

## **Textbooks and Monographs Related to Space Weather and Space Weather Science**

Compiled by

Professor Delores J. Knipp, University of Colorado Boulder  
*Director, Education Enterprise, Space Weather Technology Research and Education Center*

Professor William Trey Cade, Baylor University  
*Director, Baylor Institute for Air Science*

Originally compiled for the American Meteorological Society Meeting 2018

**Abstract:** We compile a list of English-language textbooks, popular texts and topical monographs, related to the science of space weather and published since 1990. This list was originally prepared as input to the 15th Conference on Space Weather at the 2018 American Meteorological Society Meeting. This document describes textbook resources available to space weather practitioners, broadcasters, meteorologists, scientists and engineers. It has been updated to 2020.

**Format:** Textbooks with imbedded or end of chapter questions and/or problems are shown in tabular form. More general exposition-texts are shown as hanging-indent text entries.

The degree of difficulty, as indicated, ranges from basic (popular) to intermediate (undergrad-professional development) to advanced (graduate student and researcher)

### **Books related to Space Weather and Space Environment of the Heliosphere**

<b>An Introduction to Space Weather</b>	Basic	M. Moldwin	(2008) On line (2012)
Introductory text on space weather aimed at non-science majors	Cambridge University Press	ISBN: 978-0-521-71112-8	
<b>Introduction to the Space Environment</b>	Intermediate	T. Tascione	(2010) 2 <sup>nd</sup> Ed
Textbook on most facets of space weather and its impacts	Krieger Publishing, Malabar, FL, USA	ISBN 0894640712	
<b>Space Weather and the Physics Behind It</b>	Intermediate	D. J. Knipp	(2011)
Textbook on most facets of space weather and its impacts.	McGraw Hill	ISBN 9780073408903	
<b>Space Physics: An Introduction</b>	Intermediate	C. T. Russell, J. G. Luhmann, R. J. Strangeway	(2016) 2nd Ed
A textbook describing the physical basis of space weather	Cambridge University Press	ISBN 9781107098823	
<b>Space Physics: An Introduction to Plasmas and Particles in the Heliosphere</b>	Intermediate	M.-B. Kallenrode	1998 2004 3 <sup>rd</sup> Ed
A textbook describing the physical basis of space weather	Springer-Verlag Berlin Heidelberg	ISBN 978-3-642-05829-5	

<b>Basic Space Plasma Physics</b>	Intermediate	W. Baumjohann and R. Treumann	(2012) 2nd Ed
Textbook-like exposition on space plasma physics	Imperial College Press	ISBN 978-1-84816-895-4	

<b>The Solar-Terrestrial Environment: An Introduction to Geospace - the Science of the Terrestrial Upper Atmosphere, Ionosphere, and Magnetosphere</b>	Intermediate	J. K. Hargreaves	1992 1995 Paperback
A textbook describing the physical basis of space weather	Cambridge University Press	ISBN 978-0-521427371	

<b>Science of Space Environment Wave Summit Course</b>	Intermediate	edited by T. Ondoh and K. Marubashi	(2000)
Publication covering most aspects of space weather resulting from a specialized course	Ohmsha Press, Tokyo, Japan,	ISBN 978-1-58603-097-1	

<b>The Space Environment: Implications for Spacecraft Design</b>	Intermediate	A. C. Tribble	(2004) 2 <sup>nd</sup> Ed
A textbook about space weather and space environment effects on spacecraft	Princeton University Press, Princeton, NJ.	ISBN 978-0-691102993	

<b>Physics of Space Storms: From the Solar Surface to the Earth</b>	Intermediate to Advanced	H. E. J. Koskinen	(2011)
A textbook about the physical basis of space weather disturbances	Springer, Heidelberg	ISBN 978-3-642-00319-6	

<b>Physics of Solar System Plasma</b>	Intermediate to Advanced	T. E. Cravens	(1997) Hardback (2004) Soft Cover
A textbook about the physical basis of space weather disturbances	Cambridge University Press	ISBN 978-0521611947 ISBN 0521611946	

