The logo for the United Nations Global Compact, featuring a globe with the text "UN GLOBAL COMPACT" above it and "COMMUNICATION ON PROGRESS" below it.

This is our **Communication on Progress** in implementing the principles of the **United Nations Global Compact** and supporting broader UN goals.

We welcome feedback on its contents.

In a nutshell

Ensuring that every human can afford a decent and healthy life is an individual duty.

It can be easily achieved if we mutualize resources to create knowledge and technologies that can be freely used, reproduced, adapted, improved.

Aiming co-created collective health

Play is a natural way to experiment, socialize, learn. Our community invites people to collectively create libre and open-source games and game controllers to foster mutual and self-care in respiratory and mental health.

We bring together game designers, programmers, artists, people with respiratory and mental health experience, clinicians, and other passionate people. Together, we prototype games, develop an inclusive creation and research methodology, and mutualize resources to coordinate the initiative and root it local communities.

Valuing access to care

- We create essential solutions with diverse communities who need them.
- We mutualize forces and collaborate meaningfully to avoid alike projects.
- We ensure our work can be reproduced + improved freely by individuals.
- We ensure that outcomes generated are shared among the contributors.
- We validate accessibility and health outcomes with scientific methods.

Facts and figures

- 350 professionals and researchers mobilized across five countries
- 440000 viewers reached through broadcast and documentary
- 20000 hours of contributions
- 53 scientific communications
- 15 media interviews including the documentary A new Economy
- 300 K research funds and donations received
- 22 co-creation events organized
- 22 games prototyped
- 6 game controllers prototyped

Key affiliations

We are members of the

- Global Alliance against chronic Respiratory Diseases (GARD-WHO)
a network of over eighty lung associations to reduce the burden of respiratory diseases, especially in poor regions.
- Open Source Initiative
a network of over eighty organizations advocating for open-source
- International Geneva Welcome Center
a support center for international civil servants and non-governmental organizations based in Geneva.

Principles

Since May 2016, Breathing Games is a signatory of the UN Global Compact. We celebrate human life and the right to do meaningful activities. The first article of the Declaration of Human Rights leads our vision:

*All human beings are born free and equal in dignity and rights.
They are endowed with reason and conscience and should act
towards one another in a spirit of brotherhood.*

We understand collectively created health knowledge and technologies as the way to promote self- and mutual care. To “ensure healthy lives and promote well-being for all at all ages” (UN Global Goal 3), we believe that all should become creators of the collective wellbeing, putting in commons our experience, and ideas.

We encourage individuals and peer-to-peer communities to build on our work through following principles.

Free software and open-source hardware

We use tools that respect the users’ freedom to use and share them, and modify their source code and design, when such tools provide the functions we need, and do not require an excessive time to acquire them:

- GitLab for sharing our games and documentation
- GIMP for image edition
- LibreOffice for offline documentation

Copyfair licences

Instead of an excluding copyright, we use licences that preserve the right to reuse and enrich knowledge and technologies if reciprocity is provided:

- GNU Affero General Public License 3.0 (Free Software Foundation)
- Attribution-ShareAlike 4.0 International (Creative Commons)
- Open Hardware Licence Strong Reciprocal (CERN)
- Peer Production Licence (P2P Foundation)

Accessible documentation

We document our co-creation process, the source code of software and designs of hardware created, and make this documentation freely accessible via:

- breathinggames.net
- gitlab.com/breathinggames
- full open access publications and repositories like Zenodo
- platforms to reach broad communities like Discord (gamer messaging)

Participatory research

To reduce power inequalities and encourage social transformation, we do research with the participants rather than on or for them. We consider that not to have a positive impact when being privileged is unethical.

Open governance and distributed data system

We log contributions in time, money and kind to acknowledge individual efforts towards the collective. This also provides a basis for traceability.

We aim to develop a distributed platform to mutualize and redistribute resources across a global community. This should help individuals find communities, merge ideas, develop global projects, do peer-reviewed quality control, and co-define how data is managed. See chart below.

