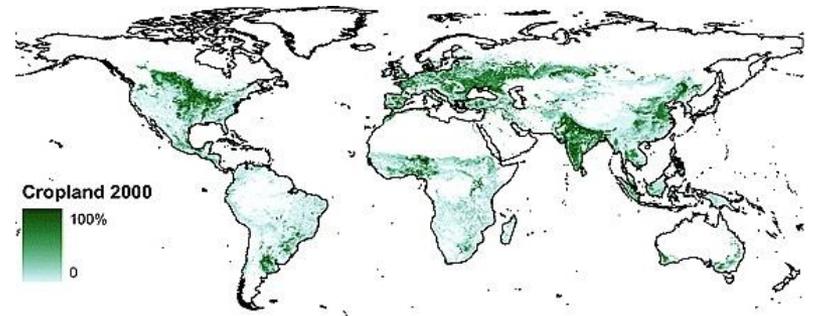

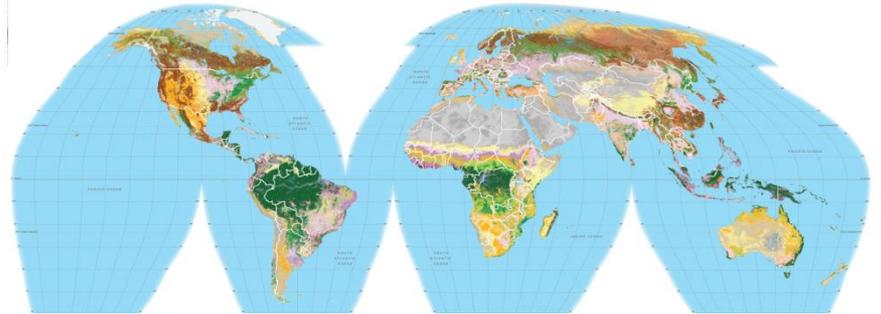

Environmental Data

- **Beta system**

- Global Land Cover 2000
- Harvested Area and Yield for 175 crops (*Global Landscapes Initiative*)
- Temperature and precipitation (*WorldClim*)

- **Future additions**

- Additional LU/LC and climate datasets
- Elevation
- Vegetation characteristics
- Bioclimatic & ecologic zones