<https://doi.org/10.1017/CBO9780511529467>

<b>Physics of the Earth's Space Environment</b>	Intermediate to Advanced	G. Proissl	(2003) And E-book
A textbook about the physical basis of space environment and geospace storms	Springer	ISBN 3-540-21426-7	

<b>Physics of the Space Environment</b>	Advanced	T. I. Gombosi	(1998) Softcover (2009) E-book
Comprehensive exposition of the physics of the space environment	Cambridge University Press	ISBN 9780511529474	

<https://doi.org/10.1017/CBO9780511529474>

<b>The Space Environment and Its Effects on Space Systems</b>	Intermediate to Advanced	V. L. Pisacane	(2018) 2 <sup>nd</sup> Ed
A textbook about the physical basis of space weather and space environment effects on systems	AIAA Education Series	ISBN-10: 1624103537	

<https://doi.org/10.2514/4.103537>

<b>Heliophysics Series</b>	Advanced Textbook series	Edited by K. Schrijver, G. Sisco, F. Bagenal, and J. Sojka	2012-2017
A textbook series about the physical basis of space weather in the heliosphere	Cambridge University Press	See ISBNs below	

- a. Heliophysics I: plasma physics of the local cosmos, ISBN 9780521110617
- b. Heliophysics II: space storms and radiation: causes and effects ISBN 9780521760515
- c. Heliophysics III: evolving solar activity and the climates of space and earth ISBN 9780521130202
- d. Heliophysics IV: active stars, their astrospheres, and impacts on planetary environments ISBN 9781107090477
- e. Heliophysics V: space weather and society (online only, currently FREE ACCESS),  
<https://cpaess.ucar.edu/sites/default/files/heliophysics/documents/HSS5.pdf>

## Space Weather Explanation, Exposition and History

**Storms in Space, J. W. Freeman,** (2001) Provides details of Earth's space environment, space weather effects of solar activity and forecasting challenges, Cambridge University Press, New York, ISBN 0-521-66038-6, Popular book (Basic)

**Solar Storms: 2000 Years of Human Calamity,** S. Odenwald (2015) Reveals the history of space weather via stories and anecdotes, CreateSpace Independent Publishing Platform, Washington, Soft cover, ISBN 9781505941463, Popular book (Basic)

**Storms from the Sun: The Emerging Science of Space Weather,** M. J. Carlowicz and R. E. Lopez (2002) Overview of space weather storms and the underlying science, including stories and anecdotes, J. Henry Press, Washington, DC, ISBN 0-309-07642-0 Popular book (Basic)

**Sentinels of the Sun, Forecasting Space Weather,** Barbara Poppe, (2006), Johnson Books, Big Earth Publishing, Boulder CO USA. ISBN 1-55566-379-6, Popular book (Basic)

**The Sun, The Earth and Near-Space Environment, A Guide to the Sun Earth System,** John Eddy, (2009) A basic overview of the space weather system, including sources, intermediaries and effects. (NASA), ISBN 978-0-16-08308-8; e-book at [https://lwstrt.gsfc.nasa.gov/images/pdf/john\\_eddy/SES\\_Book\\_Interactive.pdf](https://lwstrt.gsfc.nasa.gov/images/pdf/john_eddy/SES_Book_Interactive.pdf) (Basic) Exposition

**The Sun Kings,** Stuart Clark, (2009), Details the rise of space weather after the first great solar storm that affected modern technology, Princeton University Press, ISBN 9780691141268, Popular book (Basic)

**The Sun and Space Weather,** A. Hanslmeier, (2007), 2nd Edition, An exposition about space weather and space environment impacts, E-book, Softcover, Hardcover <https://doi.org/10.1007/978-1-4020-5604-8>

**Space Weather,** M. Hapgood, (2017) IOP Publishing, An introduction to space weather and associated critical research topics, ISBN 978-0-7503-1372-8 (ebook), DOI 10.1088/978-0-7503-1372-8, FREE ACCESS