Agility

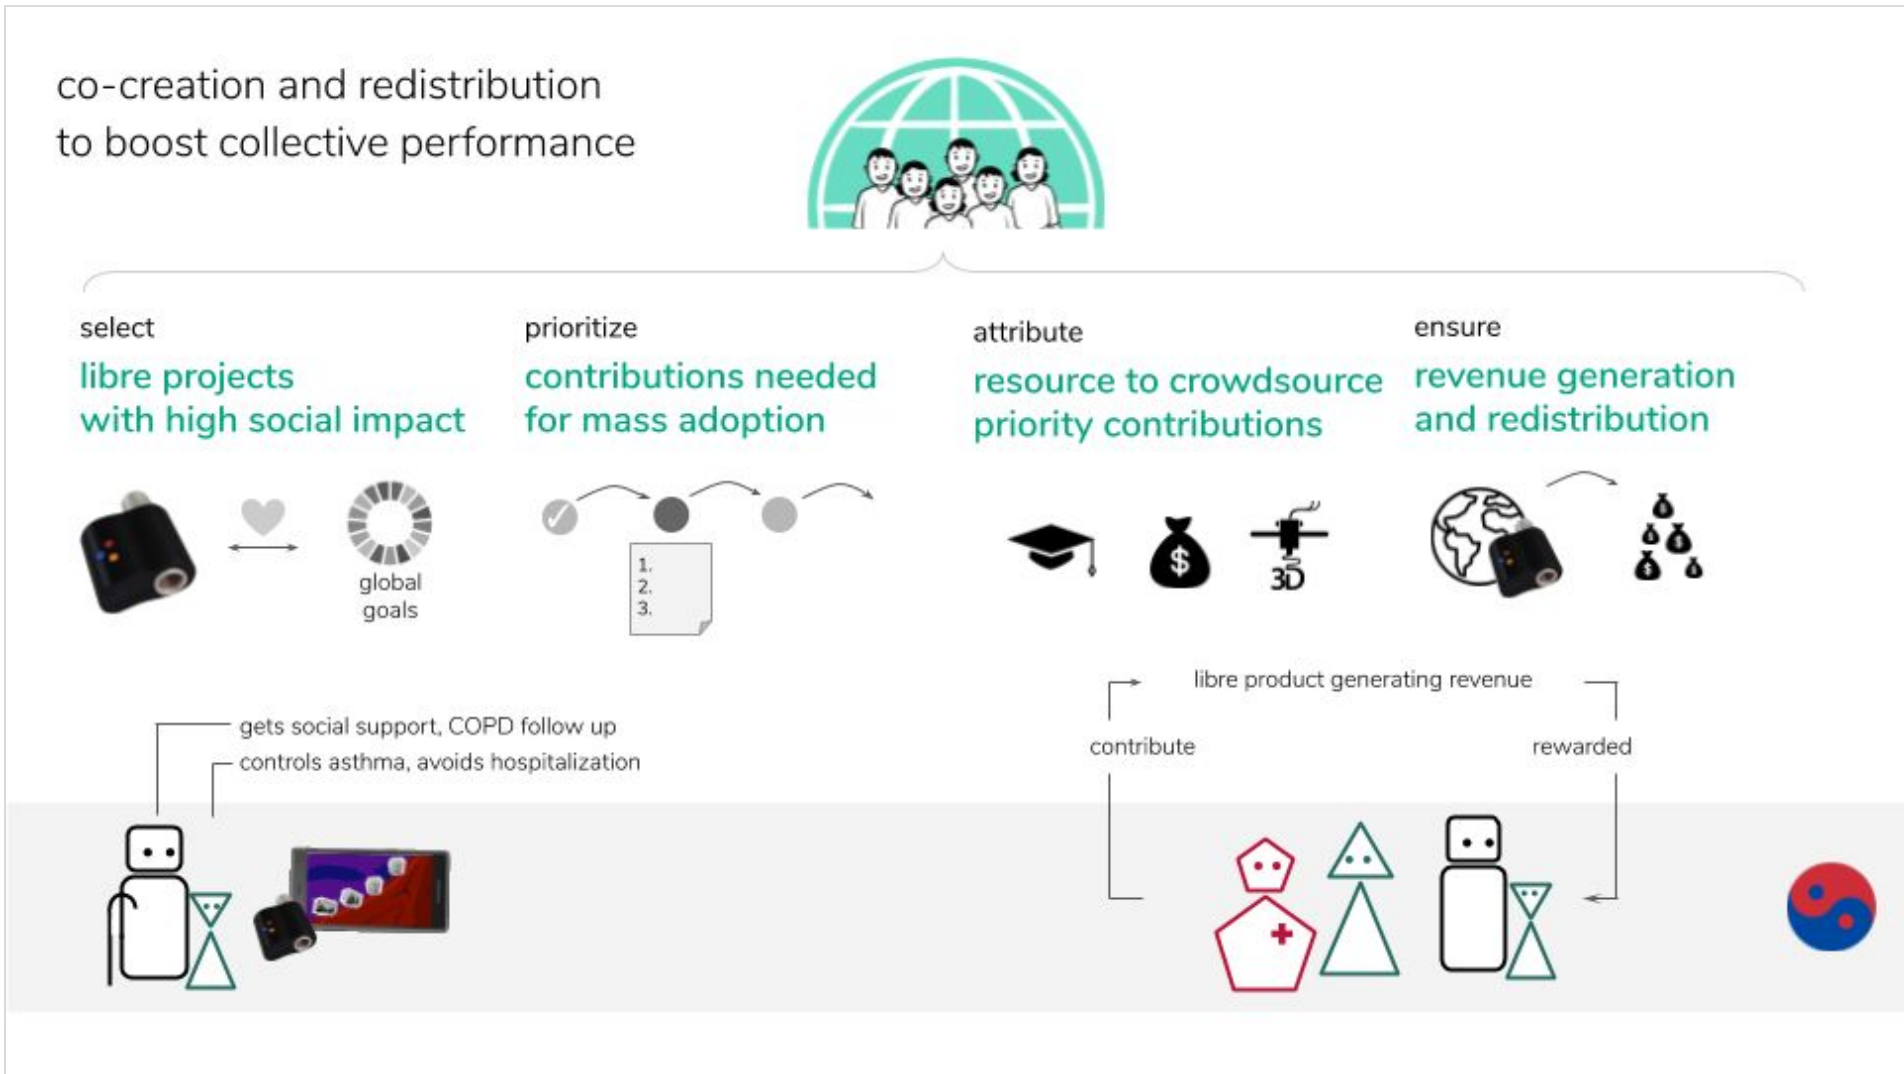

We foster transdisciplinarity. We take advantage of existing infrastructures, use a frugal approach, and develop low-tech products.

Thus, we build a coherent ecosystem: an open access commons increasingly capable of sustaining communities in developing and sharing health knowledge, fostering social justice, reducing inequalities.

Updated July 2020

Organization

One goal for the professionalization of our structure is to adopt an open governance model, and social impact indicators. This will allow us to scale up the initiative while keeping a structure that fosters open cooperation and transparent redistribution. Also read 'coordination' at coronavirus-openkit.net.

Funding

The Breathing Games commons exists thanks to the time offered by our community – over four years full-time equivalent.

The funding received enabled us to organize co-creation events (mostly hosting, food, transportation), research, and ensure essential developments. The tables below give an overview of revenue and expenses by country since the beginning of the initiative. In-kind contributions are not included, except to a lesser extent for Canada (5630 CAD). Funds are managed via different structures, depending on the type of funding (donation, research grant, etc.).

Switzerland

Grants for co-creation, managed by the Breathing Games Association.

External audit realized for the 2019 accounts. CHF.

Expenses	26165.85	Revenues	26165.85
Game jams	21862.23	Foundation in Geneva	20000.00
Admin fees	1892.40	BG France	6165.85
Web presence	1805.75		
Banking fees	175.95		
Covid loss	330.10		

Funds managed by third parties. CHF.

