

FRDR

The Federated Research Data Repository (FRDR) is a system for researchers to discover and share Canadian research data.

OVERVIEW

- Developed through a partnership between CARL/Portage and Compute Canada, supported by Portage's Network of Experts.
- Search across multiple Canadian data repositories from a single portal.
- Publish in a secure repository that keeps your data in Canada.

FIND DATA

- Discover datasets stored in data repositories across Canada.
- Use faceted search to refine your results.
- Standardized metadata facilitates discovery and navigating search results.

ACCESS DATE

- Download data stored in FRDR
- FRDR links to data stored in external repositories.
- Clear licensing terms indicate how others can reuse your data.
- Choose when your data will be released by adding an embargo period.

DEPOSIT DATA

- All Canadian researchers are eligible to deposit.
- Any type of research data or file format may be deposited.
- Easily upload datasets of any size, including large individual file sizes or many thousands of files.
- Automatically receive a DOI for your dataset.

SUPPORT SERVICES

- FRDR helps you comply with the FAIR principles by making your data findable, accessible, interoperable, and reusable.
- Curation support from local data experts coordinated nationally by Portage.
- Technical operations & development provided by Compute Canada.
