Objectives:

- creating the social sciences and humanities (**SSH**) part of European Open Science Cloud (**EOSC**)
- maximising **re-use** through **Open Science** and **FAIR** principles (standards, common catalogue, access control, semantic techniques, training)
- interconnecting existing and new infrastructures (clustered cloud infrastructure)
- establishing appropriate **governance model** for SSH-EOSC

SSHOC Principal Goals

SSHOC will create the social sciences and humanities area of the **European Open Science Cloud (EOSC)** thereby facilitating access to flexible, scalable research data and related services streamlined to the precise needs of the SSH community.

SSHOC will leverage and interconnect existing and new infrastructures from the **SSH ERICs** to foster synergies across disciplines and expedite interdisciplinary research and collaboration.

Expected impact

The Social Sciences and Humanities are seamlessly integrated in the European Open Science Cloud

Availability of an EU-wide, easy-to-use SSH Open Marketplace, where tools and data are openly accessible

EU-wide availability of high quality “cloud ready” SSH tools and high quality SSH data

EU-wide availability of trusted and secure access mechanisms for SSH data, conforming to EU legal requirements

State of the art Research Infrastructure in several pilot domains advanced through dedicated SSH data pilots cluster projects

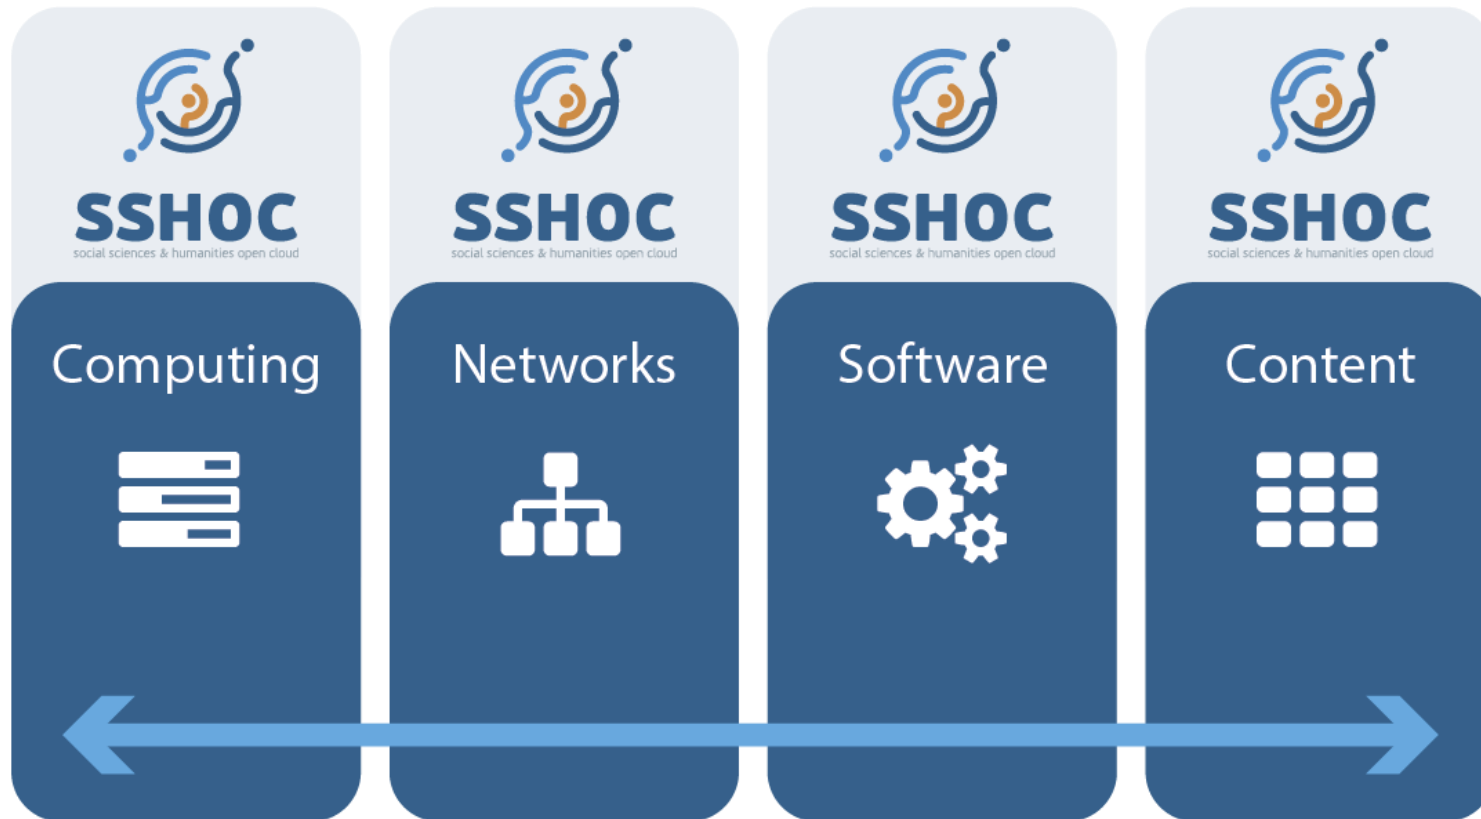

Maximising reuse through Open Science and FAIR principles (standards, common catalogue, access control, semantic techniques, training)

Transition from disciplinary silos and separate e-infrastructures into cloud-based infrastructure for scholars