Expenses	97600.00	Revenues	97600.00
Research	48400.00	Seed fund HE Arc	48400.00
Game jams	40000.00	Foundation in Geneva	40000.00
Co-facilitation	9200.00	Geneva U - partnership	9200.00

France

Grant for co-creation, managed via Balli's structure (requirement). EUR.

Expenses	54000.00	Revenues	54000.00
Game jams	16800.00	Fonds FHF	54000.00
Development	22080.00		
Devices	3106.00		
Taxes planned	10294.00		

Canada

Grants for co-creation and research, most managed by Concordia U. CAD.

Expenses	48556.27	Revenues	48556.27
Redistribution	23671.09	Forces Avenir	2000.00
Research	11418.00	CHU Ste Justine health pr.	2770.00

		Concordia CUAA	1000.00
		Can Instit Health Research	22530.00
		Breathing Games	2176.75
		Individual donations	420.00
		Transit BG	666.28

Italy

Grant for hardware, managed by WeMake. EUR.

Expenses	472.56	Revenues	472.56
Electronics	472.56	OpenCare	472.56

South Korea

Funds managed by third parties. KRW.

Expenses	12020000	Revenues	12020000
Co-facilitation	12020000	Yonsei U - partnership	12020000

2020

We were invited to host a joint event for the Geneva Health Forum (global health, 2000 participants) and Open Geneva (40 civil society hackathons, 1500 participants). We sketched the 'Open Village,' a hands-on event to promote freely reproducible material for health. Following the pandemic, this event was postponed to November. In the meanwhile, we created coronavirus-openkit.net, a fully editable website to list hackathons and open-source material against covid. We also did an [interview with Prof. Pittet](#), who spread the alcohol-based hand rub patent-free, which saved 8 million lives yearly – before covid.

Regarding the games, we focus on developing the Rise multiplayer to promote respiratory and mental health. Asthma Heroes was also translated in Korean. Co-creation events planned in Paris and Besançon as well as different communications were also cancelled or postponed.

We are also professionalizing our structure, and asked for an external audit of the Breathing Games Association bookkeeping for 2019.

Co-creation events

- Mar 21 Presentation of co-creation results, online (covid)
- Nov 15-19 Open Village, Geneva Health Forum, Geneva
- ...

Communications

- Feb 3-5 Open Hardware from Academia Incubator, Bath
- June 11 Workshop Public Health Schweiz, online
- ...

Play is, like oxygen, “all around us, yet goes mostly unnoticed or unappreciated until it is missing.”

Dr Stuart Brown

2019

We invite young adults in Paris to create games around their experience of cystic fibrosis. We clinically test games in Montreal and Palermo, and improve and validate our game controller in Paris, Geneva and Montreal. Our initiative is broadcasted on the Swiss telejournal (300000 viewers).

Co-creation events

- Mar 9-10 Clinical study, Sainte-Justine, Montreal
- Mar 17-18 **Game jam**, Necker hospital, Paris
- Mar 20-24 **Game jam**, OpenGeneva Festival, Geneva
- Apr 14-16 Hackathon team, Arkathon, Sion
- Jun 19-20 Micro game jam on virtual reality, Concordia U, Montreal
- Oct 13-17 **Game jam**, Fondation Arc-en-ciel, Besançon
- Oct 19-20 **Game jam**, Necker hospital, Paris

Communications

- Feb 27 Libraries colloquium on games and education, Montreal
- Mar 20 Panel, Meet the makers of a better world, Geneva
- Apr 11 Exhibition, World Summit on Info Society forum, Geneva
- Jul 5 Poster, Gamification & SG Symposium, Neuchâtel
- Jul 11 Serious Play Conference, Montreal
- Jul 31-Aug 5 Gathering Open Science Hardware, Toronto
- Aug 27-Oct 2 CityPreneurs, Seoul
- Sept 27 European nights of research, Palermo
- Oct 25-27 Poster, **general meeting of GARD**, Beijing
- Nov 25 Presentation, Tsinghua SDG OpenHack, Beijing

2018

This year, we continue to develop seven games – Asthmonautes, Respi Heroes, LungLauncher, Bloïd, PeakFlow, PeakLeap and TikiFlow, see page Games – that will be clinically tested in 2019.

