The IDB has more than 30 researchers producing working papers on economic and social topics. Many of these documents constitute background research for the IDB's flagship publication "Development in the Americas" prepared by the [Research Department](#). In addition, the IDB also finances and mentors studies conducted by other institutions in order to build knowledge and research capacity. The Bank supports two organizations: the Institute for the Integration of Latin America and the Caribbean, also known as [INTAL](#); and the Inter-American Institute for Economic and Social Development, or [INDES](#).