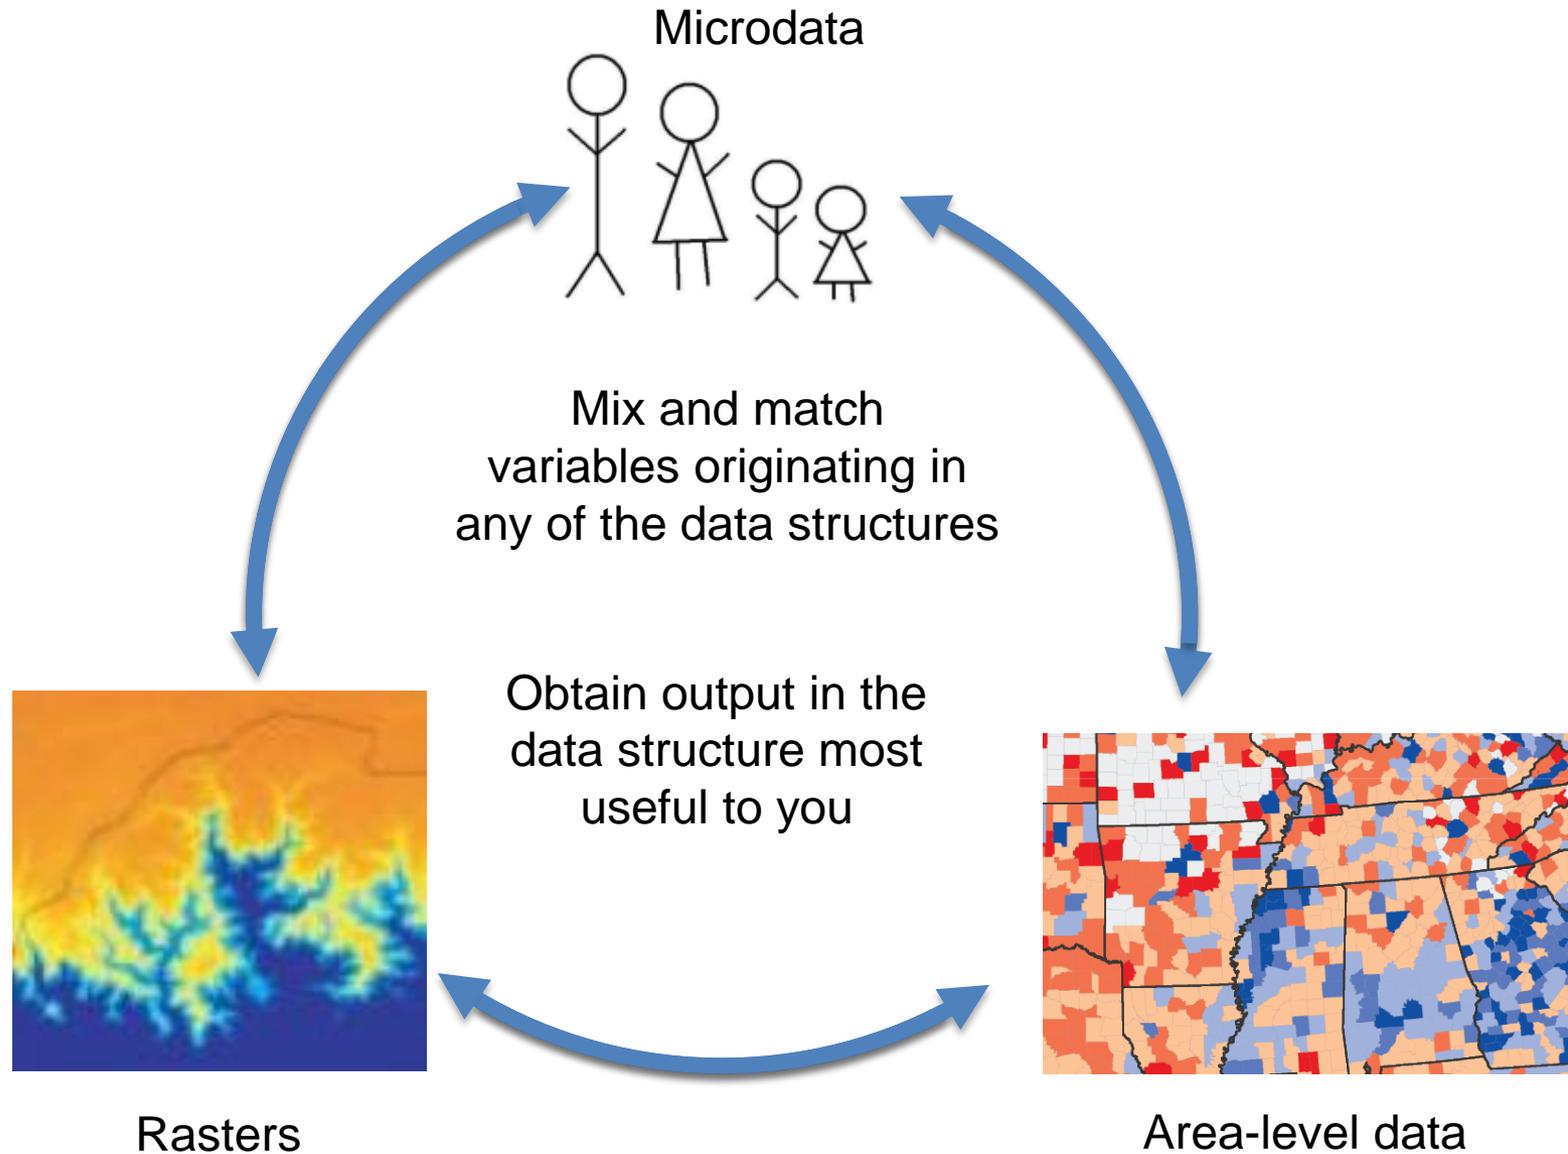

Location-Based Integration

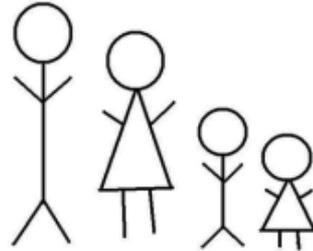

MICRODATA ⇔ AREA-LEVEL ⇔ RASTER

Location-Based Integration

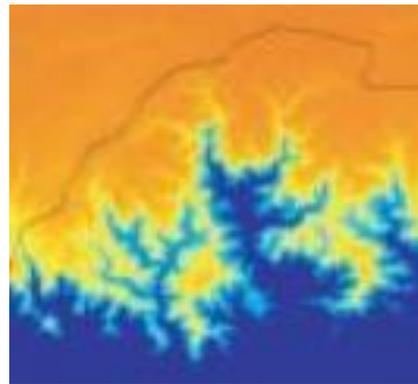

Location-Based Integration

Microdata

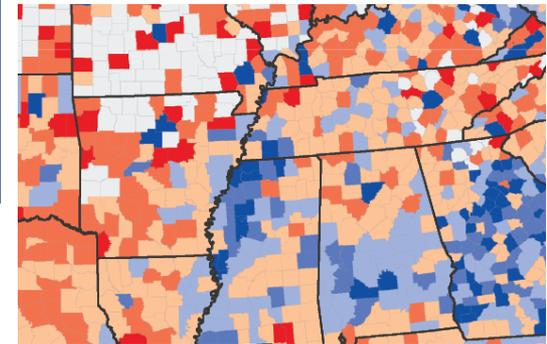

Individuals and households
with their environmental
and social context

AGE	SEX	LANDCOV	AVGTEMP
10	Male	Forest	21.20
27	Female	Forest	24.30
54	Female	Pasture	24.10
37	Male	Cropped	25.60
37	Female	Cropped	28.10
42	Female	Urban	26.70
20	Female	Forest	24.30
39	Male	Urban	26.80
77	Female	Cropped	27.70
11	Female	Cropped	22.30
31	Female	Pasture	25.10
23	Male	Forest	24.40
24	Female	Urban	21.50
40	Female	Urban	23.40

Rasters

TerraPop Beta - Raster

Datasets	
Land cover	Global Land Cover 2000
Land use	Harvested Area and Yield for 175 crops (Global Landscapes Initiative)
Climate	Temperature, precipitation and bioclimatic variables from WorldClim

Planned Additions

- Remaining microdata samples from IPUMS-International
- Area-level census data for the United States
 - National Historical Geographic Information System Time Series Tables for states and counties
- Area-level census data for countries not in IPUMS-International

Planned Additions

- Land cover
 - MODIS MCD12Q1 annual land cover data
 - Globcover
 - MODIS Vegetation Continuous Fields
- Land use
 - MODIS 500m Map of Global Urban Extent
 - Global Land Use Dataset (5 classes)

Timeline

- Beta access system is currently available for users at <https://beta.terrapop.org>
- Mid to late summer 2014 – NHGIS-derived aggregate US census data and MODIS land cover (2001-2012) available in TerraPop
- Fall 2014 – remainder of IPUMS-International collection available in TerraPop
- 2015-2016 – Incorporation of additional data, microdata tabulation functionality, other enhancements