Co-creation events

- Apr 12-15 **Game jam**, OpenGeneva Festival, Geneva
- Nov 5-13 Residence, Eco2fest, Montreal

Communications

- Jan 13 Presenting to the research collective OMNSH, Paris
- Apr 3 Webinar at McGill University Game Lab, Montreal
- Apr 10 Quebec innovation week Sainte-Justine, Montreal
- Aug 31 Poster, **general meeting of GARD**, Helsinki
- Oct 12 Poster, Canadian Arts Therapy Conference, Montreal
- Oct 26 Photograph for 50 years of planning at UdeM, Montreal
- Nov 5 Presenting to PME MTL during Eco2fest, Montreal

2017

Breathing Games is funded by the Canadian Institutes of Health Research (strategy for patient-oriented research) and by the French Hospitals Federation (research and innovation fund). The first is a collaboration with Concordia University and CHU Sainte-Justine, the latter with Necker and Cochin hospitals.

Three game jams are held, as well as many scientific communications. A 3d-printed modular bed to test pressure and flow sensors is developed during a two-week maker in residence funded by the Horizon 2020 program of the European Union.

80 participants attend a screening of A new Economy, followed by a panel with social innovation experts Marguerite Mendell and Jean-Martin Aussant. The documentary is also released on Netflix. Breathing Games is also presented in an audio interview broadcasted by Les jeux sont faits.

Co-creation events

- Feb 18-19 [Game jam](#), Concordia U, Montreal
- Mar 1-3 [Game jam](#), Lift:Lab, Geneva
- May 25-26 Workshops on blockchain, C2 Mtl, Montreal
- Jun 3-10 [Game jam](#), Concordia U, Montreal
- Jun 21-Jul 8 Maker in residence OpenCare, WeMake, Milan
- Nov 30- Dec 2 Keynote and workshops Collaborate and learn/teach differently, Concordia U + CHU Sainte-Justine, Montreal

Communications

- Mar 24 Presentation, [Gathering Open Science Hardware](#), Chile
- Mar 24 Presentation, Global Goals Innovation Day, Geneva
- Mar 25 Presentation, Oxford U Global Challenge, Calgary
- Mar 25 Presentation, Concordia Education Symposium, Montreal
- Apr 12 Presentation, European Academy of Design, Rome
- May 10-12 Presentation and posters, ACFAS congress, Montreal
- Oct 6 Presentation on game jams, Lausanne U, Lausanne
- Oct 20 Presentation, OpenVillage Festival, Brussels
- Nov 3 Panel, [Canadian Science Policy Conference](#), Ottawa
- Nov 9 Poster, [general meeting of GARD](#), Brussels

2016

Breathing Games joins the [Open Source Initiative](#), and becomes a signatory of the [United Nations Global Compact](#), a commitment of organizations to “strive towards a world that benefits everyone, especially the future we borrow it from.”

Three game jams are held. An engineering student creates a core for different games, which centralizes data collection, settings and therapy patterns. Interviews from 16 contributors are released on our [YouTube channel](#).

In collaboration with the Lung Association of Québec, we apply to the Google Impact Challenge, a five million dollar grant to help ten initiatives tackle the biggest social challenges (not selected).

Co-creation events

- Feb 10-12 [Game jam](#), Lift Conference, Geneva
- Aug 5-7 [Game jam](#), Concordia U, Montreal
- Aug 10-12 Workshop Health & Play, World Social Forum, Montreal
- Nov 7 Workshop Open Hardware, Concordia U, Montreal
- Nov 12-13 [Game jam](#), Concordia U, Montreal

Communications

- May 12 Presentation, ACFAS congress, Montreal
- June 9 Presentation, European CF Conference, Basel
- Aug 17-19 Workshop, [Symposium on Open Collaboration](#), Berlin
- Oct 3 Poster, FRQS congress on respiratory health, Montreal
- Nov 21 Poster, [Quebec annual public health days](#), Montreal
- Nov 22 Presentation, Mobile health apps colloquium, Montreal

2015

Eight researchers from the University of Applied Sciences Western Switzerland (Arc) start a study to evaluate the adequacy and cost of a serious game to increase respiratory compliance. We also collaborate with Sainte-Justine hospital to develop and test games for children who have asthma.