**Aurora: In Search of the Northern Lights,** M. Windridge (2016). Harper Collins; ISBN-13: 978-0008156091

## Books Related to Specific Regions where Space Weather Develops and/or Impacts Technological Systems

<b>Physics of the Solar Corona - An Introduction</b>	Advanced	M. Aschwanden	(2005)
	Springer	ISBN 978-3-540-30766-2	

<https://www.springer.com/gp/book/9783540307655>

<b>Principles of Heliophysics: a description of the universal processes behind planetary habitability</b>	Advanced	K. Schrijver et al	(2018)
		<a href="https://arxiv.org/abs/1910.14022">arXiv:1910.14022</a>	Pre-print Free Access

<b>Magnetohydrodynamics of the Sun</b>	Advanced	E. Priest	(2014)
	Cambridge University Press	eBook ISBN: 9781107776760 HB ISBN: 978-0521854719	TOC at URL below

<https://doi.org/10.1017/CBO9781139020732>

<b>Basics of the Solar Wind</b>	Advanced	N. Meyer-Vernet	(2007)
	Cambridge University Press	ISBN 9780511535765	TOC at URL below

<https://doi.org/10.1017/CBO9780511535765>

<b>Introduction to Geomagnetically Trapped Radiation</b>	Advanced	M. Walt	(2005)
A textbook about the radiation belts	Cambridge University Press	ISBN: 9780521616119	

<b>Ionospheres: physics, plasma physics, and chemistry</b>	Advanced	R. Schunk and A. Nagy	2 <sup>nd</sup> Ed (2018)
A textbook about the physical basis of space weather in Earth's ionosphere	Cambridge University Press	ISBN 978 1108462105	

<b>The Ionosphere: Communications, Surveillance, and Direction Finding</b>	Intermediate-Advanced	L. F. McNamara	(1991) Hardcover
A textbook about uses of the ionosphere and space weather that occurs there	Krieger Publishing, Malabar, FL, USA	ISBN 0-89464-040-2	

<b>Physics and Chemistry of the Upper Atmosphere</b>	Advanced	M. H. Rees	(1989) Online 2011
	Cambridge University Press	ISBN 9780511573118	TOC at URL below

<https://doi.org/10.1017/CBO9780511573118>

**The Sun from Space**, K. Lang, Kenneth, (2009), Springer, ISBN 978-3-540-76953-8 (Intermediate)

**Sunspots and Starspots**, J. Thomas, and N. Weiss, (2008) Cambridge: Cambridge University Press,  
doi:10.1017/CBO9780511536342

- Solar and Stellar Magnetic Activity**, C. Schrijver, C., and C. Zwaan, (2000), Cambridge University Press,  
<https://doi.org/10.1017/CBO9780511546037>
- Energetic Particles in the Heliosphere**, Simnett, George M., Springer, (2017), ISBN 978-3-319-43495-7

### **Books Related to Plasma Physics & Magnetohydrodynamics**

(Sampling only)

The Physics of Plasmas	Advanced	T. Boyd, T., & J. Sanderson	(2003)
	Cambridge University Press	ISBN 9780511755750	TOC at URL below

<https://doi.org/10.1017/CBO9780511755750>

Introduction to Modern Magnetohydrodynamics	Advanced	S. Galtier	(2016)
	Cambridge University Press	ISBN 9781316665961	TOC at URL below

<https://doi.org/10.1017/CBO9781316665961>

**Introduction to Plasma Physics With Space and Laboratory Applications**, D. A. Gurnett and A. Bhattacharjee, (2005), Cambridge University Press, ISBN 9780511809125, <https://doi.org/10.1017/CBO9780511809125>

**Magnetic Reconnection: MHD Theory and Applications**, E. Priest, and T. Forbes, Cambridge University Press, 2000, ISBN: 9780511525087, TOC at <https://doi.org/10.1017/CBO9780511525087>

