# What are the change cards?

- Change cards are questions that help people think outside of the box and discuss possible directions of a policy.
- Change cards are useful in the early stages of designing a policy when you are trying to understand what users need and want from a policy area. They are also useful when you have gone through all the usual ideas and need to think differently.

Why are OE policies needed? List 3-5 possible strategic aims of a policy.

# Awareness of the international landscape

What's going on in OE around the world (3-5 key trends)?

What's going on in OE policymaking specifically?

# Widening participation

Who would be in your dream team to design your institutional OE policy?

# Considering other stakeholders

Why might you include Open Science, Data, Access and Government experts?

Why might you include Educators, researchers, librarians, learning techs & students?

Why might you include Education or Public Policy experts?

# Being resourceful

What if you had to persuade your institution with a meme? What would it be?

# Being optimistic

What impact should your policy have in your institution?

What evidence of your policy's impact would help you advise on OE Policies for the whole world?

# Being flexible & iterative

What other policies might support yours?

What other policy or issue could seriously derail yours?

Write a news headline launching your new policy for your institutional website in less than ten words.