Breathing Games collaborates with Sensorica, a peer-production network specialized in open source hardware. We adopt its Value Accounting System, a platform that allows to log contributions in time, money or material and to redistribute funds with an equation.

An engineering student documents the cystic fibrosis practice in Switzerland and does a thorough reflection on the game design. Another engineering student adapts a software library to capture the noise made by mouthpieces used in cystic fibrosis treatment.

News about Breathing Games appear in national and regional CF newsletters in Spain. The team of Domain 7 follows Sensorica and Breathing Games for a documentary about “people making a fresh start towards building a new Economy.”

Co-creation events

- June 5-7 Hackathon, Arkathon, Sierre
- Aug 28-29 Hackathon, Sensorica, Montreal

Communications

- June 11 Poster, European Cystic Fibrosis Conference, Brussels
- Oct 29 Presentation, symposium on collaboration, Montreal

2014

Begin of the initiative as part of graduate studies in game design at Montreal University. Fabio Balli and Yannick Gervais build on the work done previously by John Danger. After developing the first prototype, a preliminary study is realized with ten children at Sainte-Justine hospital. The team is a finalist of Forces Avenir, which aims to recognize socially conscious students.

A website is created, and receives the certification “Health on the Net,” which aims to foster quality, objective and transparent medical information.

A sociology student writes a dissertation about serious games, describing opportunities and limits of our initiative and another project. A blog article about the initiative is written by Canada Research Chair on Health Innovations.

Co-creation events

- Feb 21-23 Hackathon, CHU Sainte Justine, Montreal
- Nov 5-6 Hackathon, Montreal Summit on Innovation, Montreal

Games

Most games are developed on Unity as we have no resources to contribute to developing a free/libre engine like Godot.

Asthma

Asthma Heroes
Prevention and management of crises, 7-12 yo
45 minutes, Unity, Windows computer
Actively developed – beta, tested

Asthmonautes
Prevention and management of crises, 7-12 yo
45 minutes, GameMaker, Windows computer
Developed – RC, tested

LungLauncher
Prevention of asthma crises, 7-12 yo
4 minutes, Unity, Android smartphone
Developed – RC, tested

Peer support for all (with contents for COPD, cystic fibrosis)

Rise
Mutual care in respi and mental health, 8+ yo
10 minutes, Unity, Windows computer
Actively developed – alpha

DicoSym
Mutual care in respi and mental health, 16+ yo
5 minutes, Unity, Android smartphone
Actively developed – beta

Breathing exercises and health promotion

TikiFlow

Self screening of lung capacity (peak flow)
3 minutes, Unity, Android smartphone
Actively developed – beta, tested

Bloid

Breathing exercise for stress reduction
5 minutes, Unity, Windows computer
Actively developed – alpha, tested

VR game

Exploring artwork related to breathing
5 minutes, Unity, Windows computer
Actively developed – alpha

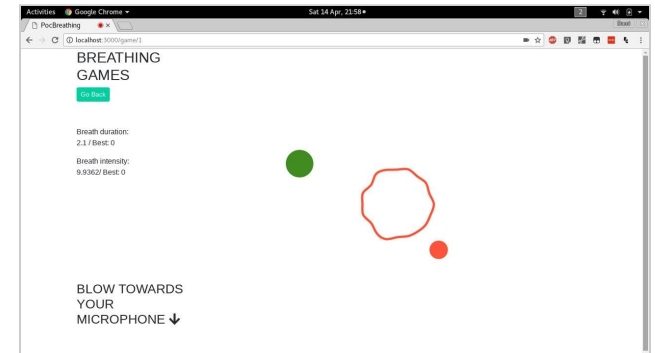

Mille-feuilles

Breath. exercise to increase lung volume (COPD)
3 minutes, Unity, Windows or Mac computer
Prototyped

Pulmo

Respiratory health awareness
5 minutes, Unity, Android smartphone
Prototyped

PocBreath

Breathing toy
3 minutes, JS, Browser on smartphone
Prototyped

Discontinued prototypes

Following games were discontinued to the benefit of more functional games.

