

Vector backbone: pBluescript KS
PmH4p, *P. multistriata* H4 gene promoter; MRP3, Mating-type Related Plus 3 gene coding sequence; Gene ID: 0020770 (Russo et al., 2018); YFP, yellow fluorescent protein; PtLhcf1t, *P. tricornutum* Lhcf1 gene terminator.
This plasmid is suitable for *P. multistriata* biolistic transformation and is used to overexpress and tag the MRP3 gene.