**Reconnection of Magnetic Fields: Magnetohydrodynamics and Collisionless Theory and Observations**  
Edited by J. Birn and E. Priest, Cambridge University Press, 2007, doi:10.1017/CBO9780511536151

## **Monographs, Edited Volumes and Meeting/Conference Proceedings**

**Space Storms and Space Weather Hazards.** Edited by I. Daglis, (2001) *NATO Science Series, Series II: Mathematics, Physics and Chemistry 38*. Proc. inst., Hersonissos, Crete, June 2000. Kluwer Academic, Norwell, Mass., ISBN 1-4020-0030-8)

**Space Weather: The Physics Behind a Slogan,** Edited by K. Scherer, H. Fichtner, B. Heber, and U. Mall, (2005) Proceedings from a space weather conference with emphasis on physical processes. (Springer, Heidelberg). ISBN 978-3-540-22907-0

**Space Weather: Physics and Effects,** Edited by V. Bothmer and I. A. Daglis (2007), Publication resulting from an international space weather conference, Springer Praxis Books, Heidelberg, ISBN 978-3-540-23907-9, TOC at  
<https://link.springer.com/book/10.1007/978-3-540-34578-7>

**Handbook of the Solar-Terrestrial Environment,** Editors: Y. Kamide and A. Chian, (2007), Springer Verlag, ISBN 9783540463146  
Intermediate to Advanced, <https://link.springer.com/book/10.1007/978-3-540-46315-3>

**Auroral Physics,** Ed. C. I. Meng, M. J. Rycroft, L. A. Frank, (2012), Cambridge University Press, (1991)  
ISBN: 9780521157414, re-issue softcover (2012)

**Solar Origins of Space Weather and Space Climate,** Edited by I. González Hernández, R. Komm, A. Pevtsov, and J. Leibacher, (2014), Based on the presentations given at the 26th National Solar Observatory (NSO) Summer Workshop 2012, Springer, ISBN 978-1-4939-1182-0

**Space Weather Fundamentals,** Edited by George V. Khazanov, (2016), A monograph about the physical basis of space weather, CRC Press, ISBN 9780367875558

**Space Weather of the Heliosphere: Processes and Forecasts,** Edited by C. Foullon and O. E. Malandraki, (2018), International Astronomical Union Symposium 335, Cambridge University Press, ISBN 9781107192409

**Geomagnetism, Aeronomy and Space Weather,** Edited by M. Mandea, M. Korte, A. Yau and E. Petrovsky, (2020) A monograph about the interacting systems of space weather and special publication to mark the centenary of IUGG, Cambridge University Press, ISBN 978-1-108-41848-5 and DOI: 10.1017/978110829013

**Machine Learning Techniques for Space Weather,** Edited by E. Camporeale, S. Wing and J. Johnson (2018), Elsevier, ISBN: 9780128117880, eBook ISBN: 9780128117897

**Extreme Events in Geospace, Origins, Predictability, and Consequences,** Edited by N. Buzulukova, (2018), Elsevier eBook ISBN: 9780128127018

**The Human Factor in a Mission to Mars: An Interdisciplinary Approach,** Edited by Konrad Szocik (2019), Individual chapters devoted to space weather/environment, Springer, ISBN 978-3-030-02058-3, eBook: ISBN 978-3-030-02059-0

**Extreme Solar Particle Storms: The hostile Sun,** Edited by F. Miyake, I. Usoskin and S. Poluianov, (2020) IOP Publishing Ltd, Online ISBN: 978-0-7503-2232-4

**Ionospheric Multi-Spacecraft Analysis Tools Approaches for Deriving Ionospheric Parameters,** Edited by M. W. Dunlop, and H. Lühr, (2020) Springer, ISBN 978-3-030-26731-5

## **Series Related to Space Environment, Plasma and Heliospheric Physics**

This list covers regions and processes that may relate to space weather. It is not comprehensive