PeakFlow – Self screening of lung capacity

PeakLeap – Self screening of lung capacity

BreathingApp – Asthma medication follow up

Pulmination – Removing allergens

RollABall – CF airway clearance

Heritages – CF airway clearance

Les aventures du Briand – CF airway clearance

Celebrations – Respi health promotion (concept)

Globule – CF airway clearance

Ange-Gardien – CF airway clearance

PEP Hero – CF airway clearance

Hardware

Spirotroller enhanced
Game controller measuring the expiratory flow,
3d-printed, Bluetooth and USB, three buttons
Direct use
Actively developed

Spirotroller
Game controller measuring the expiratory flow,
3d-printed, Bluetooth and USB, one button
Direct use
Prototyped

Modular test bench
Bench including fan and modules to assess a
variety of sensors in different settings
Direct use
Prototyped

Led box
Controller measuring the expiratory pressure,
3d-printed, Bluetooth and USB, 8x8 LED matrix
Use with mouthpiece
Prototyped

3D organic box
Controller measuring the expiratory pressure,
3d-printed, USB, 1 LED
Use with mouthpiece
Actively developed

Sound library
Library analyzing the noise via a standard micro
set affixed to a mouthpiece
Use with oscillating mouthpiece
Prototyped

Research

This page summarizes research activities in Canada, France, Switzerland, Italy and South Korea.

Time	Activity	Team	Organizations	Major funding
2019-now	Combining air quality (fine dust) and breath sensing	Changsoo Kim, Jean-Henry Morin, Emmanuel Kellner, Fabio Balli	Yonsei and Geneva Universities, LogAir	UNIGE-Yonsei Seed Fund
2019-now	n children with asthma test a game	Yoo Young, Guillaume Jeanmaire, Fabio Balli	Korea University, Anam hospital	–
2019-now	n children with asthma test a game from home	Stefania La Grutta, Laura Montalbano, Fabio Balli	IBIR-CNR	–
2019-now	Involving young adults with CF in creating games to foster self-care	Isabelle Sermet-Gaudelus, Pierre-Régis Burgel, Maya Kirszenbaum, Julie Valette, Marlene Clairicia, Aline Lustre, Damien Fangous, Fabio Balli	Necker and Cochin hospitals	French Hospitals Federation Fonds FHF
2019-2020	140 children with asthma test a flow-based game controller	Sze Man Tse, Myriam Bransi, Alena Valderrama, Fabio Balli	Sainte-Justine + Quebec hospitals, Concordia University	Canadian Institutes Health Research, Concordia U
2019-2020	Ten children with asthma test four games	Sze Man Tse, Alena Valderrama, Maria Frangos, Fabio Balli	Sainte-Justine hospital, Concordia University	Canadian Institutes Health Research, Concordia U
2017-now	Interviews of contributors	Maria Frangos	Maria Frangos	–
2015-2016	Pre-study on serious games for cystic fibrosis → asthma	Christian Voirol, Aïcha Rizzotti, Typhaine Juvet, Gérald Huguenin, Stéphane Gobron, Nicolas Wenk, Calin Ionescu, Pauline Meyer, Fabio Balli	University of applied sciences Arc	Fonds d'impulsion HE Arc
2014	Ten children with CF test games with a pre-post survey	Annie Brochu, Nadia Marquis, Isabelle Tellier, Jacques-Édouard Marcotte, Sophie Laberge, The Thanh Diem Nguyen, David Duguay, Pascal Nataf, Yannick Gervais, Fabio Balli	Sainte-Justine hospital	–
2014-now	Documenting the co-creation	Various	Various	–
